<b>CRITERION 01</b>	<b>Vision, Mission and Program Educational Objectives</b>	<b>60</b>
-------------------------	---	-----------

**1. VISION, MISSION AND PROGRAM EDUCATIONAL OBJECTIVES (60)****1.1. State the Vision and Mission of the Department and Institute (05)****A. Availability of the Vision and Mission statements of the department****VISION of Institute**

To be an institute of excellence, developing skilled engineers to serve the industry and society.

**MISSION of Institute**

M1: To provide quality education through effective teaching learning process.

M2: To develop professional skills and promote innovation among students by providing conducive atmosphere.

M3: To inculcate ethical values, respect for the environment & social responsibility.

**VISION of Department**

To emerge as a prominent computer science & engineering center to produce quality professionals to meet industrial and social needs.

**MISSION of Department**

1. To produce IT professionals with intellectual ability by imparting quality education.

2. To induce competency among the students by engaging them in requisite skills & aptitude.
3. To develop consciousness of societal & ethical needs in the field of computer science & engineering.

## **B. Appropriateness/ Relevance of the statements.**

### **Institute**

- To be an institute of excellence, developing skilled engineers to serve the industry and society.

Institute communicating its purpose to stakeholders through key-term excellence and also informing development through strategy. The goals and objectives are involved to quantify the success of the institute. Excellence in the field of engineering education system towards greater cause of society through the implementation of projects for solve the society related problems and commitment to readiness of industry oriented skill to serve in industry as a professional engineer by including the expert lecture series through industrial experts and internships.

- To provide quality education through effective teaching learning process.

Through the use of ICT tools and project-based learning, we aim to provide high-quality education to students. Through the use of innovative teaching methods, we have been able to create a variety of learning experiences through industrial experts, real world & inquiry based learning.

- To develop professional skills & promote innovation among students by providing conducive atmosphere.

The institute inculcates the technical skills & soft skills among the students by conducive atmosphere through project competition, innovative ideas in “AVISHKAR”, patent filing, registration for NPTEL, conduction of soft skill sessions through experts, executing training and placement activities, internships etc.

- To inculcate ethical values, respect for environment and social responsibility.

The institute has organized the session on ethical values to describe ethical values at workplace such as obeying the institute rules and regulations, effective communication, taking responsibility, professionalism, trust and mutual respect. The institute has also been organized & participated in environmental and social related activities including tree plantation, cleanliness camp, geo-tagging, no vehicle day etc and blood donation, mask and tablet donation, dustbin distribution, vaccination camp, self-defense camp etc.

### **Department**

- To emerge as a prominent computer science & engineering center to produce quality professionals to meet industrial & social needs.

The main aim of Department is to provide quality education through fulfillment of industrial requirements through technical skill and identify the society related problems through problem statement and problem solution through technical means. The department is interested to contribute professional engineers with commitment to readiness of industry oriented skill through potential research.

- To produce IT Professionals with intellectual ability by imparting quality education.

A lot of efforts has been taken by department to enhance the intellectual ability of students as a IT professional through quality education by incorporating the industrial expert sessions, industrial visits, internships, domain wise expertize, innovations through Avishkar, training and placement activities through soft skill including aptitude test, group discussion etc.

- To induce competency among the students by engaging them in requisite skills & aptitude.

There are various expert sessions has been conducted in the department to develop the technical skill. The internships & industrial visits are the keys to upgrade the industry oriented skills in the students. The sessions on aptitude, group discussion etc under the soft skill has been conducted to induce the holistic development of the students.

- To develop consciousness of societal and ethical needs in the field of computer science & engineering

The department is inculcating the awareness among the students regarding societal and ethical needs in the field of computer science and engineering. The *Ethical perspectives encourage individuals to act morally, balancing the demands of society with the needs of an individual*. The class activity refers to work completed in small groups that involves analyzing different professional ethical dilemmas that are related to the context

described and apply the knowledge of machine learning, artificial intelligence etc in society based applications through ethics.

### **C. Consistency of the department statements with the institute statements**

#### **Vision**

The departmental vision is consistent with institute vision as department has recognized to contribute quality professional engineers with commitment to provide industry ready skills in the students and identified the problem statement related to society. The problem solutions by applying innovative methodology with industrial skill for society relate problems.

#### **Mission**

M1 is consistent with institute mission as advanced teaching learning methodologies lead to imparting high academic excellence with quality education. The intellectual ability has been developed through innovative teaching methods through ICT and project based learning, real world learning, inquiry based learning.

M2 is in-line with institute mission as institute has provided the conducive atmosphere for professional skills including technical skill, soft skills and innovations through emerging technologies with requisite skills.

M3 is consistent with institute mission to build student community with high ethical standards through techno-social activities and consciousness of environment through various activities.

**Consistency Matrix**

	<b>Institute</b>	<b>Department</b>

**1.2. State the Program Educational Objectives (PEOs)****(05)**

The Program Educational Objectives of Computer Science & Engineering program is listed below:

PEO 1: The graduate will be able to analyse and solve industry problems by applying basics of mathematics and algorithms.

PEO 2: The graduate will be able to develop solutions using modern engineering tools and techniques to solve real life problems.

PEO 3: The graduate will become ethical professionals in IT industries contributing to societal progress and respect environment.

**The program's educational objectives are designed to include five core values: Professionalism, Core competency, society & environment, Industrial skills, and breadth of knowledge. The contexts of PEO's are as below.**

**PEO1:** Superscribes the importance of mathematics to analyze the industry related problems and problems solution by applying the various algorithms that has studied in regular curriculum. It also emphasizes fundamental competencies and collaborative abilities. PEO1 is made up of four main components: core competency, individual & team work, employability, and team work.

**PEO2:** To be a T-shaped engineer with social concern, PEO2 stresses the graduate's capacity to apply knowledge across multiple settings in the long run and possess in-depth functional and disciplinary abilities to solve daily life problems in society through modern engineering tools and emerging technologies. Diversified professionalism, Environment and Society, Interpersonal skills, investigations, analysis and solutions are the essential factors that contribute to PEO2.

**PEO3:** Exhibits the characteristics of a graduate who is interested in ethical professionals for contribution in societal progress and respect environment. The graduates uses various areas of computing to develop sustainable solutions in the various areas including energy, agriculture, transportation, environmental justice, and forecasting. Data science and software engineering are some of the areas that utilize to develop these sustainable solutions. PEO3 is made up of

three main components: core competency, societal progress, and environment and sustainability.

### 1.3. Indicate where the Vision, Mission and PEOs are published and disseminated among Stakeholders (10)

#### 1.3 A: Publication and dissemination of Vision, Mission and PEOs

The department takes extensive efforts to publish and disseminate vision, mission of the department and PEOs of the program to all internal and external stake holders through various media such as digital, print through student progress record, vinyl records and interaction through meetings in offline and online mode as well.

Table: 1.1 and 1.2 shows details of publication and dissemination of statements

**Table 1.1: Stakeholders of the Program**

Stakeholder	Type	Purpose/relevance	Mode of Publication and dissemination
Management	Internal	Defining development plan and road map, Providing physical, human and financial resources and Formulation of policies.	1. Display boards at meeting/interaction locations for all the visiting and working stake holders.
Faculty and Support Staff	Internal	Implementer (Contributor) of Policies Key contributor in developing/implementing growth plan, Responsible for producing competent graduates/product from the Institution	(Department Entrance, HOD Office, Faculty rooms, Laboratories, Classrooms, Department meeting room/Library)
Students	Internal	Responsible for creating institute reputation & outcome.	2. Department Newsletter, Course Manuals and Laboratory Manuals, Faculty Course File, Information Brochures, Event & industrial visit reports, Academic diary, Internal Test Assessment book.
Employers	External	Employing graduates and making an assessment on competence and employability.	

Industry	External	Employer as well as participant in curriculum development and industry – institute activities.	<p>3. In digital form, the statements are published through Institute website, Email, social media, Screen saver, Event Presentations, CANVA platform.</p> <p>4. The dissemination is observed through online/offline mode such as induction programs, counseling round, administrative and stake holders meeting.</p>
Alumni	External	Able to co-relate learning and professional practice, Provides appropriate inputs to the department/program Committee.	
Funding Agencies	External	Provides financial assistance to the Institution and interacts with the Principal Investigator/Faculty of the department /program	
Parents	External	Perception on the support provided by department/program for shaping up the career of their wards	
Regulatory/ Accrediting Authorities/Professional bodies	External	Prescribes norms and standards to ensure quality assurance and enhancement	
Society	External	Provides intangible outcome from the Institution perspective

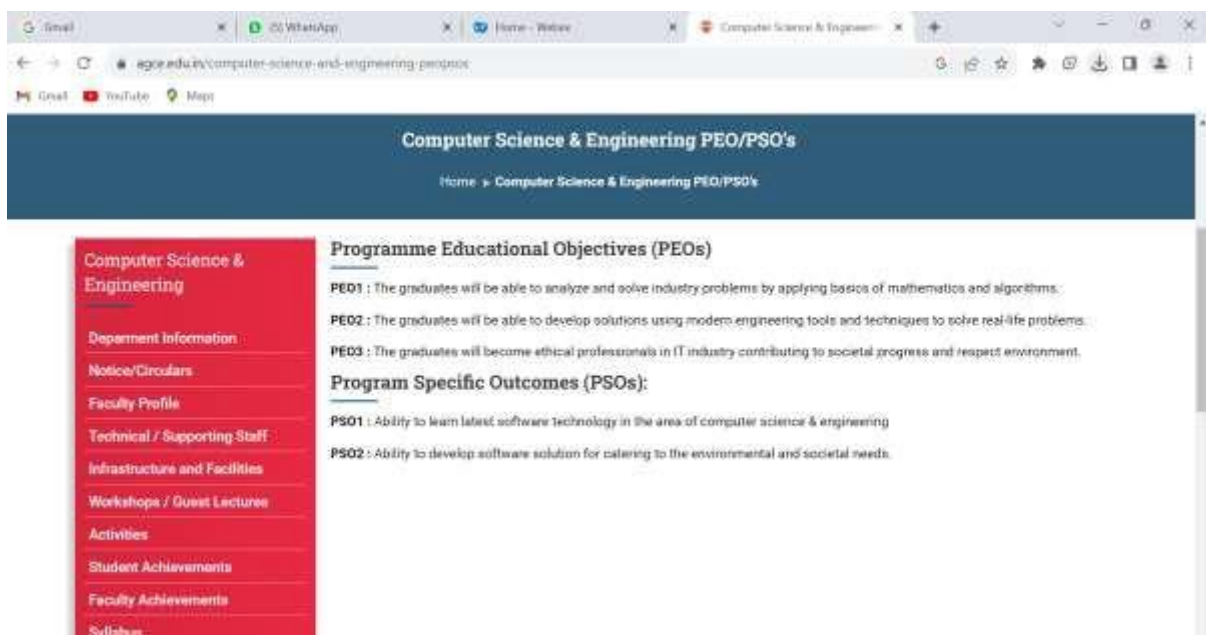

Fig. 1.3b: Screenshot of Programme Educational Objectives and Program Specific Outcomes (PSOs) disseminated on website

