**NEP 2020 BASED CURRICULUM**

**for**

**AFFILIATED INSTITUTES**

**Second year B. Tech. in**

**MECHANICAL ENGINEERING**

**ACADEMIC YEAR 2025-2026**

## Vision

The vision of the department is to achieve excellence in teaching, learning, research and transfer of technology and overall development of students.

## Mission

Imparting quality education, looking after holistic development of students and conducting need-based research and extension.

### Graduate Attributes

The Graduate Attributes are the knowledge skills and attitudes which the students have at the time of graduation. These Graduate Attributes identified by National Board of Accreditation are as follows:

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and teamwork:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**10. Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**11. Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**12. Life-long learning:** Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### **Program Educational Objectives**

<b>PEO1</b>	Graduates should excel in engineering positions in industry and other organizations that emphasize design and implementation of engineering systems and devices.
<b>PEO2</b>	Graduates should excel in best post-graduate engineering institutes, reaching advanced degrees in engineering and related discipline.
<b>PEO3</b>	Within several years from graduation, alumni should have established a successful career in an engineering-related multi-disciplinary field, leading or participating effectively in interdisciplinary engineering projects, as well as continuously adapting to changing technologies.
<b>PEO4</b>	Graduates are expected to continue personal development through professional study and self-learning.
<b>PEO5</b>	Graduates are expected to be good citizens and cultured human beings, with full appreciation of the importance of professional, ethical and societal responsibilities.

## Program Outcomes

At the end of the program the student will be able to:

<b>PO1</b>	Apply knowledge of mathematics, science and engineering to analyze, design and evaluate mechanical components and systems using state-of-the-art IT tools.
<b>PO2</b>	Analyze problems of production engineering including manufacturing and industrial systems to formulate design requirements.
<b>PO3</b>	Design, implement and evaluate production systems and processes considering public health, safety, cultural, societal and environmental issues.
<b>PO4</b>	Design and conduct experiments using domain knowledge and analyze data to arrive at valid conclusions.
<b>PO5</b>	Apply current techniques, skills, knowledge and computer-based-methods and tools to develop production systems.
<b>PO6</b>	Analyze the local and global impact of modern technologies on individual organizations, society and culture.
<b>PO7</b>	Apply knowledge of contemporary issues to investigate and solve problems with a concern for sustainability and eco-friendly environment.
<b>PO8</b>	Exhibit responsibility in professional, ethical, legal, security and social issues.
<b>PO9</b>	Function effectively in teams, in diverse and multidisciplinary areas to accomplish common goals.
<b>PO10</b>	Communicate effectively in diverse groups and exhibit leadership qualities.
<b>PO11</b>	Apply management principles to manage projects in multidisciplinary environment.
<b>PO12</b>	Pursue life-long learning as a means to enhance knowledge and skills.

### **Credit Framework under Four-Years UG Engineering Programme with Multiple Entry and Multiple Exit options:**

- The Four-year Bachelor's Multidisciplinary Engineering Degree Programme allows the students to experience the full range of holistic and multidisciplinary education in addition to a focus on the chosen major and minors as per their choices and the feasibility of exploring learning from different institutions.
- The minimum and maximum credit structure for different levels under the Four-year Bachelor's Multidisciplinary Engineering UG Programme with multiple entry and multiple exit options are as given below:

#### **Credit Framework**

Levels	Qualification Title	Credit Requirements		Semester	Year
		Minimum	Maximum		
4.5	One Year UG Certificate in Engg./ Tech.	40	44	2	1
5.0	Two Years UG Diploma in Engg./ Tech.	80	88	4	2
5.5	Three Years Bachelor's Degree in Vocation (B. Voc.) or B. Sc. (Engg./ Tech.)	120	132	6	3
	4-Years Bachelor's degree				

Levels	Qualification Title	Credit Requirements		Semester	Year
		Minimum	Maximum		
<b>6.0</b>	(B.E./ B.Tech. or Equivalent) in Engg./ Tech. with Multidisciplinary Minor	160	176	8	4
<b>6.0</b>	4-Years Bachelor's degree (B.E./ B.Tech. or Equivalent) in Engg./ Tech.- Honors and Multidisciplinary Minor	180	194	8	4
<b>6.0</b>	4-Years Bachelor's degree (B.E./ B.Tech. or Equivalent) in Engg./ Tech.- Honors with Research and Multidisciplinary Minor	180	194	8	4
<b>6.0</b>	4-Years Bachelor's degree (B.E./ B.Tech. or Equivalent) in Engg./ Tech.- Major Engg. Discipline with Double Minors (Multidisciplinary and Specialization Minors)	180	194	8	4

- There are multiple exit options at each level. Student will be given a specific Qualification mentioned in the table depending on the level at which he/she decides to have an exit. Ex. If a student decides to exit after completion of two years (level 5.0) of the program, he will be given a Diploma in Engineering with specific exit condition mentioned in the syllabus of the specific branch. He/she can rejoin the program with the multiple entry option at the level next where he/she

chose to exit previously. (Student can join at level 5.5 if successfully completed level 5.0 previously at the time of exit).

- Minimum credit requirements of each level are mentioned in the credit framework table.
- There are 4 distinct options available at level 6.0.
- First one is basic level 6.0 option where minimum 160-maximum 176 credits are mandatory which can be completed as per the Semester-wise Credit distribution structure mentioned in the table given below.

Here, the Bachelor's Engineering Degree in chosen Engg./ Tech. Discipline with multidisciplinary minor (min.160-max.176 Credits) i.e. **"B. Tech. in Mechanical Engineering with Minor in Computer Engineering"** (160-176 credits) enables students to take up five-six or required additional courses of 14 credits in the discipline other than Mechanical Engineering distributed over semesters III to VIII. Here in the case of **"B. Tech. in Mechanical Engineering with Minor in Computer Engineering"** (160-176 credits) student is supposed to take up 50% or more courses to complete the 50% or more credits (from assigned 14 credits) from **Computer Engineering minor bucket**. The remaining courses to complete the assigned 14 credits can be covered from other discipline's minor buckets.