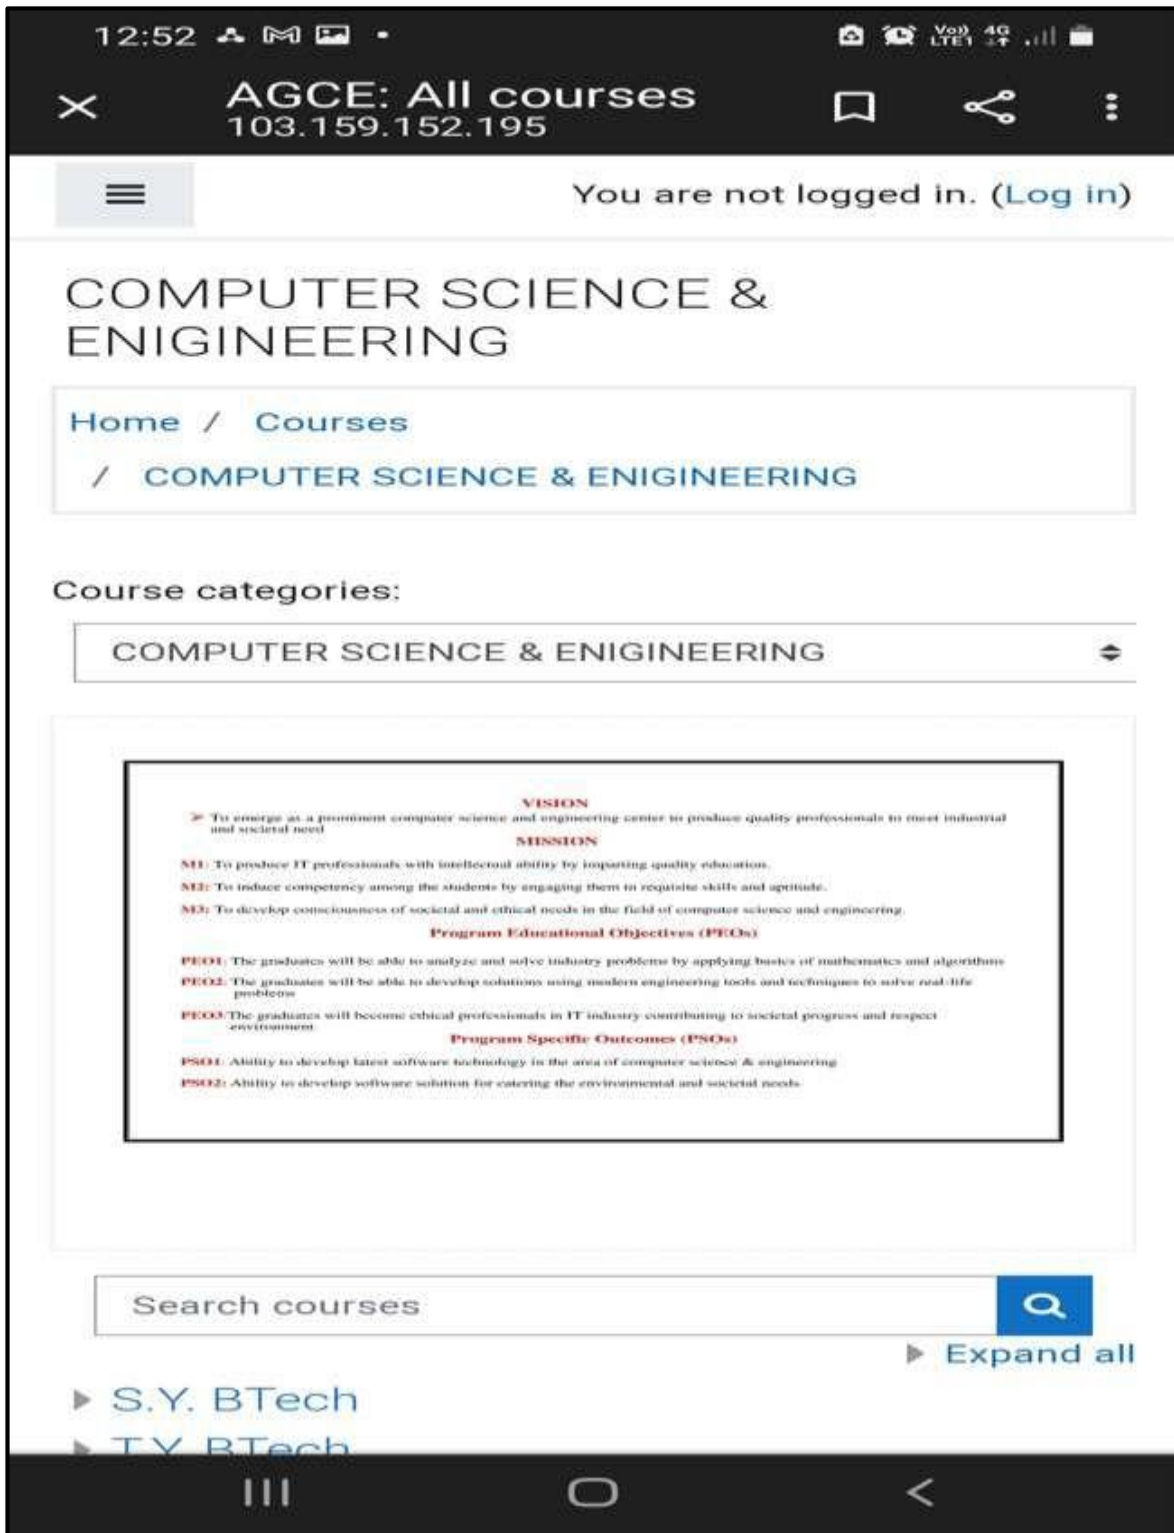

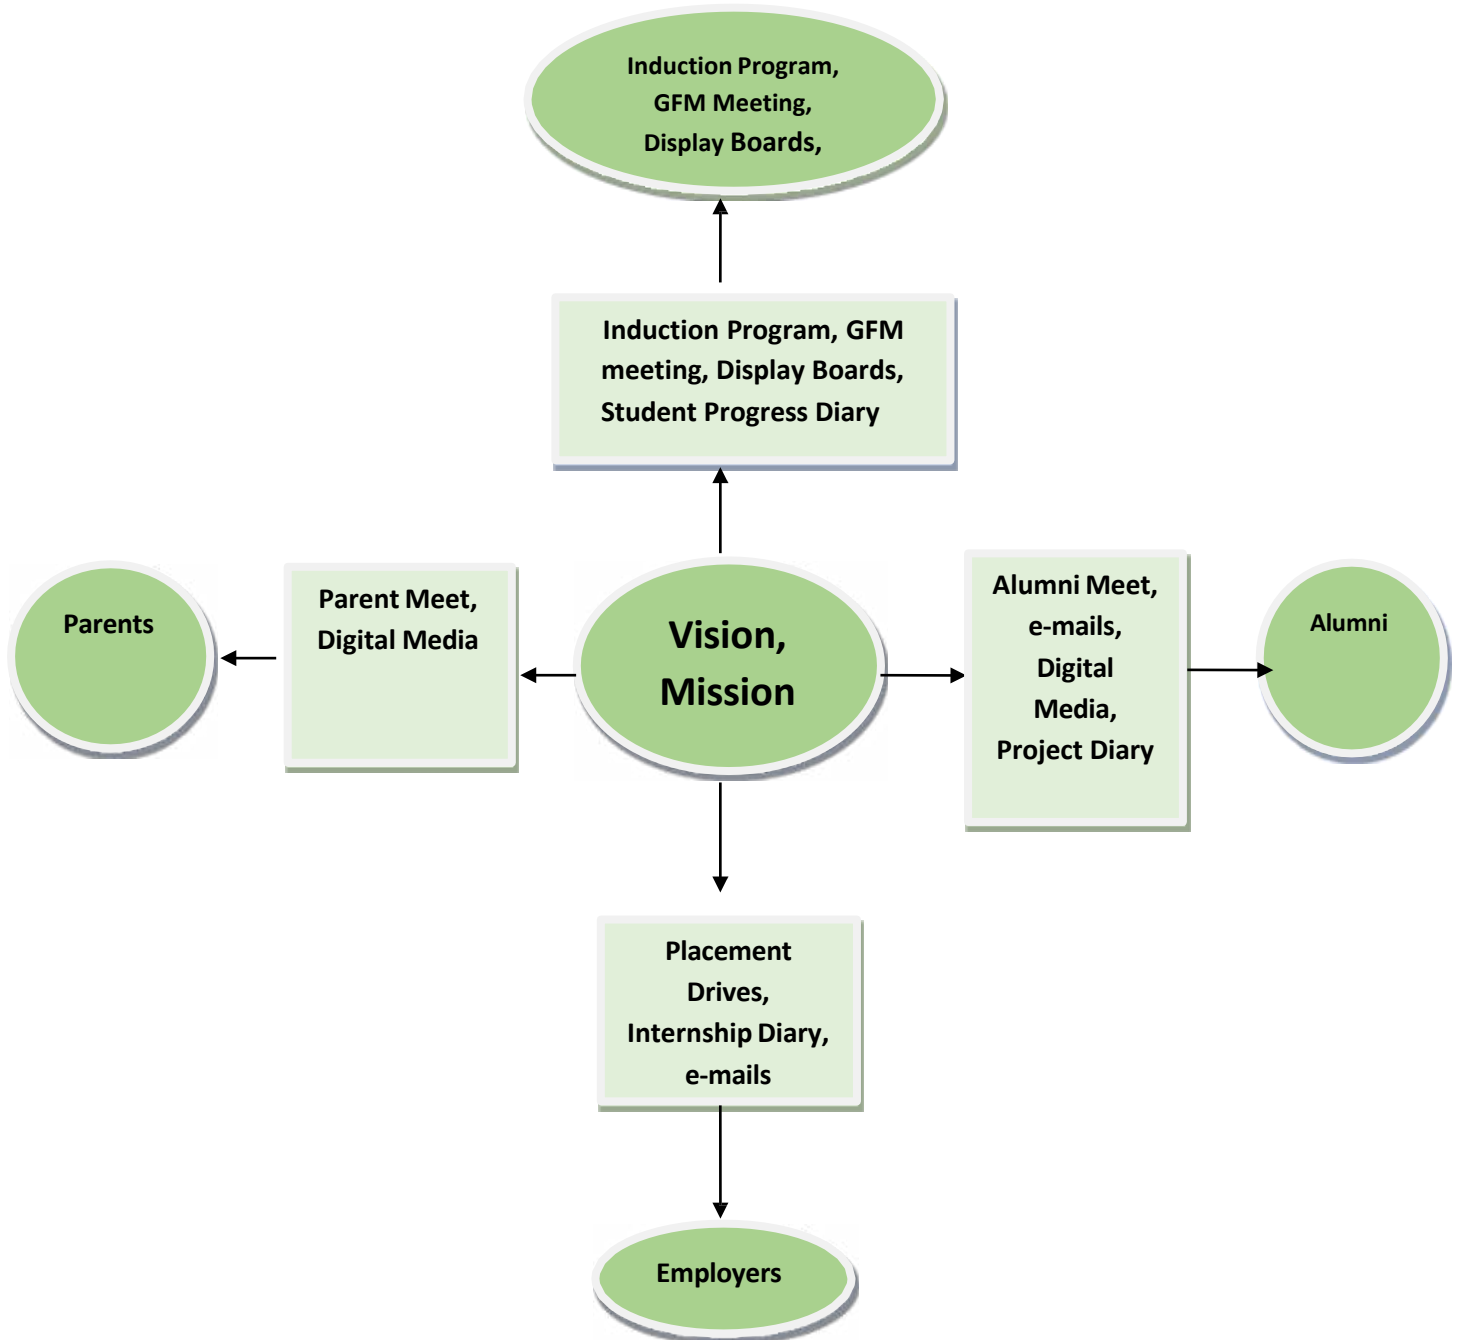

Fig. 1.3c: Screenshot of Vision, Mission and PEOs disseminated on website

**1.3 B: Process of Dissemination**

- The dissemination of statements is observed through stakeholders' interaction, having specific relevance of vision, mission elements and PEOs in planning, delivery and execution of academic program.
- The roadmap towards successful career is explained through vision, mission elements and PEOs, during induction program.
- During the guidance and counseling round, the students are sensitized about career plan and higher studies in line with vision, mission & PEOs
- During the administrative meets, it is observed that the policies, execution and monitoring of academic plan are in line with vision, mission elements and PEOs.
- The Vision and Mission is disseminated through presentation by Head of department, Program Coordinator and Course Coordinators at commencement of the term and during sessions periodically.
- Importance of Vision and Mission along with its relevance to the Program Outcomes is presented to the students by the faculty members during sessions.
- The institute vision, mission and departmental vision, mission and program educational outcomes has been described in each and every event (technical & non-technical), meetings with DAB, parents meet etc.
- Head of Department in association with Program Coordinator educates the faculty members about importance and relevance of Vision and Mission with Program Educational Objectives and Program Outcomes.

**1.3 C: Extent of Awareness of Vision, Mission & PEOs**

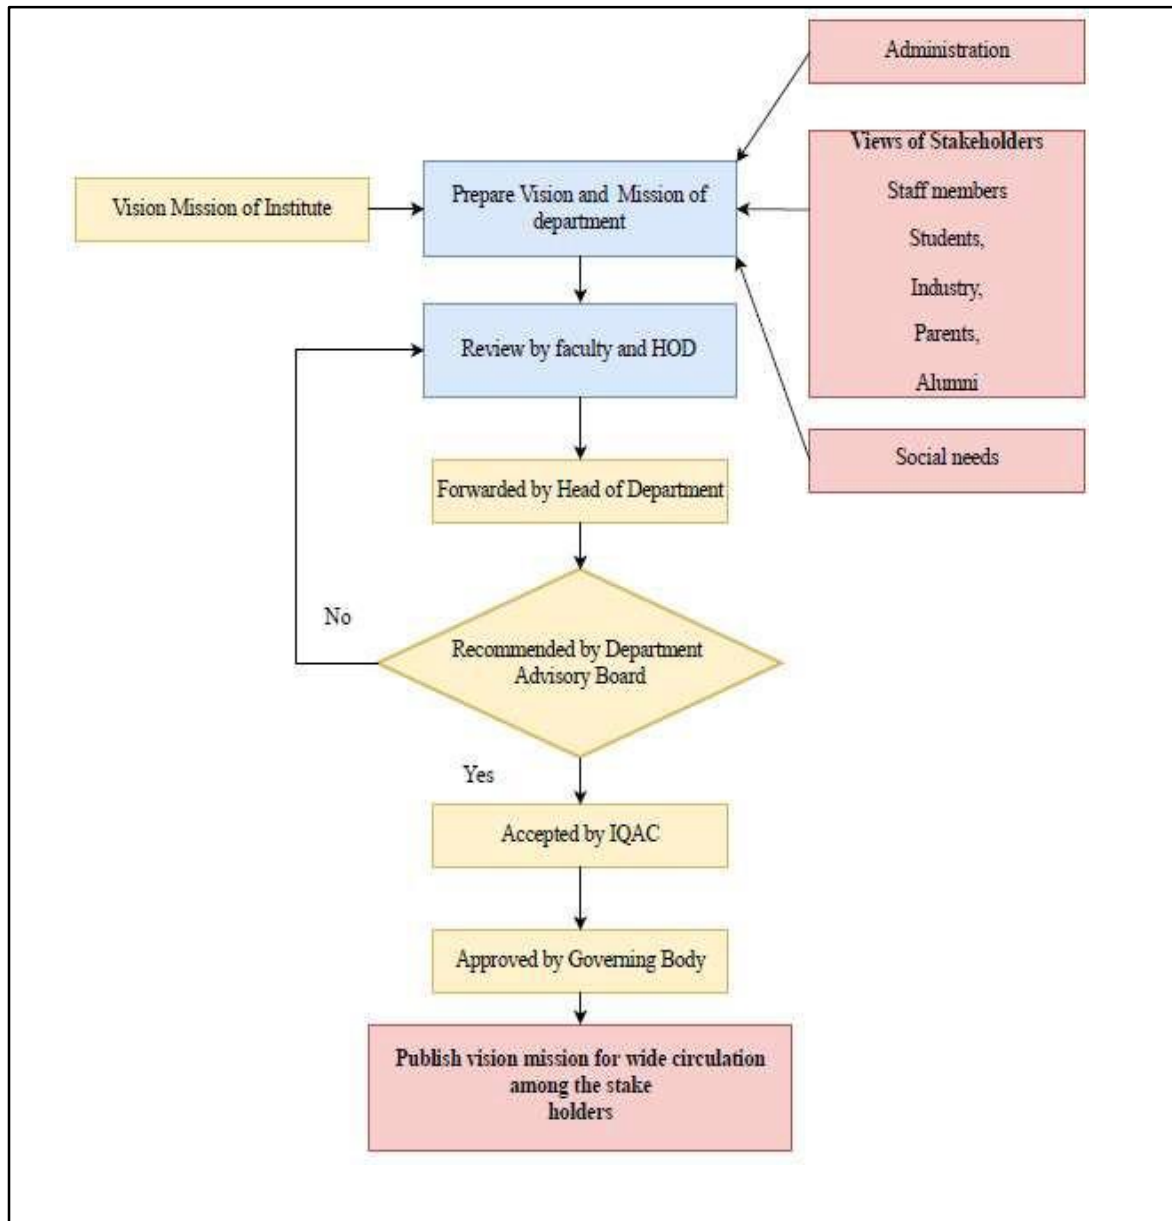

- The Head of Department has stated the vision, mission & PEOs in meetings with internal & external stakeholders viz. Departmental Advisory Board (DAB) meet, Parents meet, Employers meet, Alumni meet, Students meet through GFM, faculty meet, Events Inauguration etc. The importance of vision and its achievements through mission with the relevance of program educational outcomes (PEOs) have been described to internal & external stakeholders to know the continuous progress of department & outcome based education.

**Fig. 1.3d: Awareness of Vision, Mission & PEOs**

**1.4 State the process for defining the Vision and Mission of the Department, and PEOs of the program (25)**

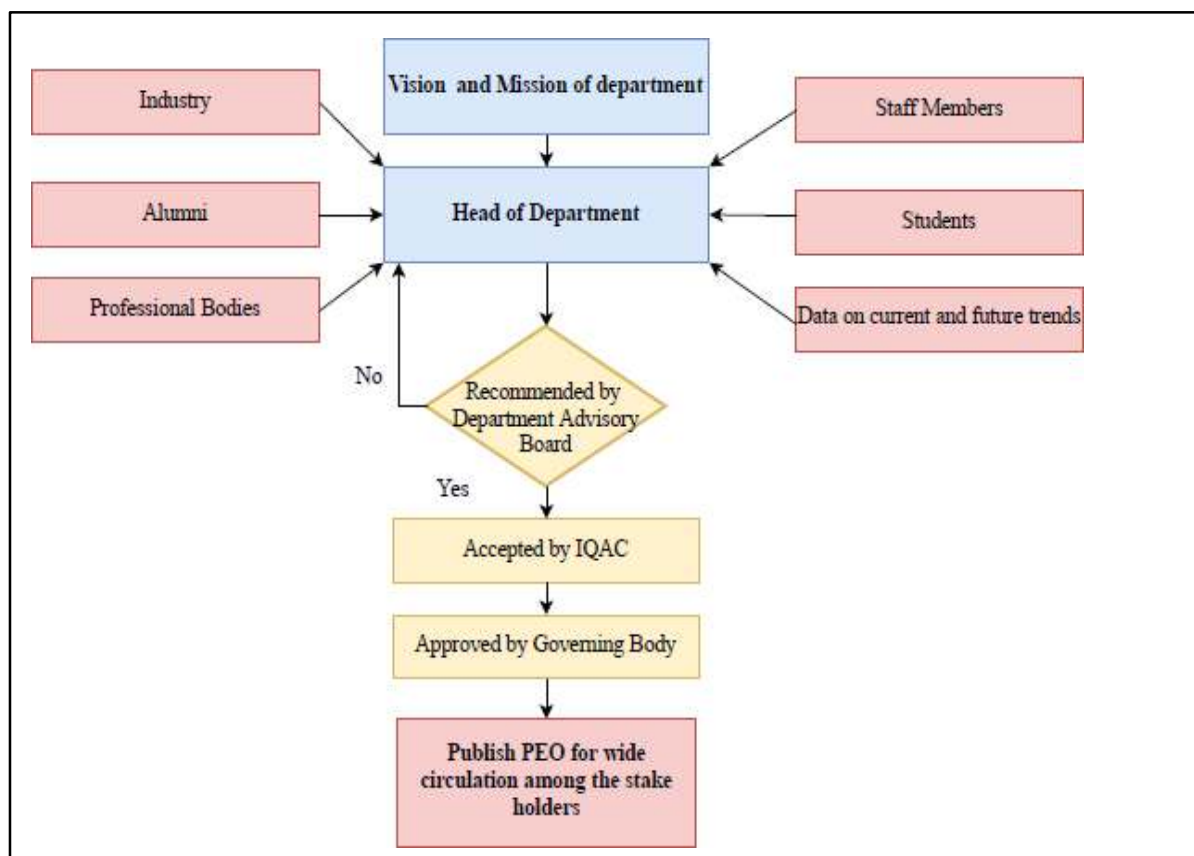

**Fig 1.4 a: Process of defining the Vision & Mission of Department**

- **Process of Defining the Vision & Mission of the Department**

- The Department established its Vision and Mission statements through a consultative process by interacting with all the stakeholders of the department, the long term and short-term goals of the department and the societal requirements as shown in following Figure 1.4a. The Vision and Mission statements of the department were formulated during in the year 2020. The new Outcome Based Education (OBE) accreditation process has given an opportunity to review and modify the Vision and Mission statements of the department considering the Graduate Attributes. The Internal stake holders involve students, staff members etc. whereas external stakeholders involve industries/employers, parents, alumni, professional bodies etc. The following steps have been followed to formulate vision & mission of the department.
- **Step 1:** Head of Department along with faculty members formulate & coordinate the vision and mission statement of the department, based on the continuous feedback from internal & external stakeholders in line with vision and mission of the Institute.
- **Step 2:** The formulated statements of vision & mission are presented in the DAB meeting and waiting for their recommendations or suggestions/advice. It is in continuous flow from review of faculty & HoD to Departmental Advisory Board & vice versa till the final recommendation from DAB.
- **Step 3:** Recommended vision and mission statements from DAB are sent to the IQAC to coordinate with governing body. Once it is accepted by IQAC, the governing body has approved it in coordination with IQAC.
- **Step 4:** Finally, the vision and mission statements are published to internal & external stakeholders through digital & print media.