- Remaining three level 6.0 options are the advanced options where the student is given an opportunity to get extra qualification by earning some extra credits (18-20 extra credits). These three options are given below:
- Level 6.0: The **Bachelor's Engineering Degree with Honours** in chosen Major Engg./ Tech. Discipline i.e. in Mechanical Engineering with Honours with Multidisciplinary Minor (180-194 credits) enables students of Mechanical Engineering to take up five-six additional courses of 18 to 20 credits in the Mechanical Engineering discipline distributed over semesters III to VIII. The decision regarding the mechanism of distribution of these 18-20 credits over semesters III to VIII, which are over and above the min.160-max. 176 Credits prescribed for the duration of four years will be taken by Academic Authorities of University. **Student must have CGPA equal to or greater than 7.5 at the end of second semester to go for this option.**
- Level 6.0: The **Bachelor's Engineering Degree with Research** in i.e. in Mechanical Engineering with Research with Multidisciplinary Minor (180-194 credits) enables students of Mechanical Engineering to take up a research project of 18 to 20 credits in the Mechanical Engineering discipline distributed over semesters VII to VIII. **Student must have CGPA equal to or greater than 7.5 at the end of sixth semester to go for this option.**
- Level 6.0: The **Bachelor's Engineering Degree in chosen Engg./ Tech. Discipline with Double Minor** (Multidisciplinary and Specialization Minor, 180-194 credits), i.e. **"B. Tech. in Mechanical Engineering with other selected discipline in Engineering (as MDM) with Specialization Minor in Computer Engineering"** (180-194 credits) enables students to take up five-six additional courses of 14 credits in the discipline other than Mechanical Engineering (for completion of multidisciplinary minor) and 18 to 20 extra credits in the **Computer Engineering discipline** distributed over semesters III to VIII. Here, the **other selected discipline in Engineering should be different from Specialization Minor i.e. Computer Engineering**. This enables students to take up

five-six or required additional courses of 18 to 20 credits in the **Computer Engineering** discipline distributed over semesters III to VIII, which are over and above the min.160-max.176 Credits. The decision regarding the mechanism of distribution of these 18-20 credits over semesters III to VIII, prescribed for the duration of four years will be taken by Academic Authorities of University. **Student must have CGPA equal to or greater than 7.5 at the end of second semester to go for this option.**

Students need to follow the Semester-wise Credit distribution structure for Four-year UG Engineering Program as prescribed above.

- There are seven vertical categories with specific credits distributed in specific semesters.
- Student can choose a Program Elective Course (PEC) in that specific semester from the given subjects.
- Multidisciplinary course (MDM) and Open Elective (OE) courses can be chosen from the MDM and OE Buckets depending on student's choice. Completion of total credits given in the last column of the table for each vertical is mandatory.
- Students can complete 40% of the courses through online platforms like NPTEL/SWAYAM. The NPTEL SWAYAM course content should be at least 80% similar to the course content in the syllabus.

### **General Rules and Regulations**

1. The normal duration of the course leading to B. Tech. degree will be EIGHT semesters.
2. The normal duration of the course leading to M. Tech. degree will be FOUR semesters.
3. Each academic year shall be divided into 2 semesters, each of 20 weeks duration, including evaluation and grade finalization, etc. The Academic Session in each semester shall provide for at least 90 Teaching Days. The semester that is typically from Mid-July to November is called the ODD SEMESTER, and the one that is from January to Mid-May is called the EVEN SEMESTER. Academic Session may be scheduled for the Summer Session/Semester as well. For the First year B. Tech. and M. Tech. the schedule will be decided as per the admission schedule declared by Government of Maharashtra.
4. The schedule of academic activities for a Semester, including the dates of registration, mid-semester examination, end-semester examination, inter-semester vacation, etc. shall be referred to as the Academic Calendar of the Semester, which shall be prepared by the Dean (Academic), and announced at least TWO weeks before the Closing Date of the previous Semester.
5. The Academic Calendar must be strictly adhered to, and all other activities including co-curricular and/or extra -curricular activities must be scheduled so as not to interfere with the Curricular Activities as stipulated in the Academic Calendar.

### **Registration:**

1. Lower and Upper Limits for Course Credits Registered in a Semester, by a Full- Time Student of a UG/PG Programme:  
A full-time student of a particular UG/PG programme shall register for the appropriate number of course credits in each semester/session that is within the minimum and maximum limits specific to

that UG/PG programme as stipulated in the specific Regulations pertaining to that UG/PG programme.

2. Mandatory Pre-Registration for higher semesters: In order to facilitate proper planning of the academic activities of a semester, it is essential for every institute to inform to Dean (Academics) and COE regarding details of total no. of electives offered (Course-wise) along with the number of students opted for the same. This information should be submitted within two weeks from the date of commencement of the semester as per academic calendar.
3. PhD students can register for any of PG/PhD courses and the corresponding rules of evaluation will apply.
4. Under Graduate students may be permitted to register for a few selected Post Graduate courses, in exceptionally rare circumstances, only if the DUGC/DPGC is convinced of the level of the academic achievement and the potential in a student.

### **Course Pre-Requisites:**

1. In order to register for some courses, it may be required either to have exposure in, or to have completed satisfactorily, or to have prior earned credits in, some specified courses.
2. Students who do not register on the day announced for the purpose may be permitted LATE REGISTRATION up to the notified day in academic calendar on payment of late fee.
3. REGISTRATION IN ABSENTIA will be allowed only in exceptional cases with the approval of the Dean (Academic) / Principal.
4. A student will be permitted to register in the next semester only if he fulfils the following conditions:
  - i) Satisfied all the Academic Requirements to continue with the programme of Studies without termination
  - ii) Cleared all Institute, Hostel and Library dues and fines (if any) of the previous semesters;
  - iii) Paid all required advance payments of the Institute and hostel for the current semester;
  - iv) Not been debarred from registering on any specific ground by the Institute.

### **Evaluation System:**

1. Absolute grading system based on absolute marks as indicated below will be implemented from academic year 2023-24, from the first year B. Tech.

Percentage of Marks	Letter Grade	Grade Point
91-100	EX	10.0
86-90	AA	9.0
81-85	AB	8.5
76-80	BB	8.0
71-75	BC	7.5
66-70	CC	7.0
61-65	CD	6.5

56-60	DD	6.0
51-55	DE	5.5
40-50	EE	5.0
<40	FF	0.0

2. Class is awarded based on CGPA of all eight semesters of B. Tech. Program.

CGPA	Class
5.00 to 5.49	Pass class
5.50 to 5.99	Second Class
6.00 to 7.49	First Class
7.5 and above	Distinction
[Percentage of Marks =(CGPA - 0.5)*10.0]	

3. A total of 100 Marks for each theory course are distributed as follows:

Mid Semester Exam (MSE) Marks	20
Continuous Assessment Marks	20
End Semester Examination (ESE) Marks	60

4. A total of 100 Marks for each practical course are distributed as follows:

1.	Continuous Assessment Marks	60
2.	End Semester Examination (ESE) Marks	40

- It is mandatory for every student of B. Tech to score a minimum of 40 marks out of 100, M. Tech to score a minimum of 45 marks out of 100 with a minimum of 20 marks out of 60 marks in End Semester Examination for theory course.
- This will be implemented from the first year of B. Tech starting from Academic Year 2023-24.

## 5. Description of Grades

EX Grade: An 'EX' grade stands for outstanding achievement.

EE Grade: The 'EE' grade stands for minimum passing grade.

The students may appear for the remedial examination for the subjects he/she failed for the current semester of admission only and his/her performance will be awarded with EE grade only.

FF Grade: The 'FF' grade denotes very poor performance, i.e. failure in a course due to poor performance.

## 6. Evaluation of Performance

### a. Semester Grade Point Average (SGPA)

The performance of a student in a semester is indicated by Semester Grade Point Average (SGPA) which is a weighted average of the grade points obtained in all the courses taken by the student in

the semester and scaled to a maximum of 10. (SGPA is to be calculated up to two decimal places). A Semester Grade Point Average (SGPA) will be computed for each semester as follows:

$$SGPA = \frac{[\sum_{i=1}^n c_i g_i]}{[\sum_{i=1}^n c_i]}$$

where,

‘n’ is the number of subjects for the semester,

‘c<sub>i</sub>’ is the number of credits allotted to a particular subject, and

‘g<sub>i</sub>’ is the grade-points awarded to the student for the subject based on his performance as per the above table.

SGPA will be rounded off to the second place of decimal and recorded as such.

#### **b. Cumulative Grade Point Average (CGPA):**

An up to date assessment of the overall performance of a student from the time he entered the Institute is obtained by calculating Cumulative Grade Point Average (CGPA) of a student. The CGPA is weighted average of the grade points obtained in all the courses registered by the student since s/he entered the Institute. CGPA is also calculated at the end of every semester (upto two decimal places). Starting from the first semester at the end of each semester (S); a Cumulative Grade Point Average (CGPA) will be computed as follows:

$$CGPA = \frac{[\sum_{i=1}^m c_i g_i]}{[\sum_{i=1}^m c_i]}$$

where,

‘m’ is the total number of subjects from the first semester onwards up to and including the semester S,

‘c<sub>i</sub>’ is the number of credits allotted to a particular subject, and

‘g<sub>i</sub>’ is the grade-points awarded to the student for the subject based on his/her performance as per the above table.

CGPA will be rounded off to the second place of decimal and recorded as such.

### **7. Attendance Requirements:**

- a. All students must attend every lecture, tutorial and practical classes.
- b. To account for approved leave of absence (e.g. representing the Institute in sports, games or athletics; placement activities; NCC/NSS activities; etc.) and/or any other such contingencies like medical emergencies, etc., the attendance requirement shall be a minimum of 75% of the classes actually conducted. If the student failed to maintain 75% attendance, he/she will be detained for appearing the successive examination. The Dean (Academics)/ Principal is permitted to give 10% concession for the genuine reasons as such the case may be. In any case

the student will not be permitted for appearing the examination if the attendance is less than 65%.

- c. The course instructor handling a course must finalize the attendance 3 calendar days before the last day of classes in the current semester and communicate clearly to the students by displaying prominently in the department and also in report writing to the head of the department concerned.
- d. The attendance records are to be maintained by the course instructor and he shall show it to the student, if and when required.

#### **8. Transfer of Credits:**

The courses credited elsewhere, in Indian or foreign University/Institutions/ Colleges/Swayam Courses by students during their study period at DBATU may count towards the credit requirements for the award of degree. The guidelines for such transfer of credits are as follows:

- a. 20 % of the total credit will be considered for respective calculations.
- b. Credits transferred will be considered for overall credits requirements of the programme.
- c. Credits transfer can be considered only for the course at same level i.e. UG, PG etc.
- d. A student must provide all details (original or attested authentic copies) such as course contents, number of contact hours, course instructor /project guide and evaluation system for the course for which he is requesting a credits transfer. He shall also provide the approval or acceptance letter from the other side. These details will be evaluated by the concerned Board of Studies before giving approval. The Board of Studies will then decide the number of equivalent credits the student will get for such course(s) in DBATU. The complete details will then be forwarded to Dean for approval.
- e. A student has to get minimum passing grades/ marks for such courses for which the credits transfers are to be made.
- f. Credits transfers availed by a student shall be properly recorded on academic record(s) of the student.
- g. In exceptional cases, the students may opt for higher credits than the prescribed.

**Exit Option-II:** Qualifier for UG Diploma

Broad areas of Training: (1) CNC Programming-II (2) AutoCAD Drafting of Mechanical Components etc.