- Process of Defining the Program Educational Outcomes (PEOs) of the Program

**Fig 1.4 b: Process of defining PEOs of the program**

The process of defining PEOs is in conjunction with Vision, Mission of program and inputs received from a committee constituting representatives of all internal & external stakeholders as shown in Fig 1.4 b. The PEOs are established through following steps.

- **Step 1:** PEOs were created by HoD comprising of students, staff members, alumni, industrial experts, professional bodies and data on current and future trends.
- **Step 2:** The formulated PEOs are forwarded to Departmental Advisory Board (DAB) for recommendation or suggestions in formulated PEOs. It is in continuous flow HoD to Departmental Advisory Board & vice versa till the final recommendation from DAB.
- **Step 3:** Recommended PEOs statements from DAB are sent to the IQAC to coordinate with governing body. Once it is accepted by IQAC, the governing body has approved it in coordination with IQAC.

- **Step 4:** Finally, the Program Educational Outcomes (PEOs) statements are published to internal & external stakeholders through digital & print media.

The following documents are maintained at the department

1. Committee minutes of meeting
2. Stakeholder's feedback/form
3. Parents feedback
4. Alumni inputs
5. DAB: Minutes of meeting

### 1.5. Establish consistency of PEOs with Mission of the Department (15)

The Program Educational Objectives are consistent with the Mission statement of the department which is stated in following tables.

#### PEO and Mission Statement Consistency

<b>PEO Statements</b>	M1	M2	M3
PEO1: The graduates will be able to analyze and solve industry problems by applying basics of mathematics and algorithms	3	2	1

M3: To develop consciousness of societal and ethical needs in the field of computer science and engineering.	
<b>PEO1:</b> The graduates will be able to analyze and solve industry problems by applying basics of mathematics and algorithms.	3	2	1	<p>M1 is highly correlates with PEO1 as quality education through intellectual ability based on the utilization of basics of mathematics analyze and algorithms to solve industrial problems</p> <p>M2 moderately correlates with PEO1 as the basics of requisite skills through algorithms and basics of mathematics are essential for aptitude.</p> <p>M3 slightly correlates with PEO1 since it is consciousness of societal and ethical needs where slight use of mathematics &amp; algorithms. Hence, there are slight co-</p>

				relations between PEO1 and M3.
<p>PEO2: The graduates will be able to develop solutions using modern engineering tools and techniques to solve real-life problems</p>	2	3	1	M1 moderately correlates with PEO2 as the modern tools and techniques are necessary for the quality education but cannot totally depend on modern tools at all time.
				M2 is highly correlates with PEO2 as it deals with the requisite skills & reasoning knowledge with creative thinking through modern engineering tools to solve real life problems.
				M3 slightly correlates with PEO2 as modern techniques that slightly covers ethical values, respect for the environment, and social responsibility among the students.

<p>PEO3:</p> <p>The graduates will become ethical professionals in IT industries contributing to societal progress and respect environment</p>	1	2	3	<p>M1 slightly correlates with PEO3 as it emphasizes on quality education however the PEO3 focuses on awareness of ethical, societal &amp; environmental issues.</p>
				<p>M2 moderately correlates with PEO3 as it inculcates professional skills among the students to serve the society with ethical values.</p>
				<p>M3 is highly correlates with PEO3 as it emphasizes on imbibing ethical values, environmental and social awareness among students.</p>

-------------------------	---	------------

**2.1.1. State the process used to identify extent of compliance of the University curriculum for attaining the Program Outcomes and Program Specific Outcomes as mentioned in Annexure I. Also mention the identified curricular gaps, if any (10)**

Arvind Gavali College of Engineering, Satara is affiliated with Dr. Babasaheb Ambedkar Technological University (DBATU), Lonere Maharashtra. Computer Science & Engineering department follows the scheme and syllabus of DBATU University. The scheme follows the semester pattern and is divided into eight semesters for a four-year graduation program. The curriculum contains basic sciences, social sciences, humanities, professional and elective courses.

According to the university curriculum, each course is mapped with 12 Program Outcomes (POs) and 2 Program Specific Outcomes (PSOs), and the evaluation of each PO and PSO is done. The university's recommended courses adhere strictly to all Pos and PSOs. Faculty from the Computer Program actively participate in developing and implementing University curricula. By setting up several skill-oriented certified add-on courses and industry-sponsored competitions for the student's overall development, academic flexibility is accomplished. To help students fulfill the demands and expectations of the industry, the programme offers a variety of supplemental courses. Following table summarizes categorization of entire curriculum in various course.

\* Six months of Internship and Project in the industry.

The department has a well-defined process in implementation to achieve the Program Outcomes (PO) and Program Specific Outcomes(PSO). If some components, to attain Cos/POs are not included in the curriculum provided by DBATU, then the department makes additional efforts to impart this knowledge.

Following processes are used to identify the extent of compliance for attaining the Program Outcomes and Program Specific Outcomes

**Figure B 2.1.1 b Process to Identify Curriculum Gaps**

1. The University publishes the curriculum annually in June if changed or updated. The curriculum provides the syllabus of each course.
2. Faculty members update and design the course outcomes for the course allotted to them. The teaching plan with course objectives and course outcomes is prepared by the individual faculty member of the department before the commencement of a semester.

The plan is duly presented and confirmed in DAB. The plan ensures the coverage of the complete syllabus before the end of the semester

3. For each course, a course file is prepared by the concerned faculty member. The Co-relation matrix of CO with PO/ PSOs is also designed and analyzed by Academic Monitoring Committee.
4. The feedback from the alumni, industry experts, and academicians from other Universities and students is regularly taken. Gaps are identified based on the CO attainment of individual courses and feedback from different stakeholders.
5. The data collected is then presented before Program Evaluation and Review Committee. The gaps are discussed in the AMC meeting. To bridge gaps, seminars, workshops, guest lectures, industrial visits, etc. are arranged by our department/ institute to provide knowledge beyond the syllabus. The following table shows correlation matrix courses to program outcomes and program specific outcome.

**Table B.2.1.1.c Mapping of the courses to program outcomes**

**B. Use of various instructional methods and pedagogical initiatives****(03)****Fig. B.2.2.1d.:Instructional methods & pedagogy****Delivery**

Teachers employ a variety of tools in the classroom, including intelligent interactive panel, whiteboards, projectors, and black board. During lectures, each student is permitted to ask any question about the subject. Faculty members answer questions from students that they are asked during lectures.

**Use of e-resources:**

For all courses, professors use powerpoint presentations to help students understand the concept. Additionally, they use videos from many MOOC platforms, including those from the National Programme on Technology Enhanced Learning (NPTEL), MIT Open-Source Video, and videos from Industry Experts.

**Fig. B.2.2.1e.Swayam NPTEL Local Chapter**

### **Collaborative Learning:**

- Collaborative learning is the educational strategy that makes use of groups to improve learning by cooperating. Learners who are in groups of two or more collaborate to solve issues, finish tasks, or understand new ideas. It encourages hearing other people's points of view, listening to criticism and suggestions, and improving cooperation while also fostering public speaking and active listening abilities.
- The curriculum covers topics including seminars, mini projects, and major projects, where groups of three to five students are created and a mentor is assigned to oversee and guide the progress of the work.
- The approaches utilized for group learning are as follows:
  1. Small modules are divided into project work, and a subset of students work on various modules.
  2. In groups of 3-5 students, preparation activities for seminars and PowerPoint presentations were also carried out.
  3. In a group of 3-5 students, laboratory experiments are carried out for a subject like IoT.
  4. Moodle is a significant ICT project of the computer department that is helpful for group learning. Quiz, assignments, and resource sharing are among the many activities carried out online.

**Fig. B.2.2.1f.:Moodle Web**

### **Project Based Learning:**

- During the period of study, many real-time projects are given to the students on the latest technologies and they are guided by faculty members. In the seventh and eighth semesters, a final year project is developed by a group of students. For some academic courses, students have been encouraged to do some projects

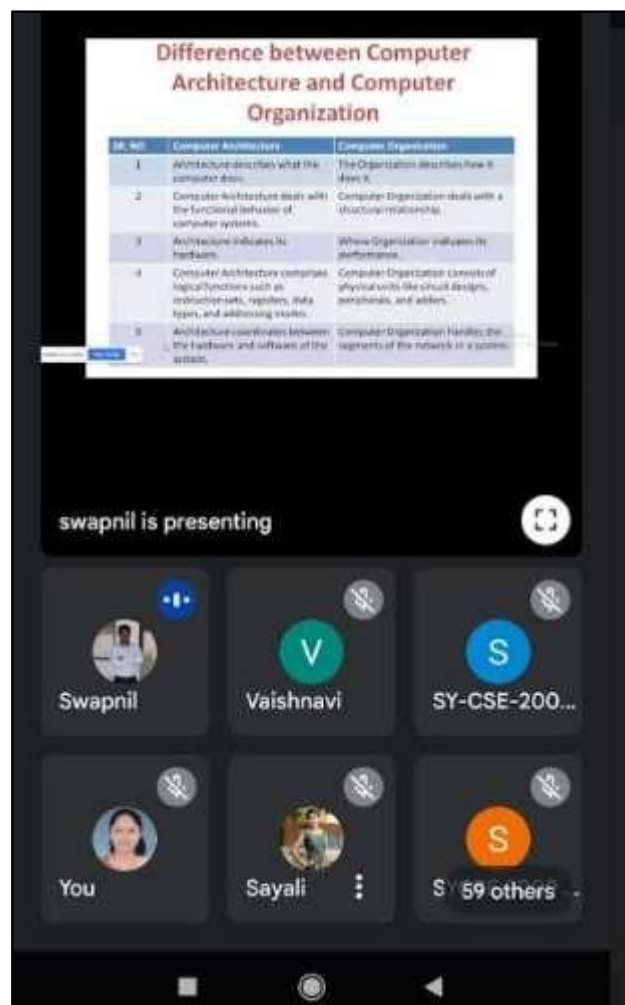

**Fig. B.2.2.1 g Project Demonstartion**

**Expert Lectures:**

- Experts from Industries and renowned academic institutions are regularly invited to deliver Guest/Expert Lectures for our students

**Virtual Learning:**

- Virtual laboratories: Faculty members use virtual laboratories of different IITs to conduct some experiments beyond the syllabus of the respective laboratories. Instruction manuals about the conduction of experiments are given in virtual labs, students follow these instruction materials to complete the experiments.
- Online teaching through MS Teams, Google Meet, and Zoom: Faculty members use software like MS team, Google meet, zoom, etc. to take lectures, tutorials, and laboratories online. Some faculty members also run their own created video lectures, NPTEL, and YouTube videos during online lectures using MS teams, Google meets, and zoom.

### C. Methodologies to support weak students and encourage bright students (04)

Departments have a proper mechanism to support the weak-performing student as well as encourage bright students. Identification of weak and bright students is carried out by considering their previous academic performance and feedback from Guardian Faculty members. For every batch of 20 students, one faculty is appointed as a guardian faculty member (GFM) who takes care of all these students as a guardian. This faculty member listens to all personal problems of student, council them, and help them to sort out their issues. Based on counseling department identifies areas of improvement and do the necessary plan which involves remedial classes, improvement test, and extra assignment, this enables the weak students to participate and perform better in understanding the concepts, internal assessment, and university exams.

Brighten students are encouraged to learn content beyond the syllabus through MOOC platforms NPTEL courses, Coursera, also MIT Open-source online education. Institute has a separate NPTEL Local Chapter (LC-ID 521), through which various advanced courses in various sectors like project management, software engineering, etc. are made available to bright students.

This enables the bright students:

- Update themselves with the latest tools and technologies
- Demonstrate critical thinking and take up innovative projects
- Taking up higher studies in the field of research and development enhances their skill and managerial quality to become successful entrepreneurs/employees.

Department announces every year the “Best outgoing student” of the program. Selection is carried out based on one’s continuous quality performance in all sorts of activities which include curricular, extracurricular, internships, competitions, innovative projects undertaken and completed, MOOC courses studied, and university marks, following table shows the last three years' best outgoing students.

**Table B.2.2.1a: Best outgoing student**

Sr. No.	Name of Student	Academic Year
1	Ms. Rupali Mulik	2022-23
2	Mr. Vishvanath Metkari	2021-22
3	Ms. Swati Jagtap	2020-21

**D. Quality of classroom teaching****(03)**

- Teachers are properly assigned courses and practical sessions before the semester even begin, which enhances both the quality of the information students get and their performance.
- Before the start of the semester, every faculty member prepares lesson plans, session plans, and lecture notes. They then post the study materials on MOODLE.
- Faculty members use common textbooks to prepare their notes. When creating the session plan, chapters from these textbooks are emphasized so that students are compelled to consult them.
- To keep students' interest throughout lectures, professors employ brainteasers, quizzes, and engaging movies and PowerPoints linked to the subject.
- Various educational efforts and instructional techniques & tools are used to engage student in learning

**Fig. B.2.2.1 n. :Student's Learning on Intelligent Interactive Panel**

**E. Conduct of experiments:**

All laboratories of the computer science & engineering department are equipped with enough number of computers with essential software.

1. Each student performs experiments on an individual computer.
2. All laboratory experiments have accompanying laboratory manuals.
3. Before the laboratory session, students are urged to read up on the theory underlying the experiments and the steps necessary to carry them out.
4. A concerned professor explains how the experiment was conducted.
5. It is suggested that students consult laboratory manuals for assistance.
6. A faculty member supervises and assists each student while they undertake experiments.
7. The laboratory performance record is to be submitted by the students for evaluation.
8. Internal marks are given according to the experiment's understanding, neatness, and timely journal submission.

**Fig. B.2.2.1 o. :Laboratory Session**

**F. Continuous Assessment in the laboratory****(03)****Laboratory Evaluation:**

A continuous assessment system is implemented for the assessment of laboratory work. Assessment is carried out for each student experiment in the laboratory as per demonstrated by the course in charge. This assessment is done based on

1. Timely Submission
2. Neatness
3. Understanding

Following is a sample laboratory work assessment sheet.

**G. Student feedback of teaching-learning process and actions taken (06)**

The department collects student feedback to identify areas for development. The Head of the Department (HoD) also examines feedback to evaluate faculty performance. Before course completion, a prescribed structure is used to collect student feedback on the course and the faculty member instructing it (attached below).

### Give 3 Observation/Suggestion to improve the overall teaching learning experience of respective teachers

1. We need industrial experts for teaching , more guest lectures , workshops should be arranged for interview training.
2. Communicate with every students.
3. Teaching Learning Process is good.
4. Learning experience are wonderful for all subjects.
5. Increase soft skills program.