- To be completed during vacation after Second Year in the industry/institute.
- This should contain the well-defined project activity which is equivalent to 10 Credits.
- It should be carried out for the duration of 08 Weeks.
- The project/training should be evaluated by a panel of examiners.

Definition – conditions for existence ; Transforms of elementary functions ; Properties of Laplace transforms - Linearity property, first shifting property, second shifting property, transforms of functions multiplied by  $tn$ , scale change property, transforms of functions divided by  $t$ , transforms of integral of functions, transforms of derivatives ; Evaluation of integrals by using Laplace transform; Transforms of some special functions- periodic function, Heaviside-unit step function, Dirac delta function.

**Unit 2: Inverse Laplace Transform**

Introductory remarks; Inverse transforms of some elementary functions; General methods of finding inverse transforms; Partial fraction method and Convolution Theorem for finding inverse Laplace transforms; Applications to find the solutions of linear differential equations and simultaneous linear differential equations with constant coefficients.

**Unit 3: Fourier Transform**

Definitions – integral transforms; Fourier integral theorem (without proof); Fourier sine and cosine integrals; Complex form of Fourier integrals; Fourier sine and cosine transforms; Properties of Fourier transforms; Parseval's identity for Fourier Transforms.

#### **Unit 4: Partial Differential Equations and Their Applications**

Formation of Partial differential equations by eliminating arbitrary constants and functions; heat Equations solvable by direct integration; Linear equations of first order (Lagrange's linear equations); Method of separation of variables – applications to find solutions of one dimensional flow equation  $\left(i.e. \frac{\partial u}{\partial t} = c^2 \frac{\partial^2 u}{\partial x^2}\right)$  and one dimensional wave equation  $i.e. \frac{\partial^2 y}{\partial t^2} = c^2 \frac{\partial^2 y}{\partial x^2}$

#### **Unit 5: Functions of Complex Variables**

Analytic functions; Cauchy- Riemann equations in Cartesian and polar forms; Harmonic functions in Cartesian form; Cauchy's integral theorem; Cauchy's integral formula; Residues; Cauchy's residue theorem (All theorems without proofs).

**Course Contents**

**Unit 1: Structure of Materials**

**Crystal Structures:** Atomic arrangement: crystalline vs. amorphous materials; unit cell, space lattice, 14 Bravais lattices, lattice parameters, 7 crystal systems; BCC, FCC, and HCP structures: Basic Characteristics: average number of atoms per unit cell, Coordination number, atomic packing factor; Indexing of lattice planes: finding Miller indices of a given plane, drawing a plane with given Miller indices, inter-planar spacing for cubic systems, angle between planes, indexing for hexagonal system; Indexing of lattice directions, importance, procedure, finding Miller indices of a given direction, drawing a direction with given Miller indices, angle between directions; crystallographic directions for hexagonal system: conversion of 3-parameter Miller indices into 4-parameter Miller-Bravais indices.

**Crystal Imperfections:** Importance, Classification: Point defects: vacancy, interstitials, impurities, Frenkel, Schottky defects, Line defects: definition, types, edge, screw, mixed dislocations, characteristics of each type, planar defects: external surfaces, grain boundaries: high and low angle, tilt and twist boundaries; twin boundaries, stacking faults: intrinsic, extrinsic; Volume defects: examples.

**Unit 2: Plastic Deformation and Mechanical Properties**

**Mechanism of plastic deformation:** Slip: slip direction, slip plane, slip systems for cubic structures, Mechanism of slip: movement of dislocations; Twinning: twin direction and plane; types: deformation and annealing twinning; slip vs twinning; Deformation of single crystal by slip: Schmid's law, calculation of critical resolved shear stress, sliding and rotation of slip planes; Strain hardening: mechanism, Frank-Read source; Plastic deformation of polycrystalline materials: piling up of dislocations, effect of grain size on stress-strain curve, preferred orientation of slip systems

**Mechanical Properties and their Testing:** Tension test, Engineering stress-strain curves, True stress-

strain curves, true strain, relationship between engineering and true stress – strain, corrected and uncorrected true stress-strain curves, Evaluation of properties: proportional stress, elastic limit, ultimate tensile strength, breaking or fracture stress, yield stress, proof stress, resilience, toughness, stiffness, ductility, Compression test: Introduction, sources of error, types of fracture, Poisson's ratio, Formability: Importance, Erichsen test; hardness testing, different hardness tests: Brinell, Rockwell and Vickers tests; Impact tests: Charpy and Izod.

Non-destructive testing: Introduction, dye penetrant test, magnetic particle inspection, ultrasonic test, and eddy current test.

### **Unit 3: Equilibrium Diagrams**

Introduction: Importance, Definitions of terms, Hume-Rothery rules of solid-solubility, Gibb's phase rule, solidification of a pure metal, types of cooling curves for pure metals and binary solid solutions, plotting of equilibrium diagrams, Lever rule, Iron-iron carbide equilibrium diagram, phases present, different transformations, critical temperatures, non-equilibrium cooling of steels, property variation with microstructures, classification and applications of steels, specification of steels (as per Indian, American and British standards), transformation products of austenite: pearlite, bainite and martensite, TTT diagrams: determination, effect of carbon, critical cooling rate, CCT diagram: determination of CCT curves.

### **Unit 4: Heat Treatment**

Introduction, Heat treatment of steels, Objectives/purposes, Heating: media, soaking; cooling: media, polymer quenching, mechanism of heat removal, Annealing processes: full annealing: purposes, process details and mechanism; isothermal annealing, spheroidize annealing, sub-critical annealing: types; Normalizing: comparison with annealing, Hardening: purpose, types, Tempering: purposes, process details and types; hardenability: Jominy end quench test, Jominy curves for different materials

**Surface hardening processes:** Carburizing: solid, gas, and liquid carburizing; Nitriding: mechanism, white layer, advantages and limitations; Carbo-nitriding: process details; Flame hardening: various methods; Induction hardening: principle, types, advantages and drawbacks.

### **Unit 5: Metallography**

Introduction: Definition, importance; Microscopy: Specimen preparation: Procedure, Metallographic polishing abrasives, Metallographic polishing clothes; Mounting of specimens; Etching: Mechanism for single- and two-phase alloys, procedure and reagents; Optical metallurgical microscope: Principle of working, construction, important terms.

Macroscopy: Procedure and methods; Macro tests: Sulphur printing, flow lines observation, Examination of fractures: fatigue, tensile, fibrous; Spark test.

## Course Contents

### Unit 1: Fundamental Concepts and Definitions

Thermodynamic system and its type; Macroscopic vs. Microscopic viewpoint, properties, processes and cycles, point function, path function. Thermodynamic equilibrium, Quasi-static process.

Work and heat Transfer: Work transferred and other types of work, Heat transfer, temperature and its measurement (principle of measurement, various instruments etc.). Zeroth law of thermodynamics, specific heat and latent heat, relationship between CP and CV.

### Unit 2: First Law of Thermodynamics

First law of thermodynamics for a closed system undergoing a cycle and change of state, Energy, different forms of energy, Enthalpy, PMM-I control volume. Application of first law of steady flow processes (nozzle, turbine, compressor, pump, boiler, throttle valve etc.)

### Unit 3: Second Law of Thermodynamics

Limitation of first law of thermodynamics, cycle heat engine, refrigerator and heat pump, Kelvin- Planck and Clausius statements and their equivalence, Reversibility and Irreversibility, Carnot cycle, Carnot theorem, Absolute thermodynamic temperature scale.

Entropy: Introduction, Clausius theorem, T-s plot, Clausius inequality, Entropy and Irreversibility, Entropy principle and its application, combined First and Second laws, Entropy and direction, Entropy and disorder.

#### **Unit 4: Ideal gas**

Availability and un-availability, Second law efficiency, Availability balance, Measure of irreversibility, Applications in thermal systems, Calculations of maximum available energy and second law efficiency. Boyle's law, Charl's law, Avogadro's law, universal gas constant, ideal processes with question, other equation of states.

#### **Unit 5: Properties of Pure Substance**

Phase change phenomenon of pure substance, phase diagram of pure substance, p-v, T-s, and h-s diagrams properties of steam, critical point parameters, triple point, property table, representation of processes of steam on p-v, T-s, and other diagrams, Dryness fraction and its measurement.

**Course Outcomes:** At the end of the course, students will be able to:

CO1	Interpret the object with the help of given sectional and orthographic views.
CO2	Construct the curve of intersection of two solids
CO3	Draw machine element using keys, cotter, knuckle, bolted and welded joint
CO4	Assemble details of any given part. i. e. valve, pump, machine tool part etc.
CO5	Understand various creating and editing commands in Auto Cad

### Course Contents

#### Unit 1: Sectional Views

Full section, half section, partial section, off-set section, revolved sections, removed sections, auxiliary section, guidelines for hatching, examples on all above types of sections of machine elements.

#### Unit 2: Study of Machine Elements

Study of simple machine elements and components such as screwed fasteners, shaft couplings, pipe joints, riveted and welded joints, bearings, gears, etc.

#### Unit 3: Interpenetration of Surfaces (Emphasis on Applied Cases)

Line or curve of intersection of two penetrating cylinders, Cone and cylinder, prism and a cylinder, cone and prism, Forged ends, etc.

#### Unit 4: Drawing of Assembly and Details

Part drawing of standard machine components such as valves, components of various machine tools, pumps, shaft couplings, joints, pipe fittings, engine parts, etc.

Production drawings and reading of blue prints, size and shape description, limits, fits and tolerances, surface roughness and surface roughness symbols

#### Unit 5: Computer Aided Drafting

Introduction to Computer Aided Design and Drafting, Advantages of CADD, study of preliminary Auto CAD commands like drawing, dimensioning, viewing commands. Drawing 3D views in Auto CAD.

**Course Contents**

**Unit 1: Solar Energy**

Energy resources, Estimation of energy reserves in India, Current status of energy conversion Spectral distribution, Solar geometry, Attenuation of solar radiation in Earth's atmosphere, Measurement of solar radiation, Properties of opaque and transparent surfaces.

**Unit 2: Solar Collectors**

**Flat Plate Solar Collectors:** Construction of collector, material, selection criteria for flat plate collectors, testing of collectors, Limitation of flat plate collectors, Introduction to ETC.

**Concentrating type collectors:** Types of concentrators, advantages, paraboloid, parabolic trough, Heliostat concentrator, Selection of various materials used in concentrating systems, tracking.

**Unit 3: Solar Energy Applications**

Air/Water heating, Space heating/cooling, solar drying, and solar still, Photo-voltaic conversion.

**Unit 4: Wind Energy and Biomass**

Introduction to wind energy, Types of wind mills, Wind power availability, and wind power development in India. Evaluation of sites for bio-conversion and Introduction to biomass resources, Location of plants, Biomass conversion process.

**Unit 5: Other Renewable Energy Sources**

Tidal, Geo-thermal, OTEC, hydro-electric, Nuclear energy

**Unit 1: Introduction**

Definition, history, need and scope for automation, Industrial Automation vs. Industrial Information Technology, Role of automation in industry, Economy of Scale and Economy of Scope, Types of production systems, Types of Automation Systems, Automation Strategies, Components of an industrial automation system, Effects of industrial automation on people, society and environment.

**Unit 2: Architecture of Automation Systems**

The Functional Elements of Industrial Automation, Sensing and Actuation Elements, Industrial Sensors and Instrument Systems, the Architecture of Elements: The Automation Pyramid.

**Unit 3: Actuation and Control systems**

Fundamentals of pneumatics and Hydraulics, Industrial Actuator Systems, Industrial Control Systems, Continuous Control, Sequence / Logic Control, Supervisory Control, Production Control.

**Unit 4: Introduction to Process Control**

Introduction, Characteristics of a Process, General Modeling Principles, Mathematical Modeling procedure, some modelling examples. Feedback and feed forward control.