### 2.2.2. Quality of Internal Semester Question papers, Assignments and Evaluation (20)

#### A. Process for internal semester question paper setting and evaluation and effective process implementation (05)

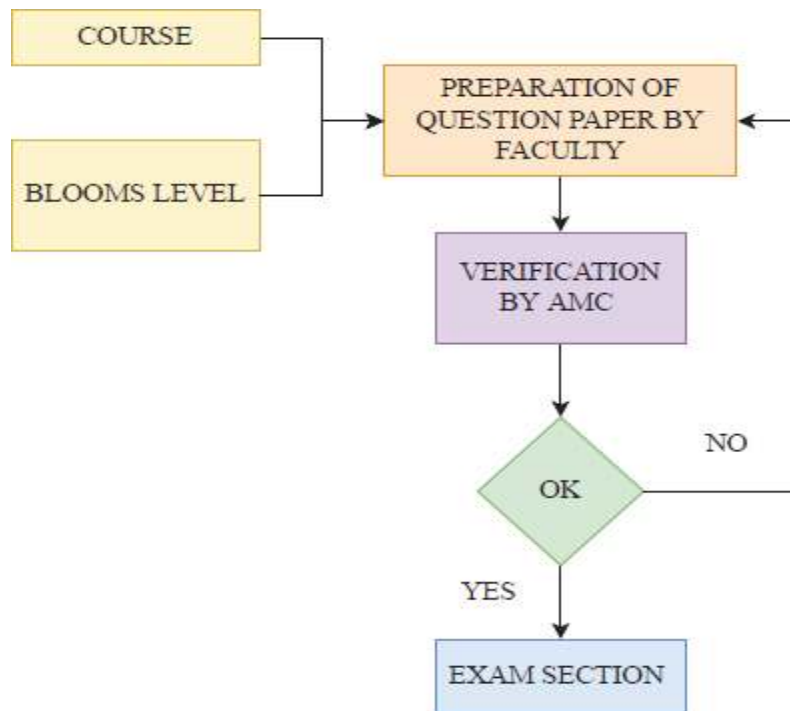

Fig B.2.2.2.a: Internal Question Paper Setting and Evaluation Process

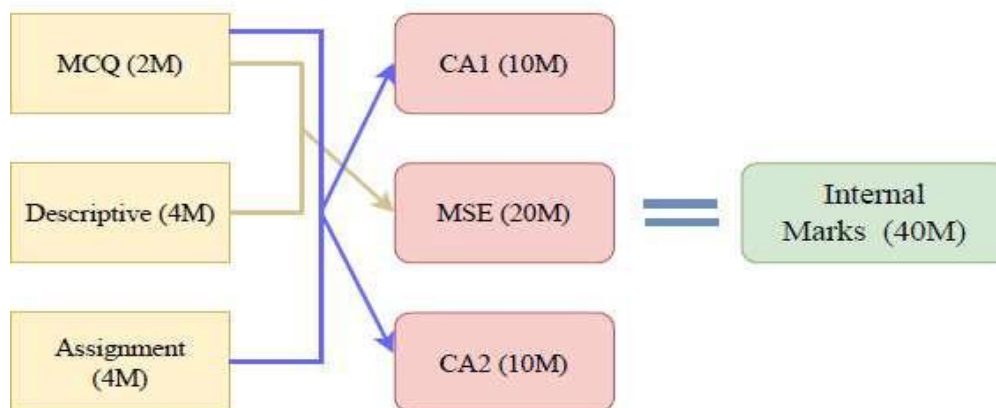

Fig B.2.2. 2.b: Internal Examination Question Paper Pattern

Computer Science & Engineering department follows the evaluation of the scheme of DBATU,Lonere.

- Internal and external exams are the main medium for PO attainment. Three tests continuous assessment test 1, continuous assessment test 2, and mid-semester examination are conducted during the semester as per the Institute Academic Calendar.
- The students are informed of the evaluation process during their orientation program itself.
- The institute forms an Academic and Examination committee for question paper quality checking, evaluation, and effective process implementation.

**Fig.2.2.2 b. Paper quality evaluation by DAB member**

- Three sets of question papers for each course are prepared by the faculty members and submitted to the Academic Monitoring Committee. The committee member selects one copy based on the quality of question's and relevance to COs.
- After approval from the committee, the final paper is printed, one hour before the scheduled class test to maintain confidentiality.
- The examination department schedules the examination timetable, test invigilation allotment, and room allotment and coordinates in smooth execution of the examination. The examination timetable and seating arrangement documents are displayed on the notice board and posted on what-app group of students.
- The questions for theory examination are aligned with bloom's taxonomy. COs and bloom's level are incorporated by the course coordinators and verified by the Academic Monitoring Committee. The duration of the test is 1 hr.
- The minimum 20% syllabus is covered before the continuous assessment test-I, the minimum 50% syllabus is covered before the mid semester examination, and the 100% syllabus is covered before the continuous assessment test-II by course coordinator.

**Evaluation:**

- a) The faculty member evaluates the test books as per the scheme of evaluation.
- b) The standard question paper solution is discussed with the students in class room.
- c) For any genuine reason if a student was unable to perform well in the given three internal assessment tests or students are interested for class improvement, remedial test facility is available for him/her.
- d) The best of two test marks obtained is chosen for the internal assessment marks.
- e) Assignments are used to learn, practice and demonstrate the learning goals only. As actual evaluation is based purely on internal assessment test.

Figures B.2.2.2.e shows the sample question papers.

**B. Process to ensure questions from outcomes/learning level perspective (05)**

- Using Bloom's taxonomy internal exam questions papers are set.
- The questions in the internal test are based on the course outcomes to find attainment.
- The course coordinator ensures that the learning objectives and potential results.
- Each internal theory test, whether it be online or offline, is administered as a means of evaluation.
- The questions are formed with the COs and Bloom's level.

**C. Evidence of CO coverage in class test/mid-term tests (05)**

- The institute has defined the following tools for the attainment of the course outcomes.
- The theory courses are assessed with the following tools for the attainment of course outcomes.
- The internal assessment tools of the program are as follows.

**D. Quality of Assignments and its relevance to Cos (05)**

- Faculty members prepare COs for the allocated subjects. They then prepare assignments according to these COs using Bloom's Taxonomy levels. Academic monitoring member verifies checks mapping of assignments with the defined COs.
- The faculty prepares a total of five-six assignments by considering coverage of all course outcomes. Certain time duration is given to the students to submit the assignment. The assignments submitted by the students are evaluated by the faculty members. Marks are given as per student's performance and a record is maintained in the course files.

### 2.2.3. Quality of student projects (25)

#### A. Identification of projects and allocation methodology to Faculty Members (03)

**Fig B.2.2.3.a: Project Identification & allocation method**

Students carry out a mini project in the fourth semester and a major project in the seventh and eighth semesters. Department follows standard procedures to ensure the quality of the project. The student selects a project domain in line with their interest. Students are encouraged to do a real-time project. Department and R& D head guides, the student to select domain by sharing with them various project domains like (not limited to)

- a) Web Technology
- b) Information Retrieval
- c) Internet of Things
- d) Machine Learning

e) Artificial Intelligence

Project groups are formed by the student themselves accordingly to their area of interest, if they are not able to form a group then the project coordinator helps them to form a group.

**A. Project Identification & guide allocation methodology (03)**

The project coordinator and project assessment committee (PAC) ensure the quality of students' projects. The PAC follows the guidelines set by the department in the following manner:

1. The R & D committee displays a list of faculty members along with their areas of expertise on the notice board.
2. A list of previous year's projects is displayed on the notice board and also available in the departmental library, which ensures no repetition of project work.
3. Students select the suitable area, form their group of a minimum of three and a maximum of five, and contact the concerned faculty member.
4. If any group is failing to submit the guide name then the project coordinator will assign the guide to the group.
5. Students can identify a problem statement for the project. If they are not able to find the problem statement, then the supervisor will give a problem statement to the students for the execution of problem solutions through the project work.
6. Committee finally allows the projects by considering various parameters like a relevance to POs, originality, feasibility, technology used, patentability and resource required.
7. The guide monitors the progress of the project work regularly and keeps a track record. In case, the performance of the student's group is not satisfactory, the matter is reported to PAC for required action.
8. The guide ensures documentation with the university format for submission of the project report.

## B. Types and relevance of projects and their contribution towards attainment of POs and PSO (05)

Artificial intelligence, machine learning, data mining, computer networks, the internet of things, the web, and mobile applications are the major domain of project development in the computer science and engineering department.

**Table 2.2.3.a Project Categories**

Project Domain	No. of Project in each domain		
	2022-23	2021-22	2020-21
Artificial Intelligence, Machine Learning	10	09	07
Internet of Things Computer Networks	00	02	04
Web, Mobile Applications	09	06	09
Total Projects	19	17	20

To ensure the relevance of projects, the need for the development of the project in the current technological context should be verified by the team consisting of the project guide and project assessment committee members, and also the projects are mapped to POs and PSOs.

### Course Outcomes:

1. Improve professional competency and research aptitude in the relevant area.
2. Develop work practices in students to apply theoretical and practical tools/techniques to solve real-life problems related to industry and current research.
3. Clearly understand the value of achieving perfection in project implementation and completion.
4. Learn to accept challenges and work in a team to solve problems with a multidisciplinary approach.
5. Enable the student to implement the project planning in their industrial In plant training work
6. Demonstrate professionalism with ethics, present effective communication skills, and relate engineering issues to the broader social context of

### The procedure of CO Attainment

1. All the performance indicator parameters/ Rubrics are mapped with course outcomes.
2. The percentage of marks in each CO for every student is calculated.
3. The percentage of students securing more than a threshold percentage (increase every year for continuous improvement of performance) in internal and external evaluation is calculated which shows a certain level of CO achievement

**B. Process for project work monitoring and evaluation****(05)****Fig B.2.2.3.d: Project Assessment Mechanism****Procedure for monitoring& evaluation:**

- a. Students have to submit the synopsis of the project work to the coordinators for feasibility checking.
- b. The project work coordinators and the RR committee will scrutinize the synopsis and give suggestions for improvements in strengthening the synopsis.
- c. In case, the group of students taking projects from the Public/Private sectors needs to take approval from the HOD and a Letter of Reference sent to the concerned sector. A faculty member of the department functions as an Internal Guide to such students and the scientist/researcher in the concerned sector functions as an External Guide.
- d. Every week, the students should meet their concern guide and update their project work progress. The students/batch must give a presentation on the project in front of the project work review committee (RR Committee) as scheduled in Phase-1 & Phase-2.
- e. Finally, the RR committee evaluates the projects for respective domains.

### Project Work Evaluation:

a) **Internal Evaluation:** The project work and the report will be evaluated by the internal committee at Phase-1, Phase-2

b) **External Evaluation:** The project work and the report will be evaluated by internal and external examiners appointed by the University.

c) The examiners will take a presentation and demonstration followed by Viva-Voce on the project work carried out by students. The students need to defend their project work. Based on the presentation and Viva-Voce, the marks will be awarded to the students, which will be sent to the university

### Process to assess individual and team performance

(05)

Project assesment is the process of evaluating the performance of individual and an entire team. Performance evaluation is done to get a clear idea of how well the individual and team's skills are working together, motivating them and providing suggestion for improving individual and team performance.

The assesment evaluation can be done by using assesment method like individual and team performance questionnaires and present in front of RR committee. Students need to score more than 60% for continuing to content work otherwise consult with guide. After reworking again need to present in front of RR committee and will start to do further work. The process to assess individual and team performance is shown in Fig. 2.2.3e.

**2.2.4. Initiatives related to industry interaction (15)**

The department of Computer Science & Engineering has made efforts in the direction of making students ready for the industry by enhancing their skill sets through training on recent tools and technologies. The said efforts are made through the following activities in collaboration with the industry.

**A. Industry supported laboratories (05)****Table B. 2.2.4 a. Industry Supported Lab Details**

**B. Industry involvement in program design and partial delivery of any regular courses for students (05)****a. Industrial Visits:**

Industrial visits for the engineering students are an essential activity as per their curriculum to get a proper insight into how the real working environment of a company and its functionality at different levels. To go beyond academics, these visits are arranged to develop the insights of the students – attaining practical knowledge and their theoretical applications thereof

**Objectives of Industrial Visits:**

1. An opportunity to get exposure to real workstations, machines, and systems.
2. Acquaint students with interesting facts and new technologies.
3. Expert briefing about the functioning of machines and systems.

4. Increase practical awareness of various industrial sectors.
5. Opportunity to have a face-to-face session with technical or administrative experts of the organization to ask questions and clarify doubts. Understand the end-to-end process at all levels.
6. Opportunity to understand policies and practices of Industry in terms of production, quality, and service management.
7. Keeping these objectives at hand, the department organizes industrial visits which are within the framework of the curriculum.

### **2.2.5 Initiatives related to internship / Summer Training**

#### **Industrial/Internship/Summer Training:**

##### **A. Industrial/Internship/Summer Training Course Objectives**

1. To provide industry exposure to student
2. To make them aware working culture of the Industry
3. To provide knowledge of design, manufacturing, quality, and testing of products

##### **B. Industrial/Internship/Summer Training Course Outcomes:**

- a) Understand industrial environment and practices.
- b) Work on the specific project and complete it in the stipulated period.
- c) Able to understand the importance of quality of product and human safety.
- d) Apply theory and practical knowledge while dealing with the industrial problem.

##### **C. Implementation of Industrial Training:**

1. The placement department approaches various companies every semester to provide internships to students. Some companies where students undergo are mentioned in the Table B 2.2.4g.
2. Proper guidelines, suggestions, and scope of industry internship/summer training are provided to students.
3. Help students to select the industry for summer training as per their domain of interest.
4. Based on the inputs by students, proper communication is carried out with the concerned industry.
5. Department provides the recommendation letter (Figure B.2.2.5b) and other necessary support to students for availing of industry internships.
6. All the students are required to submit their training reports along with a certificate from the concerned industry.

Subject: Request for Internship & Project in the Industry		
Respected Sir, The Samarth Educational Trust has been actively associated with Educational Activities since its inception in 1988 and is developing fast into a Prime Educational Centre in the Western region of Maharashtra. It has presently the following constituent institutes under its umbrella:		
<ul style="list-style-type: none"> <li>• Arvind Gavali College of Engineering &amp; Polytechnic</li> <li>• Sawkar Pharmacy College</li> <li>• Sawkar Homoeopathic Medical College</li> <li>• Arvind Gavali College of Pharmacy</li> </ul>		
To merge industry-institute gap, Dr. Babasaheb Ambedkar Technological University, Lonere have design Curriculum for B.Tech student to undergo internship in the industry and carry out the Project/Assignment. This enables them to acquire practical knowledge and achieve Program Education Objective (PEOs). Internship & Project in the Industry provides exposure to the students as well as help them to develop their career in high-tech industrial requirements, which leads to enrichment in their employability.

#### **D. Student Feedback on Initiative**

- The feedback on the initiative taken by the program is collected from the students when he joins back the institute after the completion of the internship in the industry.
- The feedback is conducted to understand the satisfaction of the students with the initiative and the scope for improvement in the initiative for future students.
- It is observed that the initiative is helpful for the students from the perspective of career advancement and life-long learning.
- The feedback of the students is also taken while submitting of the report. The sample feedback form is as below.

## Internship/ Field Training Feedback

Students should give feedback of internship/ Field Training.

<b>CRITERION 03</b>	<b>COURSE OUTCOMES AND PROGRAM OUTCOMES</b>	<b>120</b>
-------------------------	---	------------

### 3.1 Establish the correlation between the courses and the Program Outcomes (POs) and Program Specific Outcomes (PSOs) (20)

Program Outcomes as mentioned in Annexure-I and Program Specific Outcomes as defined by the Program.

#### A. PROGRAM OUTCOMES (POs)

The students of Computer Science and Engineering will be able to:	
<b>PO1</b>	<b>Engineering knowledge:</b> Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
<b>PO2</b>	<b>Problem analysis:</b> Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
<b>PO3</b>	<b>Design/development of solutions:</b> Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
<b>PO4</b>	<b>Conduct investigations of complex problems:</b> Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
<b>PO5</b>	<b>Modern tool usage:</b> Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
<b>PO6</b>	<b>The engineer and society:</b> Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
<b>PO7</b>	<b>Environment and sustainability:</b> Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
<b>PO8</b>	<b>Ethics:</b> Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
<b>PO9</b>	<b>Individual and team work:</b> Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
<b>PO10</b>	<b>Communication:</b> Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

<b>PO11</b>	<b>Project management and finance:</b> Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
<b>PO12</b>	<b>Life-long learning:</b> Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## B. PROGRAM SPECIFIC OUTCOMES (PSO)

Computer Science and Engineering graduates will be able to	
<b>PSO1</b>	Ability to learn latest software technology in the area of computer science & engineering
<b>PSO2</b>	Ability to develop software solution for catering to the environmental and societal needs.

**3.1.1. Course Outcomes (COs)****(05)**

SEM-III	<b>Discrete Mathematics BTCOC302</b>	C302.1	To understand propositional logic and perform operations on set, functions, relation.
		C302.2	To solve problems using counting techniques, permutation, combination, recursion and generating function
		C302.3	Apply algorithms and use of graphs, trees as tools to visualize and simplify problems.
		C302.4	Summarize various properties of algebraic systems.
SEM-IV	<b>Design &amp; Analysis of Algorithms BTCOC401</b>	C401.1	Recall algorithm, flowchart, list different algorithm design techniques
		C401.2	Illustrate various computational models.
		C401.3	Demonstrate various algorithms like sorting, searching and solve problems using optimization theory.
		C401.4	Analyze the performance of algorithm.
SEM-V	<b>Database Systems BTCOC501</b>	C501.1	Define data abstraction, data independence, tuple, relational algebra, indexing, hashing, normal forms.
		C501.2	Explain integrity constraints and demonstrate relational algebra expressions with various examples.
		C501.3	Analyze relational algebra expressions and test database recovery strategies
		C501.4	Write programs and applications on relational algebra expressions and test database recovery strategies.
SEM-VI	<b>Artificial Intelligence BTCOE603</b>	C603.1	Demonstrate fundamental understanding of the history of artificial intelligence and compare AI with human intelligence.
		C603.2	Identify the type of search strategy (blind/heuristic/adversarial) that is more appropriate to address a particular problem
		C603.3	Discuss algorithms of informed search, constraint satisfaction problem, logic, uncertain knowledge and reasoning.
		C603.4	To formalize knowledge using the framework of propositional and first order logic, automatic reasoning in predicate logic using inference rules.

SEM-VII	<b>Software Engineering BTCOC701</b>	C701.1	To understand basic software engineering methods and practices, and their appropriate application.
		C701.2	To decompose the given project in various phases of a lifecycle.
		C701.3	To understand various processes used in all the phases of the product.
		C701.4	Apply the knowledge, techniques, and skills in the development of a software product
SEM-VIII	<b>Elective XI Social Networks BTCOE801B</b>	E801B.1	Illustrate Datasets, Granovetter's Strength of Weak Ties, homophily, Power Laws, Small world phenomenon
		E801B.2	Analyze Datasets, Strength of weak ties, Strong/ Weak Relationships, Homophily, Cascading behavior in network
		E801B.3	Summarize Embeddedness, Structural holes, Social Capital, Google Page ranking using Web Graph, Knowledge, Thresholds and collective action
		E801B.4	Conclude Small World Phenomenon, Power Laws, Epidemics, Rich get richer phenomenon.

**3.1.2. CO-PO matrices of courses selected in 3.1.1****(05)**

All the courses in curriculum are studied in detail and correlation with POs and PSOs are declared. Six matrices are mentioned here from the 3<sup>rd</sup> to the 8<sup>th</sup> semester. Record for all courses is available with the program.

### 3.1.3 Program level Course-PO matrix of all courses INCLUDING first year courses(10)

CO-PO correlation matrix for all courses in the program is given below. Course code is mentioned in the first column and correlation with POs is indicated as 1) slight, 2) moderate and 3) High. Courses not having any correlation is indicated by '-'. This correlation is derived from CO-PO mapping of the individual course. Average of all COs is taken and mapped at level 1, 2 and 3.

**3.2 Attainment of Course Outcomes (50)****3.2.1 Describe the assessment processes used to gather the data upon which the evaluation of Course Outcome is based (10)**

The key aspects in Outcome Based Education (OBE) are the assessment of course outcomes. At the initial stage of OBE implementation, the Course Outcomes (COs) for each course are defined based on the Program Outcome (POs) and other requirements. At the end of each course, the COs needs to be assessed and evaluated, to check whether it has been attained or not. Assessment is one more process, carried out by the department, that identify, collect, and prepare data to evaluate the achievement of program educational objectives and program outcomes. Attainment is the action or fact of achieving a standard result towards accomplishment of desired goals. Primarily attainment is the standard of academic attainment as observed by test or examination result. Attainment of the COs can be measured by using direct and indirect tools. Direct attainment basically displays the student's knowledge and skills from their academic performance. It can be determined from the performance of the students in all the relevant assessment tools – like internal assessments, assignments, quiz and final university examination etc. These methods provide a sampling of what students know and /or actions they can perform, offering substantial.

This program consists of various types of courses for fulfillment of POs and PSOs. The process of data collection for attainment of COs is properly identified depending on the type of course. Major types of courses are

1. Practical/Oral/TW
2. Tutorial
3. Seminar
4. Project
5. Audit course

The Institution strives hard to ensure that the Learning across all the courses of the curriculum is Outcome oriented. There is continuous assessment of learning outcomes attainment and this procedure has been refined over a period of time.

The following are the two broadly classified tools used for assessment of Learning Outcome Attainment

- Direct Assessment Method:

Data collection mechanism includes direct assessment process which is

### Theory

1. Continuous Assessment Test 1
2. Mid Semester Examination
3. Continuous Assessment Test 2
4. End Semester Examination

### Laboratory

1. Continuous Assessment Test 1
2. Continuous Assessment Test 2
3. End Semester Examination

Data collection process for all above type of courses is clearly defined in table 3.2.1a given below.

**Table 3.2.1a: Assessment Tools**

#### Theory

Sr. No.	Assessment tools	Tool type	Time Span
1	Continuous Assessment Test1[CA1]	Direct Assessment	One test/semester
2	Mid Semester Examination [MSE]		One test/semester
3	Continuous Assessment Test 2 [CA2]		One/Semester
4	End Semester Examination [ESE]		One/Semester

#### Laboratory

Sr. No.	Assessment tools	Tool type	Time Span
1	Continuous Assessment Test1[CA1]	Direct Assessment	One test/semester
2	Continuous Assessment Test 2[CA2]		One test/semester
3	End Semester Examination [ESE]		One/Semester

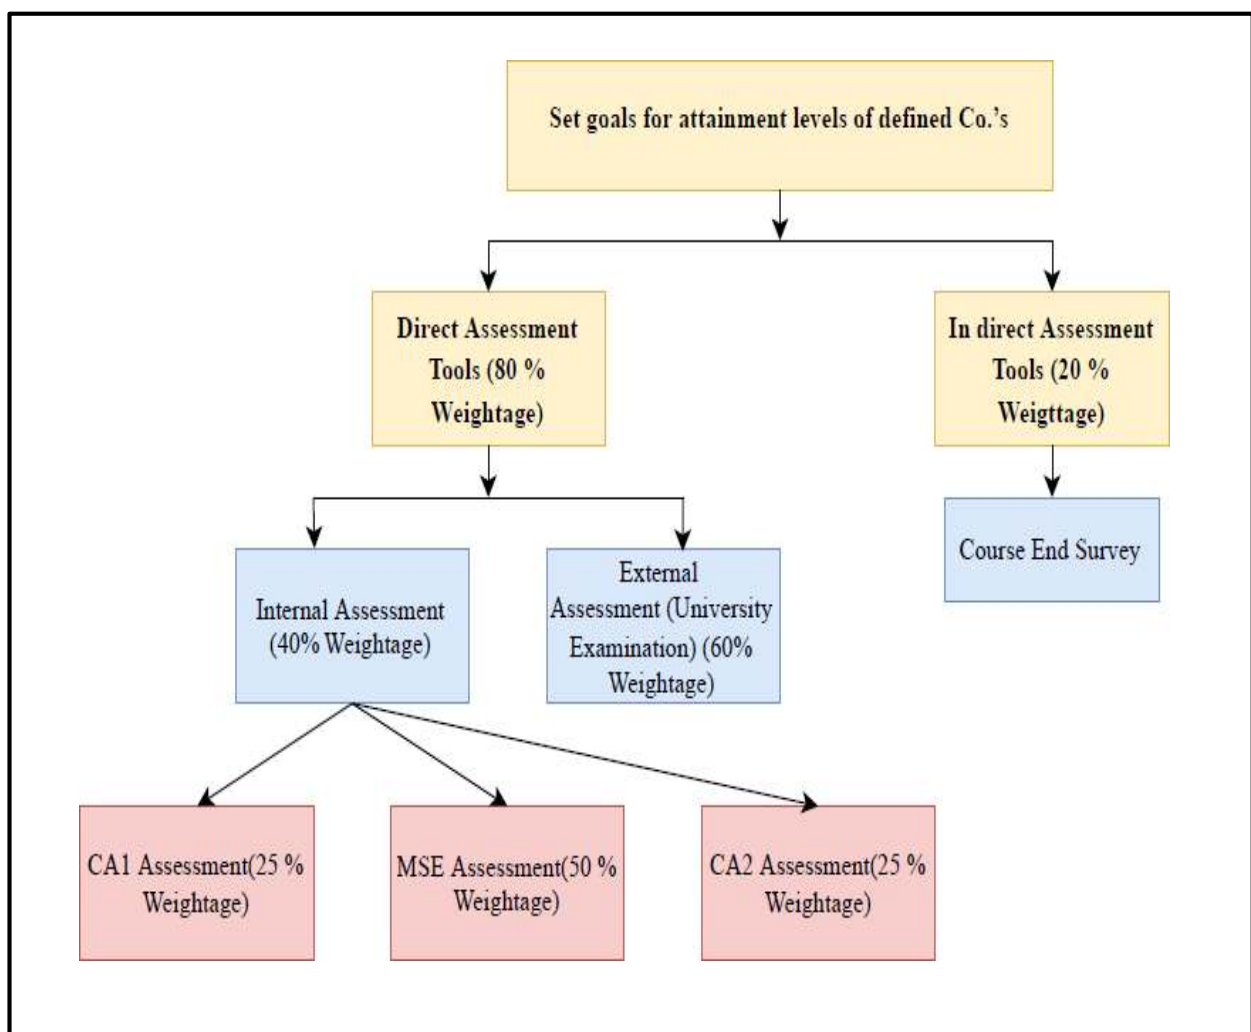

Course Outcomes for the entire course are defined and they are 4 in number. As the program is affiliated to DBATU, external assessment is done as per the evaluation scheme of university and internal assessment is done as per the policy of the program.

All courses are categorized into 2 categories

1. Courses with theory examination: CO attainment is calculated considering 60 % of university examination and 40% of internal semester evaluation (CA1, MSE CA2)
2. Courses with practical examination: CO attainment is calculated considering 60% internal evaluation and 40% university examination evaluation

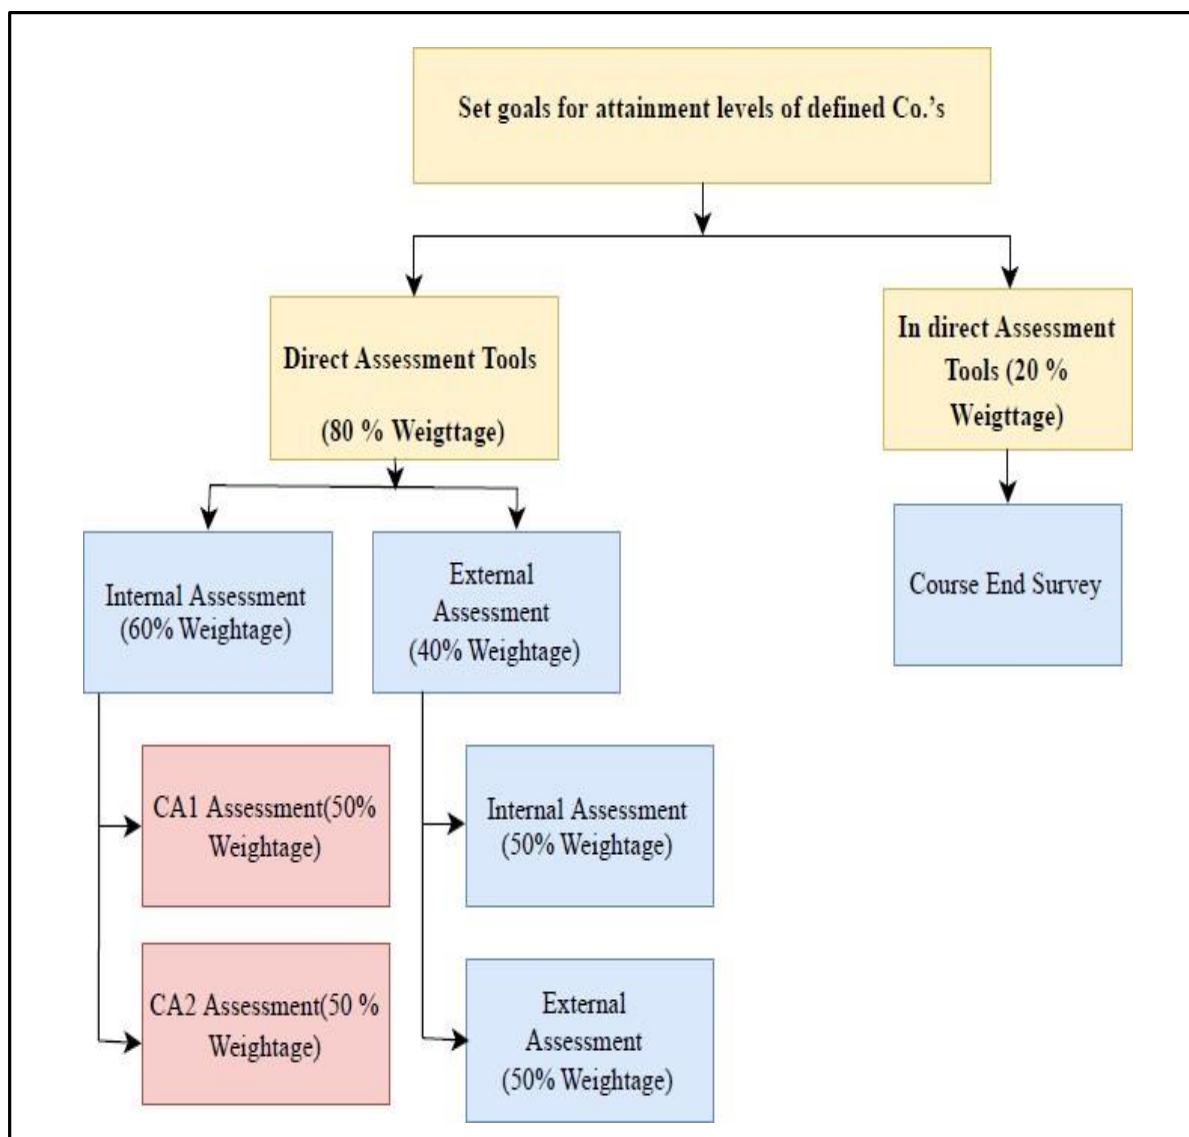

Attainment levels are assigned based on performance in Internal Semester Evaluation and University examinations

### 3.3 Attainment of Program Outcomes and Program Specific Outcomes (50)

#### 3.3.1 Describe assessment tools and processes used for measuring the attainment of each of the Program Outcomes and Program Specific Outcomes (10)

##### List of PO and PSO Assessment Tools:

Assessment tools are categorized into two types for Program Outcomes (POs), Program Specific Outcomes (PSOs).

1. Direct Assessment Method– Through CO attainment in relevant courses.
2. Indirect Assessment Method –Employer Feedback, Alumni feedback, Program Exit Survey.

##### Direct Assessment methods:

CO attainment of course shows knowledge and skills obtained by students from respective courses derived from their performance in the continuous assessment, unit tests, online examinations, in-semester examinations, end-semester examinations, reviews, assignments etc. These methods provide strong evidence of student learning.

##### Indirect Assessment methods:

Surveys of students are taken to know their learning. Feedback of various stake holders like employer, alumni etc. is taken to know the capabilities and necessary improvements.

For e.g.

**Employer survey:** To provide information about our graduate's skills and capability.

**Program exit survey:** To evaluate the success of program in providing students with opportunities to achieve the POs and PSOs every year.

##### Process for Evaluation and Assessment of POs & PSOs

The activity, questionnaires and frequency of feedback is defined by the Program for POs and

PSOs attainment through in direct tools.