**Unit 5: Advanced Automation systems & Tools**

IOT, Expert system, PLC Scada, Artificial Intelligence, Machine learning, machine vision.

**Unit 1: Introduction to Engineering Product Design**

Trigger for Product/Process/System, Problem solving approach for Product Design, disassembling existing product(s) and understanding relationship of components with each other, identifying materials and their processing for final product, fitting of components, understanding manufacturing as scale of the components, Reverse engineering concept,

**Unit 2: Ideation & Conceptualization**

Generation of ideas, funneling of ideas, short-listing of ideas for product(s) as an individual or group of individuals, Market research for need, competitions, Product architecture, designing of components, Drawing of parts and synthesis of a product from its component parts, 3-D visualization,

**Unit 3: Testing and Evaluation Prototyping:**

Design Automation, Prototype testing and evaluation, working in multidisciplinary teams, Feedback to design processes, Process safety and materials, Health and hazard of process operations.

**Unit 4: Manufacturing**

Design models and digital tools, Decision models, Prepare documents for manufacturing in standard format, Materials and safety data sheet, Final Product specifications sheet, Detail Engineering Drawings (CAD/CAM programming), Manufacturing for scale, Design/identification of manufacturing processes

**Unit 5: Environmental Concerns**

Product life-cycle management, Recycling and reuse of products, Disposal of product and waste. Case studies.

**Course Title: Constitution of India**

Teaching Scheme	Examination Scheme
Lecture: 2 hrs./ week Audit Course	Continuous Assessment: 50 Marks

**Course Objectives:**

1. To acquaint the students with legacies of constitutional development in India and help them to understand the most diversified legal document of India and philosophy behind it.
2. To make students aware of the theoretical and functional aspects of the Indian Parliamentary System.
3. To channelize students' thinking towards basic understanding of the legal concepts and its implications for engineers.
4. To acquaint students with latest intellectual property rights and innovation environment with related regulatory framework.
5. To make students learn about role of engineering in business organizations and e-governance.

**Course Outcomes:** At the end of the course, students will be able to:

<b>CO1</b>	Identify and explore the basic features and modalities about Indian constitution.
<b>CO2</b>	Differentiate and relate the functioning of Indian parliamentary system at the center and state level.
<b>CO3</b>	Differentiate different aspects of Indian Legal System and its related bodies.
<b>CO4</b>	Discover and apply different laws and regulations related to engineering practices.
<b>CO5</b>	Correlate role of engineers with different organizations and governance models

Meaning of the constitution law and constitutionalism, Historical Background of the Constituent Assembly, Government of India Act of 1935 and Indian Independence Act of 1947, Enforcement of the Constitution, Indian Constitution and its Salient Features, The Preamble of the Constitution, Fundamental Rights, Fundamental Duties, Directive Principles of State Policy, Parliamentary System, Federal System, Centre-State Relations, Amendment of the Constitutional Powers and Procedure, The historical perspectives of the constitutional amendments in India, Emergency Provisions: National Emergency, President Rule, Financial Emergency, and Local Self Government – Constitutional Scheme in India

**Unit 2: Union Executive and State Executive:**

Powers of Indian Parliament Functions of Rajya Sabha, Functions of Lok Sabha, Powers and Functions of the President, Comparison of powers of Indian President with the United States, Powers and Functions of the Prime Minister, Judiciary – The Independence of the Supreme Court, Appointment of Judges, Judicial Review, Public Interest Litigation, Judicial Activism, LokPal, Lok Ayukta, The Lokpal and Lok ayuktas Act 2013, State Executives – Powers and Functions of the Governor, Powers and Functions of the Chief Minister, Functions of State Cabinet, Functions of State Legislature, Functions of High Court and Subordinate Courts.

**Unit 3: Introduction and Basic Information about Legal System:**

The Legal System: Sources of Law and the Court Structure: Enacted law -Acts of Parliament are of primary legislation, Common Law or Case law, Principles taken from decisions of judges constitute binding legal rules. The Court System in India and Foreign Courtiers (District Court, District Consumer Forum, Tribunals, High Courts, Supreme Court). Arbitration: As an alternative to resolving disputes in the normal courts, parties who are in dispute can agree that this will instead be referred to arbitration. Contract law, Tort, Law at workplace.

**Unit 4: Intellectual Property Laws and Regulation to Information:**

Intellectual Property Laws- Introduction, Legal Aspects of Patents, Filing of Patent Applications, Rights from Patents, Infringement of Patents, Copyright and its Ownership, Infringement of Copyright, Civil Remedies for Infringement, Regulation to Information- Introduction, Right to Information Act, 2005, Information Technology Act, 2000, Electronic Governance, Secure Electronic Records and Digital Signatures, Digital Signature Certificates, Cyber Regulations Appellate Tribunal, Offences, Limitations of the Information Technology Act.

**Unit 5: Business Organizations and E-Governance:**

Sole Traders, Partnerships: Companies: The Company's Act: Introduction, Formation of a Company, Memorandum of Association, Articles of Association, Prospectus, Shares, Directors, General Meetings and Proceedings, Auditor, Winding up. E-Governance and role of engineers in E-Governance, Need for reformed engineering serving at the Union and State level, Role of I.T. professionals in Judiciary, Problem of Alienation and Secessionism in few states creating hurdles in Industrial development.