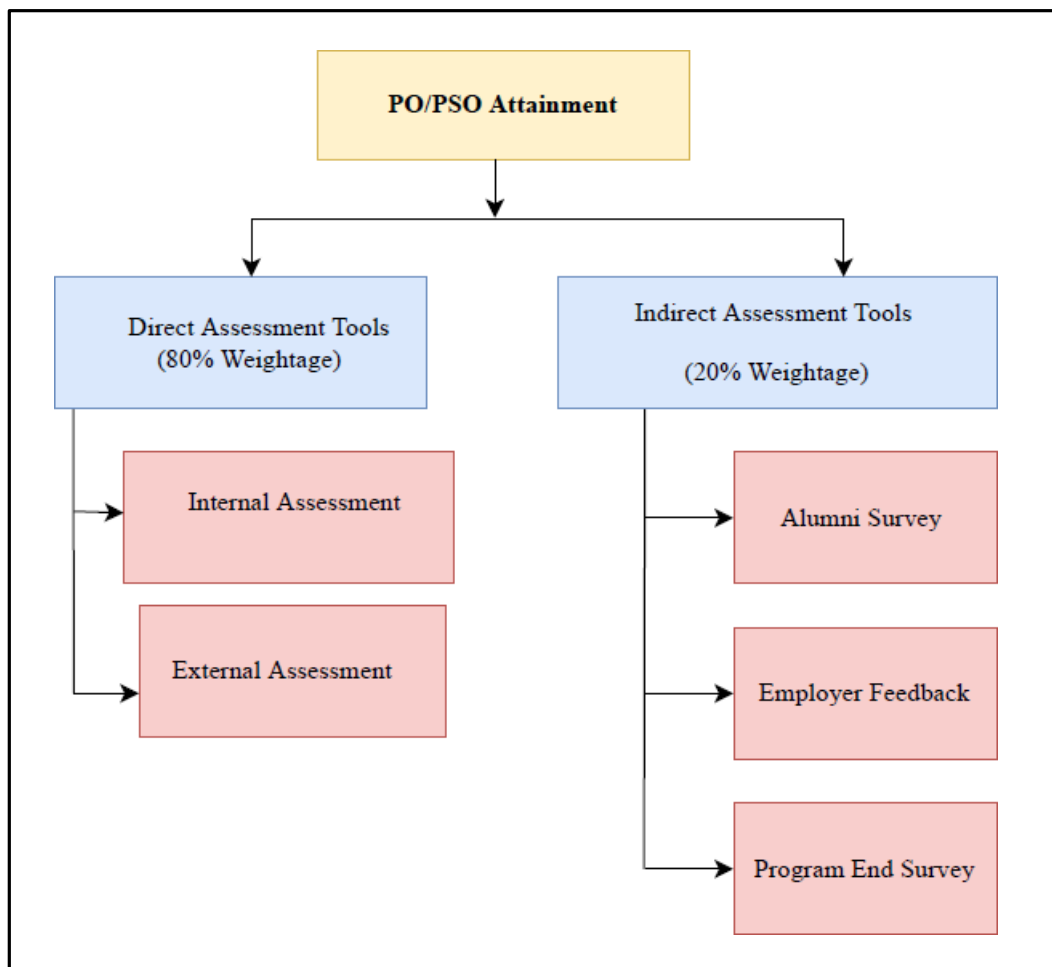

The CO-PO mapping and CO attainment is considered as reference for PO attainment as a part of direct tool. If the CO average attainment (Internal & External) is achieved at level 3 then the PO attainment level is same CO-PO mapping level.

If CO attainment level is 2/1/0 then CO - PO mapping level is transformed as per the CO attainment level as given below,

1. If CO attainment level is 1 and CO-PO mapping is at level 2 then PO attainment level will be  $(2*1)/3 = 0.667$ , here value 3 is maximum CO attainment level.
2. The same process is followed to calculate PSO attainment.

PO and PSO attainment are calculated by considering 80% weightage to direct assessment and 20% weightage to indirect assessment through surveys as shown in following figure

$$\text{PO/PSO Attainment} = 0.8 * \text{Direct Attainment} + 0.2 * \text{Indirect Attainment}$$

**Fig 3 Process of defining PO/PSO Attainment**

**➤ Direct Assessment Tools:**

Continuous Assessment Test1[CA1]
Mid Semester Examination [MSE]
Continuous Assessment Test 2[CA2]
End Semester Examination [ESE]
Lab Continuous Assessment Test 1
Lab Continuous Assessment Test 2

**➤ Indirect Assessment Tools:**

Course End Survey
Program End Survey
Employer Feedback
Alumni Survey

**3.3.2 Provide results of evaluation of each PO&PSO****(40)**

(The attainment levels by direct (student performance) and indirect (surveys) are to be presented through Program level Course–PO & PSO matrix as indicated).

**5.1 Student – Faculty Ratio (SFR)(16)**

(To be calculated at Department Level)

No. of UG Programs in the Department (n): 01

No. of PG Programs in the Department (m): 00

No. of Students in UG 2<sup>nd</sup> Year = u1

No. of Students in UG 3<sup>rd</sup> Year = u2

No. of Students in UG 4<sup>th</sup> Year = u3

No. of Students in PG 1<sup>st</sup> Year = p1

No. of Students in PG 2<sup>nd</sup> Year = p2

No. of Students = Sanctioned Intake + Actual Admitted Lateral Entry Students

(The above data to be provided considering all the UG and PG programs of the department)

S = Number of Students in the Department = UG1 + UG2 + UG3 + PG1 + PG2

F = Total Number of Faculty Members in the Department (excluding first year faculty)

$$\text{Student Teacher Ratio (STR)} = S/F$$

**Table B.5.1**

<b>Year</b>	<b>CAY(2022-23)</b>	<b>CAYm1(2021-22)</b>	<b>CAYm2 (2020-21)</b>

CAYm2 (2020-21)	11	0

## 5.2 Faculty Cadre Proportion

The reference Faculty cadre proportion is 1(F1):2(F2):6(F3)

F1: Number of Professors required =  $1/9 \times$  Number of Faculty required to comply with 20:1 Student-Faculty ratio based on no. of students (N) as per 5.1

F2: Number of Associate Professors required =  $2/9 \times$  Number of Faculty required to comply with 20:1 Student-Faculty ratio based on no. of students (N) as per 5.1

F3: Number of Assistant Professors required =  $6/9 \times$  Number of Faculty required to comply with 20:1 Student-Faculty ratio based on no. of students (N) as per 5.1

**Table B 5.2**

Year	Professors		Associate Professors		Assistant Professors	
	Required F1	Available	Required F2	Available	Required F3	Available
CAY (2022-23)	1.1	1	2.2	1	6.6	10
CAYm1 (2021-22)	1.1	1	2.2	0	6.6	12
CAYm2 (2020-21)	1.12	1	2.24	0	6.72	10
<b>Average Numbers</b>	<b>RF1=1.10</b>	<b>AF1=1</b>	<b>RF2=2.21</b>	<b>AF2=0.33</b>	<b>RF3=6.64</b>	<b>AF3=10.66</b>

$$\text{Cadre Ratio Marks} = \left[ \left[ \frac{AF1}{RF1} \right] + \left[ \frac{AF2}{RF2} \times 0.6 \right] + \left[ \frac{AF3}{RF3} \times 0.4 \right] \right] \times 12.5$$

$$\left[ \left[ \frac{1}{1.10} \right] + \left[ \frac{0.33}{2.21} \times 0.6 \right] + \left[ \frac{10.66}{6.64} \times 0.4 \right] \right] \times 12.5 = 20.38$$

If AF1 = AF2 = 0 then zero marks

Maximum marks to be limited if it exceeds 25

Example: Intake = 60 (i.e. total no. of students = 180); Required number of Faculty: 9;  
RF1 = 1, RF2 = 2 and RF3 = 6

**Case 1:** AF1/RF1 = 1; AF2/RF2 = 1; AF3/RF3 = 1; Cadre proportion marks =  $(1+0.6+0.4) \times 12.5 = 25$

**Case 2:** AF1/RF1 = 1; AF2/RF2 = 3/2; AF3/RF3 = 5/6; Cadre proportion marks =  $(1+0.9+0.3) \times 12.5 =$  limited to 25

**Case 3:** AF1/RF1 = 0; AF2/RF2 = 1/2; AF3/RF3 = 8/6; Cadre proportion marks =

$$(0+0.3+0.53) \times 12.5 = 10.4$$

### 5.3 Faculty Qualification

$FQ = 2.5 \times [(10X + 4Y)/F]$  where X is no. of regular faculty with Ph.D., Y is no. of regular faculty with M.Tech. F is no. of regular faculty required to comply 20:1 Faculty Student ratio (no. of faculty and no. of students required are to be calculated as per 5.1)

**Table B. 5.3**

Years	X	Y	F	$FQ=2.5x[(10X+4Y)/F]$
CAY (2022-23)	2	10	9.9	15.15
CAYm1 (2021-22)	1	12	9.9	14.64
CAYm2 (2020-21)	1	10	10.1	12.37
<b>Average Assessment</b>				<b>14.05</b>

$$CAY(2022-23)=2.5 \times [(10 \times 2 + 4 \times 10)/9.9] = 15.15$$

$$CAY(2021-22)=2.5 \times [(10 \times 1 + 4 \times 12)/9.9] = 14.64$$

$$CAY(2020-21)=2.5 \times [(10 \times 1 + 4 \times 10)/10.1] = 12.37$$

#### 5.4 Faculty Retention

No. of regular faculty members in CAY m2 (2020-21)=11

**Faculty Retention: 71.55%**

<b>Year</b>	<b>CAY m2 (2020-2021)</b>	<b>CAY m1 (2021-2022)</b>	<b>CAY (2022- 2023)</b>

### 5.5 Innovations by the Faculty in Teaching and Learning

Innovations by the Faculty in teaching and learning shall be summarized as per the following description.

Contributions to teaching and learning are activities that contribute to the improvement of student learning. These activities may include innovations not limited to, use of ICT, instruction delivery, instructional methods, assessment, evaluation, and inclusive class rooms that lead to effective, efficient, and engaging instruction.

Any contribution to teaching and learning should satisfy the following criteria:

- The work must be made available on Institute website
- The work must be available for peer review and critique
- The work must be reproducible and developed further by other scholars

These may typically include statement of clear goals, adequate preparation, use of appropriate methods, significance of results, effective presentation and reflective critique.

The faculty members of the Computer Science and Engineering department follow innovative methodologies in the classroom in addition to the conventional methods.

Conventional Methods Followed:

1. Blackboard
2. Sharing learning materials
3. Questioning in the class
4. **Innovative Methods.**

- **MOODLE (Modular Object-Oriented Dynamic Learning Environment)**

The institute has configured learning platform which is available 24 × 7 to faculty and students. Using MOODLE, faculty can create courses in their respective program. Faculties can upload assignment questions, course material, presentations, and other material needed by the students for study purpose. Students can be automatically enrolled to the course with access rights given by the faculty as per their role in the course. Using MOODLE, faculty can maintain attendance of students, monitor their progress in exams, and maintain student assignments, internal exam data.

The timetable for the weekly lectures and practical's is made available to the students well in advance and displayed on the department notice boards. Course syllabus is displayed and made available to the students via posts on the student Whatsapp groups.

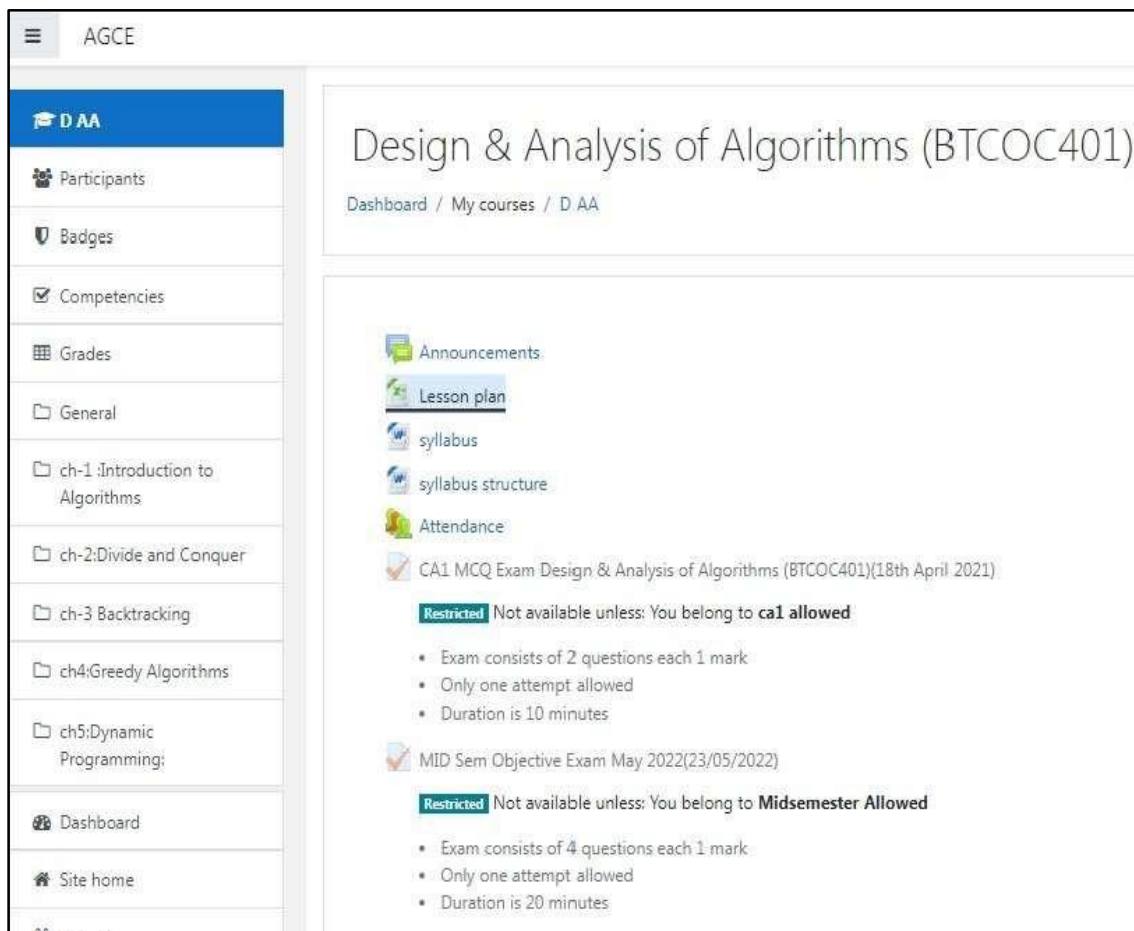

▪ **Lesson Plan:**

The lesson plan for the individual subject is prepared by the individual teacher, approved by the HoD and the corresponding Academic Monitoring Committee member of that department. The lesson plan is then conveyed to the students via MOODLE. This allows the students to understand the course structure.

▪ **Courses offered by Dept. :**

College organized for skill development and technical proficiency. The three-week internship is called “YUGAM” and is conducted during the month of November which is also the vacation period of the odd semester. The department offers this internship in the areas of Internet of Things (IoT), Artificial Intelligence (AI), and Web Design. Experts from the industry are invited to conduct the course and also give hands-on training to the students.

**Five days Hands-on Workshop on Web Designing and Development using HTML, CSS, PHP, JavaScript and MySQL**

**About Program:**

Three days Hands-on Workshop on Web Designing and Development using HTML, CSS, PHP, JavaScript and MySQL is conducted from Wednesday, 14th June 2023 to Monday, 19th June 2023, by the Computer Science and Engineering Department in association with The Code Culture.

**Figure 5.5.11 Inauguration of the workshop by Mr.Nikhil Kamble Software Developer at Code Culture.**

- **Open Book Tests:**

To improve the analytical skills of the students, open book tests are conducted by the individual faculty member.

- **Use of Interactive Boards:**

The faculty members of the department are encouraged to conduct lectures using smart boards. This enables a more vivid representation of the concept by the incorporation of videos to simplify the concepts

Figure 5.5.14 Faculty using Interactive Panels for conducting lecture

- **Industrial Visits**

Industrial visits are carried out to bridge the gap between institute and industry, students are able to know the current scerenio in industry and industry oriented problems, skills required in industries etc. to take students aware of current advances and requirements in the industry

## ▪ Quiz

Faculty members conduct quiz based on objective questions to assess the understanding of concepts by the students. The quiz is conducted using MOODLE platform. Objective Multiple-Choice Questions (MCQs) formulated using Bloom's taxonomy as a tool is employed in the quiz.

## ▪ NPTEL Courses:

Students are encouraged to enrol for National Programme on Technology Enhanced Learning, The efforts of the SPOC for NPTEL courses have been appreciated by IIT Bombay.

Students are encouraged to enrol for National Programme on Technology Enhanced Learning (NPTEL) and Massive Open Online Course (MOOC) courses to enhance self-learning. These courses are further incorporated in the syllabus itself by the university.

The efforts of the SPOC, Ms. Samina Y. Mulla for NPTEL courses have been appreciated by IIT Bombay.

▪ **Detailed Course Contents (Notes/PPTs, etc.):**

Reference books, notes, PowerPoint presentations, videos explaining concepts are uploaded by the faculty on MOODLE platform and made available to the enrolled students. Along with these, links to NPTEL course material are also provided on moodle.

**Figure 5.5.18 MOODLE containing course material of subject Database Systems.**

▪ **Attendance:**

Attendance is maintained on MOODLE and in hard copy form by the respective faculty members of the department. The department has the unique Guardian Faculty Mentor Scheme (GFM), under which fifteen students are assigned to a faculty member of the department. The GFM is responsible for counseling the students who have poor attendance, collecting feedback from the students for a difficult subject.

- **Project-based and Self-learning:** Students are encouraged to group in various domains such as Internet of Things, Artificial Intelligence, Compiler Design, Discrete Mathematics ,Data Structure etc. and work in the development of projects in that domain. Emphasis is given on industry-based projects, innovative ideas, and research-paper based project.

Assignments are given to the enrolled students by the faculty members. The students submit these assignments on MOODLE in an online form. The uploaded assignments are assessed by the faculty members and marks are given to them. These assignment marks are considered for internal termwork calculations.

Virtual Labs:

Virtual Labs is a complete Learning Management System configured in accordance with COEP, Pune. Virtual Labs does not require any additional infrastructural setup for conducting experiments at user premises. The simulations-based experiments can be accessed remotely via the internet. The subject experiments were conducted in an online mode using Virtual Labs during the COVID-19 period so as to minimize the loss of students.

The screenshot displays a web browser window with the URL `cse02-iiith.vlabs.ac.in/exp/arrays/`. The page title is "Arrays" under the heading "Computer Science and Engineering > Computer programming > Experiments". The page content is organized into a sidebar with sections: Aim, Theory, Pretest, Procedure, Simulation, Posttest, References, and Feedback. The main content area contains the following text:

**Aim**

## Arrays

**Theory**

**Pretest** An array is a group of items which have similar nature.

**Procedure** Arrays play a significant role in any programming language, as they allow the programmer to store more than one value in a variable. That is, you can use the same variable name to refer to all the values. An array is analogous to a shelf with many identical compartments. To identify a compartment, you just need to specify its position. Similarly, in a array variable, you can store many values of a single datatype. For example, 10 integers, 4 floating numbers, 12 characters etc. Not surprisingly, an array variable takes larger memory than a single variable of a datatype.

**Simulation**

**Posttest**

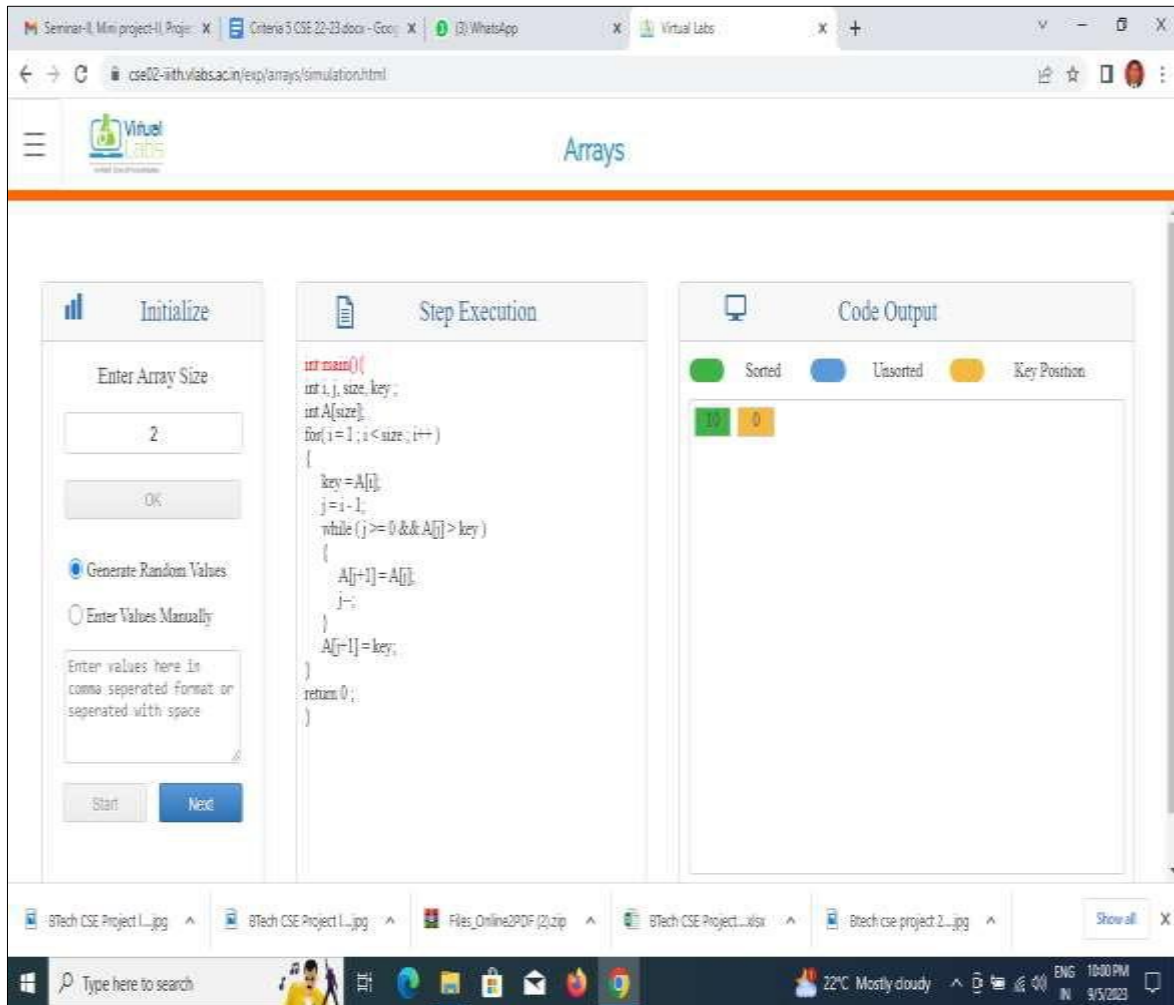

**References** We can use the same name to access the values, but how do we differentiate between them. To do this we use an index into the array. For example, take an array(`myArray`) of 100 integers, we can access the hundredth unit.

**Feedback**

```
myArray[99] = 3;
```

Notice something unusual? The index is usually zero based. So, the hundredth element is shown accessed using `[99]`. In other

### 5.7.2 Development Activities

Product Development:

#### 1. Innovative teaching aids:

##### 1. Dengue Malaria Prediction using CNN-

The people are suffering from the numerous viral conditions like Dengue, Malaria. This information is collected from the colorful hospitals and the analysis of data is done and vaticination of some conditions can be made. This system gives the vaticination as per position of the area.

*Description:*

Module 1:

In this system we detect the dengue or malaria virus based blood cell image and apply image processing with the use of machine learning algorithm

Module 2:

Detecting diseases based on symptoms.

A. *Algorithm:*

CNN is the basic algorithm used in the project which is as follows,

1. Classify dataset under labeled folders with blood samples images as CNN is supervised algorithm
2. Read dataset and prepare dataset in one file as pickle and NumPy.
3. Read features of all images and label (here name of dataset folder) of it using following functions,
  - a. Conv2D
  - b. Maxpool2D
  - c. REL activation for layers
  - d. Sigmoid activation for dense layer
  - e. Binary Cross entropy for loss calculation
4. Store it in model file

5. Get input image
6. Read features of input image
7. Compare features of stored features
8. Show label as prediction of nearly matched features.

## CONCLUSION

The health care terrain is set up to be rich in information, but poor in routing knowledge from the information. This is because we do not having effective and effective tools and styles. By applying the rearmost technology like machine literacy algorithms and ways and styles precious knowledge can be uprooted from the health care system can be veritably useful for farther improvement. Malaria and Dengue have a lot of bad runs which can harm mortal body veritably poorly. We are using Deep Learning algorithms to increase the delicacy of Malaria and Dengue Disease vaticination System. It's enforced as desktop operation in which stoner submits the miscellaneous data like textbook and image of blood cells symptoms. It retrieves retired data from stored database and deep literacy model and compares the stoner values with trained data set.

### 2. A Machine Learning Model for Venue Exploration and Recommendations.

Research Area:

- The system will run mainly for Machine Learning Domain.
- The area of research is the tourism and hospitality sector.

**Problem Statement:** Develop a standalone machine learning system that is capable of exploring venues in different cities in India by using the Foursquare API and Zomato API and accurately recommends the venues for new visitors by considering different input features.

**Proposed algorithm** Uses Foursquare API and Zomato API to fetch real time venues data including geospatial data and also uses K means and algorithms.

In a proposed system we will analyse the venues real time data fetched from Foursquare API and Zomato API and find the meaningful patterns from them.

We will apply the K-means and SVM algorithm to classify the data into different categories and evaluate the result based on the training, testing and validation set of the data.

The primary aims to provide a standalone, scalable, portable and accurate framework for large scale tree boosting. Proposed system will achieve the goals which minimise the risks and maximise the accuracy.

**Figure 5.7.3.1 Patent issuance of A machine learning model for venue exploration and recommendation.**

**Conclusion-** Anticipating the accuracy of our model we achieved an extra milestone from the existing system. The purpose of this project is to explore the venues mainly focused in Indian cities that the visitors could explore and visit during their stay.

Hence our system identified such venues and places using foursquare api and Zomato api and plotted it into interactive folium maps. Our algorithms classified data into different categories using k-means and svm algorithms and recommend venues based on the venue ratings and price preferences.

Also our machine learning based standalone web application is capable of handling and preprocessing large amounts of data fetched from api. Our system will reduce the cost of expenses and maximize accuracy with the minimum risks.

### 3. Student Information System

#### 1. Website Development

## 2. Back end database connectivity

### Website Design and Database Connectivity

Student information system (SIS) is a software application for educational establishments to manage student data. Student information systems provide capabilities for entering student test? and other assessment scores, building student schedules, tracking student attendance, and managing many other student-related data needs in a school, college or university

Student Information System (SIS) Vision:

1. Provide better services to students, faculty, staff, prospective students, administration, etc.
2. Provide meaningful, consistent, and timely data and information to end users.
3. Promote vision of senior management to address opportunities for change.
4. Update technology infrastructure for more effective and flexible delivery of new systems.
5. Promote efficiencies by converting paper processes to electronic form.

The mission of the Student Information System: project is to create an integrated technology environment for students,HOD , faculty, Staff and administration. Our goal is to focus on customers, services and integration for end users. The Student Information System has to accept processes and generate reports accurately and at any point of time any user can get the student information.

## 4) Student Attendance by Using Barcode Scan

Online attendance monitoring system (OAMS) is mainly focused on student attendance or any organisation employee attendance such as educational institutes for public and private sector on the basis of online class. Online attendance monitoring system will replace the manual method which takes a lot of time and is difficult to maintain. There are many technologies used for attendance but these technologies are the best for attendance. The Online Attendance Monitoring System is designed to record student data and store the data in a database. This software takes attendance electronically via QR code or face detection. Online Attendance

Monitoring System is based on a web server, which can be implemented on a computer or any android Phone. In this technology smart phones play an important role in our day to day life. Nowadays smartphones can solve most problems very easily and quickly. In this application, Python is a server side language.

**OBJECTIVES**

- The main specific objective of these project is to develop a portable Attendance monitoring system Which is handy and self-powered, to ensure the speed of the attendance recording process is faster than the previous system which can go as fast as approximately 3 second for each student , have sufficient memory space to store the database
- To be able to detect the face of an individual accurately face to face database and monitor the attendance with the help of QR code on the student database. Develop a database for the attendance monitoring system using face detection and QR code.

**Conclusion:**

In this system, we use face detection and add QR code. To capture the student data. This process is done on a particular website. For this process we use algorithms or code for face detection and also for QR code. It is an efficient method to store the attendance in the web site rather than wasting the paperwork. Online attendance monitoring systems can store the student data and this system also checks the absent student details.

**2. Project Posters:**

Students are encouraged to participate in Poster Presentation competitions. Posters prepared by the students and presented in innovative project competitions such as AVISHKAR, Smart India Hackthon and ANVESHAN are made available to the students for study and presentation purposes.

**3. Laboratory Manuals:**

The following Laboratory Manuals have been developed by the faculty members:

5) Approval dated 30/03/2023 for declaration of selection for proposals under DBATU-VC-RPG-2023 by Hon. Vice-Chancellor, Prof. (Dr.) K. V. Kale

It is pleasure, to place on record that in the first attempt to cultivate a quality research culture in DBATU family of faculty, we received Total - 214 Proposals. These were scrutinized by selection committee. Shortlisted proposals were granted presentation to panel of expert judges. With reference to no. 5 above, enclosed herewith is the list of proposals provisionally selected for financial grant under DBATU Vice Chancellor's Research promotion Grant (DBATU-VC-RPG-2023). All applicants are hereby directed to submit final copy of DPR to comply inclusion of:

- 1) review by experts after presentation
- 2) planning of research work distributed over 24 months
- 3) planning of allotted grant as distributed over first and second year with details of recurring and non-recurring requirement.

Format for submission of DPR remains as before. It is available on university website under "Research" tab. Applicants shall include full contact details such as name, address, email and cellphone number. DPR completed in all respects shall be emailed to [dbatu.vc.rpg@dbatu.ac.in](mailto:dbatu.vc.rpg@dbatu.ac.in) on or before 21/04/2023. A google form will be circulated to all applicants to collect summary of application. It is requested to note that University is in process to define norms of expenditure under DBATU-VC-RPG. These will be provided very soon and immediately after that 1<sup>st</sup> installment of grant will be disbursed. It is expected that these norms are strictly adhered while making expenditure. After review of performance after one year, there is scope of reappropriation of funds. Good performing projects may be allotted funds from poor performing projects. Sincere congratulations to all researchers and wish you all the best!!

## 5.8 Faculty Performance Appraisal and Development System (FPADS)

Faculty members of Higher Educational Institutions today have to perform a variety of tasks pertaining to diverse roles. In addition to instruction, faculty members need to innovate and conduct research for their self-renewal, keep abreast with changes in technology, and develop expertise for effective implementation of curricula. They are also expected to provide services to the industry and community for understanding and contributing to the solution of real-life problems in industry. Another role relates to the shouldering of administrative responsibilities and co-operation with other Faculty, Heads-of-Department and the Head of Institute. An

effective performance appraisal system for Faculty is vital for optimizing the contribution of individual Faculty to institutional performance.

The assessment is based on:

A well-defined system for faculty appraisal for all the assessment years (10)

Its implementation and effectiveness (20)

### **1. Performance appraisal system of the faculty:**

Annual self-assessment for the performance-based appraisal system is adopted as per the UGC notification 30<sup>th</sup> June 2010 approved by the Govt. of Maharashtra state vide GR dated 15<sup>th</sup> February 2011. Hence it is ensured that information on multiple activities is appropriately captured.

#### **Category I: Teaching, Learning and Evaluation Related Activities**

##### **Brief Explanation:**

Based on the teacher's self-assessment, API scores are proposed for (a) teaching related activities, (b) domain knowledge, (c) participation in examination and evaluation, (d) contribution to innovative teaching, new courses, etc. The minimum API score required by teachers from this category is 75. The self-assessment score should be based on objectively verifiable criteria wherever possible and will be finalized by the screening/selection committee.

#### **Category II: Co-curricular, Extension and Professional Development Related Activities**

##### **Brief Explanation:**

Based on the teacher's self-assessment, category II API scores are proposed for co-curricular and extension activities and Professional development related contributions. The minimum API required by teachers for eligibility for promotion is 15. A list of items and proposed scores is given below. It will be noticed that all teachers can earn scores from a number of items, whereas some activities will be carried out only by one or a few teachers. The list of activities is broad enough for the minimum API score required (15) in this category to accrue to all teachers. As before, the self-assessment score should be based on objectively verifiable criteria and will be finalized by the screening/selection committee.