**Unit 1: Introduction**

Introduction to the socio-political context of Ambedkar's era, British Colonialism, Indian National Movement, Caste Hierarchy, Untouchability, Social Reform Movements, Role in the Indian freedom struggle

**Unit 2: The Contribution of Dr. Babasaheb Ambedkar**

Contributions to the Constitution of India, Vision for social justice and empowerment

**Unit 3 Legacy and relevance today**

Dr. Ambedkar and Marxism: An Exploration of His Thoughts on Marxism, Common ground with Marxism, Focus on class struggle, Caste vs Caste, Primacy of Caste in Indian Society, Economic ideas and policies

Practical Scheme	Examination Scheme
Practical: 2 hrs./ batch Credit: 01	Continuous Assessment: 60 Marks Practical/Oral Exam: 40 Marks

**Course Outcomes:**

<b>CO1</b>	Measure hardness of given material using Brinell Hardness test
<b>CO2</b>	Measure hardness of given material using Rockwell Hardness test
<b>CO3</b>	Evaluate stretchability of given sheet metal samples of different thicknesses using Erichsen Cupping Test
<b>CO4</b>	Prepare specimen for observing the microstructure of the material
<b>CO5</b>	Sort out plain carbon steel samples based on their carbon percentages using spark test
<b>CO6</b>	Understand and draw the microstructures of plain carbon steels of varying carbon percentage
<b>CO7</b>	Understand and draw the microstructures of heat-treated steels
<b>CO8</b>	Demonstrate the use of Non-destructive test

Practical Scheme	Examination Scheme
Practical: 4 hrs./batch Credits: 02	Continuous Assessment: 60 Marks Practical/Oral Exam: 40 Marks

**Course Outcomes:** At the end of the course, students will be able to:

CO1	Draw Conventional representation of standard machine components, welds, materials etc.
CO2	Draw sectional view of a given machine component.
CO3	Develop Assemble view from details of given component i.e. valve, pump, machine tool part, etc
CO4	Combine details of given machine component and draw assembled view
CO5	Use various Auto-Cad commands to draw orthographic projection

## Course Contents

### Unit 1: Introduction and Casting Processes

Definition of manufacturing, Selection of manufacturing processes, Introduction to casting; solidification of metals: Pure metals, Alloys; fluid flow; fluidity of molten metal; heat transfer: Solidification time, Shrinkage; defects: Porosity; Metal casting processes: Introduction; sand casting, shell molding, investment casting; Permanent-mold casting, vacuum casting, die casting, centrifugal casting.

### Unit 2: Metal Forming

**Rolling and Forging Processes:** Introduction to Rolling; Flat-rolling Process: Roll Force, Torque, and Power Requirements, Geometric Considerations; Flat-rolling Practice: Defects in Rolled Plates and Sheets; Rolling Mills; Various Rolling Processes and Mills.

Introduction to forging, Open-die forging; Impression-die and Closed-die forging; various forging Operations; Forging Defects; Forging Machines.

**Extrusion and Drawing:** Introduction; Extrusion Process; Hot Extrusion; Cold Extrusion: Impact extrusion, Hydrostatic Extrusion; Extrusion Defects; Extrusion Equipment; Drawing Process; Drawing Practice; Drawing Defects and Residual Stresses; Drawing Equipment.

**Unit 3: Joining Processes**

Oxy-fuel-gas Welding; Arc-Welding Processes: Non-consumable Electrode; Arc-welding Processes: Consumable Electrode, Shielded Metal-arc Welding, Submerged-arc Welding, Gas Metal-arc Welding; Electrodes for Arc Welding; The Weld joint, Quality, and Testing: Weld Quality, Weldability, Testing of Welds.

Introduction to solid state welding, Friction Welding, Resistance Welding: Spot, Seam, Projection Welding. Introduction to brazing and soldering.

**Unit 4: Machining Processes: Turning and Hole Making**

Introduction; The Turning Process; Lathes and Lathe Operations: Lathe Components, Work holding Devices and Accessories, Lathe Operations, Types of Lathes. Types of chips, Boring and Boring Machines; Drilling Machines: Drills, Drill Materials and Sizes, Drilling Practice, Drilling Machines, Reaming operation and Reamers; Tapping and Taps.

**Unit 5: Machining Processes: Milling, Broaching and Gear Manufacturing**

Introduction, Milling and Milling Machines: Peripheral Milling, Face Milling, End Milling, Other Milling Operations and Milling Cutters, Tool holders, Milling Process Capabilities, Milling Machines; Planning and Shaping; Broaching and Broaching Machines; Gear Manufacturing by Machining: Form Cutting, Gear Generating, Cutting Bevel Gears, Gear-finishing Processes.

**Course Contents**

**Unit 1: Fluid Properties and Fluid Statics:**

**Fluid Properties:** Definition of fluid, Fluid as a continuum, Properties of fluid, Viscosity, Types of fluid, Compressibility, Surface tension, Capillarity and vapor pressure.

**Fluid Statics:** Pascal's law, Hydrostatic law of pressure, Total Pressure, Centre of Pressure, Buoyancy, Meta center, Condition of Equilibrium of floating and submerged bodies (No Numerical Treatment on fluid Statics)

**Unit 2: Fluid Kinematics and Dynamics**

**Fluid Kinematics:** Eulerian and Lagrangian approach of fluid flow, Types of flow, Definition of steady, Unsteady, Uniform, Non uniform, Laminar, Turbulent, Compressible, incompressible, rotational, Irrotational flow, 1D-2D flows, Stream line, Streak line, Path line, concept of Velocity, potential & stream function flow net (no numerical treatment), Continuity equation for steady, Unsteady, Uniform, non-uniform, Compressible, incompressible.

**Fluid Dynamics:** Euler's equation, Bernoulli's equation along a streamline for incompressible flow, Practical applications of Bernoulli's equation - Pitot tube, Venturi meter, Orifice meter.

### **Unit 3: Laminar Flow and Turbulent Flow**

**Laminar Flow:** Introduction to flow of viscous fluid through circular pipes, two parallel plates derivation and numerical.

**Turbulent Flow:** Major and minor losses. Loss of energy due to friction (Darcy's and Chezy's equation). Minor energy losses in transition, expansion and contraction. Concept of HGL and TEL, flow through syphon, flow through pipes in series or compound pipes, equivalent pipe, parallel pipes, branched pipes, Power transmission through pipes. Moody's Diagram.

### **Unit 4: Forces on Immersed Bodies and Boundary Layer Theory**

**Forces on Immersed Bodies:** Lift and Drag, Drag on a flat plate and on aerofoil. Types of drags, Development of lift. (Magnus effect) stalling condition of aerofoil.

**Boundary Layer Theory:** Boundary layer thickness, its characteristics, laminar and turbulent boundary layers, separation, boundary layer control.

### **Unit 5: Dimensional analysis**

Introduction to dimensional analysis, dimensional homogeneity, methods of dimensional analysis-Rayleigh's method, Buckingham's  $\pi$ -theorem, dimensionless numbers. (No numerical treatment)

## Course Contents

### Unit 1: Simple Stresses and Strains

Mechanical properties of materials, analysis of internal forces, simple stresses and strains, stress strain curve, Hooke's law, modulus of elasticity, shearing, thermal stress, Hoop stress, Poisson's ratio, volumetric stress, bulk modulus, shear modulus, relationship between elastic constants. Principal Stresses and Strains, Uni-axial stress, simple shear, general state of stress for 2-D element, ellipse of stress, principal stresses and principal planes, principal strains, shear strains, strain rosettes.

### Unit 2: Strain Energy, Resilience and Combined Stresses

Strain energy, resilience: Load-deflection diagram, strain energy, proof resilience, stresses due to gradual, sudden and impact loadings, shear resilience, Combined axial and flexural loads, middle third rule, kernel of a section, eccentrically applied load. Columns and Struts: Concept of short and long Columns, Euler and Rankine's formulae, limitation of Euler's formula, equivalent length, eccentrically loaded short compression members.

### Unit 3: Stresses in Beams

Moment of inertia of different sections, bending and shearing stresses in a beam, theory of simple bending, derivation of flexural formula, economic sections, horizontal and vertical shear stress, distribution shear stress

for different geometrical sections-rectangular, solid circular, I-section, other sections design for flexure and shear. Torsion: Introduction and assumptions, derivation of torsion formula, torsion of circular shafts, stresses and deformation indeterminate solid/homogeneous/composite shafts, torsional strain energy.

#### **Unit 4: Shear Force and Bending Moment Diagram**

Introduction to different types of beams, different types of supports & loads. Concept and definition of shear force and bending moment in determinant beams due to concentrated loads, UDL, UVL and couple. Relation between SF, BM and intensity of loading, construction of shear force and bending moment diagram for cantilever, simple and compound beams, defining critical and maximum value and position of point of contra flexure. Construction of BMD and load diagram from SFD, Construction of load diagram and SFD from BMD.

#### **Unit 5. Deflection of Beams**

Differential equation of deflected beam, slope and deflection at a point, calculations of deflection for determinate beams by double integration, Macaulay's method, theorem of area moment method (Mohr's theorems), moment diagram by parts, deflection of cantilever beams, deflection in simple supported beams, mid-span deflection, conjugate beam method, deflection by method of superposition.

**Unit 1: Introduction to Entrepreneurship**

Entrepreneur: Meaning of entrepreneurship – Types of Entrepreneurship – Traits of entrepreneurship – Factors promoting entrepreneurship- Barriers to entrepreneurship- the entrepreneurial culture- Stages in entrepreneurial process – Women entrepreneurship and economic development- SHG.

**Unit 2: Developing Successful Business Ideas**

Recognizing opportunities – trend analysis – generating ideas – Brainstorming, Focus Groups, Surveys, Customer advisory boards, Day in the life research – Encouraging focal point for ideas and creativity at a firm level-Protecting idea from being lost or stolen – Patents and IPR.

**Unit 3: Opportunity Identification and Evaluation**

Opportunity identification and product/service selection – Generation and screening the project ideas – Market analysis, Technical analysis, Cost benefit analysis and network analysis- Project formulation – Assessment of project feasibility- Dealing with basic and initial problems of setting up of Enterprises.

**Unit 4: Business Planning Process**

Meaning of business plan- Business plan process- Advantages of business planning- preparing a model project report for starting a new venture (Team-based project work).

## **Unit 5: Funding**

Sources of Finance- Venture capital- Venture capital process- Business angles- Commercial banks- Government Grants and Schemes.

### Unit 1: Introduction to Python Programming

Introduction to the Python Programming Language, Working with Python, Numeric Data Types, String Data Type and Operations, Standard Data Types, Data Type Conversions, Commenting in Python, Understanding Python Variables, Multiple Variable Declarations, Python Basic Statements, Python Basic Operators, Precedence of Operators, Expressions

### Unit 2: Control Flow and Loops

Conditional Statements, If statements and its variations, Loops in Python, If While Loop, for loop, Loop Manipulation, Break and Continue statements

### Unit 3: Functions

Defining functions, calling functions, passing parameters and arguments, Python function arguments, anonymous functions (Lambda functions), fruitful functions (function returning values), scope of variables in a function, powerful lambda functions in Python

### Unit 4: I/O and Error Handling in Python

Introduction to I/O (Input/Output), Writing Data to a File, Reading Data from a File, Additional File Methods, Introduction to Errors and Exceptions, Handling I/O Exceptions, Runtime Errors and Handling Multiple Exceptions

## **Unit 5: Classes in Python**

Applications of classes, Creating classes in Python, Instance methods, inheritance, exemption classes and custom exemptions

### **Computer Programming Practice**

Overview of programming language, Development of at least one computer program based on each unit.

- Understanding Value Education
- Self-exploration as the Process for Value Education
- Continuous Happiness and Prosperity – the Basic Human Aspirations
- Right Understanding, Relationship and Physical Facility
- Happiness and Prosperity – Current Scenario
- Method to Fulfill the Basic Human Aspirations

**Unit 2: Harmony in the Human Being**

- Understanding Human being as the Co-existence of the Self and the Body
- Distinguishing between the Needs of the Self and the Body
- The Body as an Instrument of the Self
- Understanding Harmony in the Self
- Harmony of the Self with the Body
- Programme to Ensure self-regulation and Health.

### **Unit 3: Harmony in the Family and Society**

- Harmony in the Family – the Basic Unit of Human Interaction