**Category III: Research and Academic Contributions****Brief Explanation:**

Based on the teacher's self-assessment, API scores are proposed for research and academic contributions. The minimum API score required by teachers from this category is different for different levels of promotion and between university and colleges. The self-assessment score will be based on verifiable criteria and will be finalized by the screening/selection committee.

**Review of Performance Appraisal:**

The Performance-based Appraisal System (PBAS) forms are submitted through the Head of Department to the Academic Monitoring Committee (AMC), R&D and IPR Committee, and IQAC Committee. The Head of Department along with the AMC, R&D and IPR Committee, and IQAC form the review committee.

The advantage of PBAS is that each faculty becomes aware of self-weakness and tries to improve oneself in those areas so that he/she can score better in the next year.

Faculty with good API scores are given letters of appreciation and the faculty members having low API scores are personally counsel by the Head of the Institute.

**CATEGORY I: TEACHING, LEARNING AND EVALUATION RELATED ACTIVITIES**

**Brief Explanation:** Based on the teacher's self-assessment, API scores are proposed for (a) teaching related activities; (b) domain knowledge; (c) participation in examination and evaluation; (d) contribution to innovative teaching, new courses etc. The minimum API score required by teachers from this category is 75. The self assessment score should be based on objectively verifiable criteria wherever possible and will be finalized by the screening/selection committee.

**CATEGORY II: CO-CURRICULAR, EXTENSION AND PROFESSIONAL DEVELOPMENT RELATED ACTIVITIES.**

**Brief Explanation:** Based on the teacher's self-assessment, category II API scores are proposed for co-curricular and extension activities; and Professional development related contributions. The minimum API required by teachers for eligibility for promotion is 15. A list of items and proposed scores is given below. It will be noticed that all teachers can earn scores from a number of items, whereas some activities will be carried out only by one or a few teachers. The list of activities is broad enough for the minimum API score required (15) in this category to accrue to all teachers. As before, the self-assessment score should be based on objectively verifiable criteria and will be finalized by the screening/selection committee.

1. Student related co-curricular, extension and field based activities (such as extension work through NSS/NCC and other channels, cultural activities, subject related events, advisement and counselling)
2. Contribution to Corporate life and management of the department and institution through participation in academic and administrative committees and responsibilities.
3. Professional Development activities (such as participation in seminars, conferences, short term, training courses, talks, lectures, membership of associations, dissemination and general articles, not covered in Category III below)

**CATEGORY-III: RESEARCH AND ACADEMIC CONTRIBUTIONS**

**Brief Explanation:** Based on the teacher's self-assessment, API scores are proposed for research and academic contributions. The minimum API score required by teachers from this category is different for different levels of promotion and between university and colleges. The self-assessment score will be based on verifiable criteria and will be finalized by the screening/selection committee.

1. Research Papers published in:
2. Research Publications (books, chapters in books, other than refereed journal articles)
3. RESEARCH PROJECTS
4. RESEARCH GUIDANCE
5. TRAINING COURSES AND CONFERENCE /SEMINAR/WORKSHOP PAPERS
  - A. Refresher courses, Methodology workshops, Training, Teaching Learning Evaluation Technology Programs, Soft Skills development Program, Faculty Development Programs (Max: 30 points)
  - B. Papers in Conferences/ Seminars/ workshops etc.\*\*
  - C. Invited lectures or presentations for conferences/ symposia

\*Wherever relevant to any specific discipline, the API score for paper in refereed journal would be augmented as follows: (i) indexed journals - by 5 points; (ii) papers with impact factor between 1 and 2 by 10 points; (iii) papers with impact factor between 2 and 5 by 15 points; (iv) papers with impact factor between 5 and 10 by 25 points.

\*\* If a paper presented in Conference/Seminar is published in the form of Proceedings, the points would accrue for the publication (III (a)) and not under presentation (III (e)(ii)). Note: The API for joint publications will have to be calculated in the following manner: Of the total score for the relevant category of publication by the concerned teacher, the first/Principal author and the corresponding author/supervisor/mentor of the teacher would share equally 60% of the total points and the remaining 40% would be shared equally by all other authors.

Each laboratory maintains a dead stock register with details of all equipment's in laboratory. On regular basis maintenance of laboratory is carried out by in-house maintenance engineer. One lab assistant is assigned for two labs. IT manager, network administrators are also available for smooth functioning IT infrastructure.

#### Maintenance and Records

##### **6.3.1.1 Maintenances:**

- 1) Do's and Don'ts and Safety measures rules are displayed in each laboratory.
- 2) Well trained Staffs are available for maintenance of systems and software  
breakdown/maintenance register is maintained in the laboratories.
- 3) Systems are serviced frequently and, on damage or malfunctions the parts are replaced immediately.
- 4) All necessary software for the smooth conducting of the lab are installed in respective labs
- 5) Network administrator looks after the networking, Wi-Fi connectivity.
- 6) All necessary PC system regular software like Microsoft office, browser, lab software; antivirus software etc., is installed and maintained.

**Figure 6.3.1.1 Flowchart for Maintenance of Laboratory**

#### **6.3.1.2 : Ambience**

- 1) Laboratory area is spacious and furnished.
- 2) All laboratories have sufficient natural light and good ventilation.
- 3) Labs are also equipped with notice boards, black boards
- 4) Dusting and cleaning is done on regular basis

Department of Computer Science & Engineering has one separate dedicated project laboratory. This laboratory exclusively used for project work. The project lab has licensed software such as Windows operating system, Oracle, Visual Studio, Antivirus etc. Department also promote use of open source software such as Ubuntu, Network Simulators, Mat lab, Python etc. The project lab is equipped with computer system & Internet facility.

Sr. No.	Name of Lab	Name of equipment	No. of Machines	Specification	Software Installed
1	Ray Tomlinson (Project Lab 310)	Computers	25	DELL Optiplex 390 Ci3/4GBRam/500 GBHDD/DELL18. 5LCD/keyboard Mouse	Windows OS, Visual Studio, Oracle, Antivirus software, Turbo C++,

**Project Lab Utilization:**

- Project labs are utilized for project work by students.
- The students utilize the lab facility for making presentation, development of mini and major projects
- In the free time the students utilize the lab facilities for surfing on internet to gain new knowledge, ideas regarding project work.

Sr. No	Laboratory Name	Safety Measures
1	ML Laboratory	1) Safety instructions are placed in lab notice board.
2	Software Engineering /Operating System Laboratory	2) Only safe, secure, authentic & trusted web sites are permitted to access in laboratory.
3	Programming Laboratory	3) The fire extinguishers are installed near labs, staff and students are trained to use them in case of an emergency.
4	Database Engineering Laboratory	4) Systems and electrical fitting checking is carried by technician frequently.
5	Web technology laboratory	5) For emergency of electrical issue MCVs are mounted in all power lines. Separate earthling for lab has been provided.
6	Network Laboratory	6) Water house reels are provided in the corridor in case of some major fire situations.
7	Project Laboratory	7) All laboratories are fully ventilated along with full light and fan arrangement.
		8) Each laboratory maintains student entry register.
		9) One teaching faculty and lab assistant are in-charge of the overall maintenance of lab.

**Fig. 7.1a PO Target vs. PO Attainment for year 2022-23**

PO's	Target Level	Attainment Level	Observations
PO1: Engineering knowledge:			Apply knowledge of mathematics, science and engineering to solve engineering problems

PO1	2.34	2.62	Target achieved due to knowledge of engineering & basic concept
<p>Action1: Separate class is arranged for all direct second year admitted students to cover entire syllabus from starting with prerequisites</p> <p>Action2: More emphasis given on assignment solving, discussed case studies and puzzles</p>			
<b>PO2: Problem analysis:</b> Identify, formulate and analyses engineering problems			

PO2	2.28	2.51	1. Attained, First and second year students gain problem solving and analyzing skills through various basic courses like engineering mathematics III, Numerical methods & programming, Probability & Statistics, Discrete Mathematics
<p>Action1: Students are asked to solve different numerical assignments to identify, formulate and analyze engineering problems</p> <p>Action2: Remedial coaching is provided for slow learners for subject like mathematics-III</p> <p>Action3: Effects made for development of mini projects</p>			
<b>PO3: Design/development of solutions:</b> Design and develop solution for systems or processes that meet the specified needs for health & safety, cultural, societal and environmental considerations			
PO3	2.40	2.51	1. Attained, Few courses like Projects, Audit Courses(Basic Human Rights), National Social Services (Open Elective) covers specific needs for health & safety, cultural, societal and environmental considerations, • Some of the projects developed by the students are partially consider the environmental and social concerns • Different activities carried out under NSS Camp like tree plantation, no vehicle day, blood donation camp, swachta abhiyan contributed for wellness of society
<p>Action 1: Computer Science and Engineering students are involved in various social events organized by department like tree plantation, no vehicle day, blood donation camp, swachta abhiyan.</p> <p>Action 2: NSS organizes regularly various events such as PUC camp, Women's Safety app project, traffic awareness program etc.</p> <p>Action 3: Expert sessions are organized through different professionals of the society.</p>			
<b>PO4: Conduct investigations of problems:</b> Design and Conduct experiments as well as to analyze and interpret data to provide valid conclusions			

PO4	2.07	2.51	1. University Curriculum directly less contributing to attainment of this PO. 2. Attainment achieved through indirect attainment
<p>Action 1 : Students are exposed to practical problems through Hackathon, Industry Sponsor projects and Project based learning</p> <p>Action 2: More focus on planning and execution of Internship has been Initiated</p>			
<p><b>PO5: Modern tool usage:</b> Use the techniques, skills and modern engineering tools necessary practice</p>			
PO5	2.31	2.52	1. Attained in most of subjects use of open source tool is encouraged  2. It is observed good attainment is achieved for PO5
<p>Action 1: All faculty members of department focusing on utilizing digital modern tools for effective teaching which includes online expert/industrial talks, spoken tutorial, virtual labs, MOOC courses like NPTEL, Coursera etc.</p> <p>Action 2: Department also focuses on availability of modern equipment &amp; tools like availability Intelligent Interactive Panel and projectors in classroom ,industrial training, industry supported labs helped to attain PO5</p>			

<p><b>PO6: The engineer and society:</b> Apply the broad education necessary to understand the impact of engineering solutions in a global, economic and societal context</p>			
PO6	1.97	2.43	1. Attained students focused on limited real life problem 2. It is observed that incorporation of responsibilities towards solving societal and health issues needs to be focused.
<p>Action 1: To understand the safety concerns and social aspects, open elective course (National Social Service) selected, soft skills and skill development courses like business communication and social network are preferred for electives.</p> <p>Action 2: Projects based on environment, healthcare, security and social issues was emphasized.</p> <p>Action 3: Industry visit and industry internship, industry expert talk are arranged to make student aware about IT sector problems.</p>			
<p><b>PO7: Environment and sustainability:</b> Understand the impact of engineering solutions in environmental contexts and demonstrate the need of sustainable development</p>			
PO7	1.90	2.33	1.Target is achieved 2.Gap is observed in curriculum related to environment and sustainability

Action 1: Different initiatives such as tree plantation, no vehicle day, PUC camp organized			
Action 2: Promoted paperless work through online submission to moodle and use of one sided paper for notices on notices board etc.			
<b>PO8: Ethics:</b> Carry out professional and ethical responsibility			
PO8	2.06	2.33	<ol style="list-style-type: none"> <li>1. Target is achieved through good margin</li> <li>2. University curriculum has less inclusion of courses related to ethics</li> <li>3. Students practice ethical values through academic activity.</li> </ol>
Action 1: Separate GFM (Guardian Faculty Member) is appointed for batch of 20 Student for personal issues address, for counselling, for teaching ethics.			
Action 2: Different industry culture awareness programs are organized to make students aware about industrial ethics which includes session on paper publication, IPR, Plagiarism free content in seminar and project report.			
Action 3: Institute student have proper uniform which indirectly contribute to teach ethical values of uniformity.			
<b>PO9: Individual and Team work:</b> Function effectively as an individual and as a member or leader in multidisciplinary activities			
PO9	2.13	2.29	<ol style="list-style-type: none"> <li>1. Attained, interpersonal and intrapersonal communication is achieved through various curricular and extracurricular activities</li> <li>2. Courses like seminar, project, business communication, project based learning courses involve individual and team work</li> </ol>

<p>Action 1: Continues presentations are kept for seminar and project to enhance individual and team work</p> <p>Action 2: Encouragement to participate in various state/national, zonal, university level competition of project, sports. Participation in social activities. Various days/event origination and management by students only helped them to grow as an individual and to cooperate in team.</p> <p>Action 3: Tarunai- student's annual cultural program is organized every year wherein students actively participate to showcase their skill as an individual and as team</p> <p>Action 4: Industrial visit helps them to know various technical components.</p>			
<p><b>PO10: Communication:</b> Communicate effectively with engineering community and society at large</p>			
PO10	2.16	2.34	<p>1. Attained through students get acquainted with professional communication through subjects like business communication, spoken english, C2C activity</p> <p>2. Skills of documentation, communication, presentation during project and seminar is satisfactory but due to rural background there is scope for improvement.</p>
<p>Action 1: In academic time table separate time slot allotted for soft skill improvement session. Special couch is appointed for the same.</p> <p>Action 2: Student participated in various online soft skill development courses offered by various MOOC platforms like NPTEL, Coursera.</p> <p>Action 3: Different cultural events, sports, social activities, project competition, industrial visits, Industrial training contributed in students soft skill development</p>			
<p><b>PO11: Project management and finance:</b> Demonstrate engineering and management principles to carry out projects in multidisciplinary environment, as a member/leader in a team</p>			
PO11	1.96	2.34	<p>1. PO is attained 2. Students are able to apply knowledge and understanding of the engineering and management principles to their project work, as a member and are able to work effectively in a team.</p>
<p>Action 1: Department student participated in various competition project competition and secured prizes.</p> <p>Action 2: Department is having MOUs with various industries. Number of projects are industry sponsored projects which helps student to learn project management and finance</p>			

<b>PO12: Lifelong learning:</b> Recognize the need for and an ability to engage in life-long learning			
PO12	1.93	2.41	1. Target is Achieved 2. Student acquire ability to learn new development platform, technology ,programming language
Action 1: Students are encouraged to do MOOC courses like NPTEL, Coursera etc			
Action 2: Students participation in various activities like extracurricular, project competition developed their lifelong learning ability			
<b>PSO1</b> Ability to learn latest software technology in the area of computer science & engineering			

PSO1	1.94	2.20	Attained, Emphasis given on domain based learning such as web technology, IOT, artificial intelligence etc through internship ,project and seminars
Action 1: Student are guided and directed to apply knowledge of core computer science subjects and latest technology in their projects.			
Action 2: Industry/Academic Expert's lecturers from industry are organized for various courses			
Action 3: Department proved different facilities to encourage bright students which involves advanced courses of NPTEL, Coursera.			
Action 4: Weak students are supported through various activities like personal counselling, action plan as per there weakness, remedial classes, to solve questions of previous year's papers			
<b>PSO2</b> Ability to develop software solution for catering to the environmental and societal needs.			
PSO2	1.79	2.11	Attained, Courses such as Full Stack Development, Machine Learning, Artificial Intelligence, and Internet of Things helped to develop software solution.
Action 1: More emphasis is given on student's exposer to industry culture through industrial visit, internship, industry mentorship for project, Industry expert's sessions			
Action 2: Created awareness among student about environmental and societal needs through activities included in open elective national social services, core subject basic human rights.			
Action 3: Students are guided to use latest technology like AI.ML, IOT and use them in their projects by considering societal and environmental need.

**Fig. 7.1b PO Target vs. PO Attainment for year 2021-22**

PO's	Target Level	Attainment Level	Observations
<b>PO1: Engineering knowledge:</b> Apply knowledge of mathematics, science and engineering to solve engineering problems			
PO1	2.27	2.67	Target is accomplish, projects and seminars has been included to the curriculum to help students understand engineering
Action 1: Expert lecture series is arranged to strengthen basic core engineering courses.			
<b>PO2: Problem analysis:</b> Identify, formulate and analyses engineering problems			

PO2	2.21	2.64	Target is attained.
Action 1: More emphasis is given on problem analysis, idea generation.			
<b>PO3: Design/development of solutions:</b> Design and develop solution for systems or processes that meet the specified needs for health & safety, cultural, societal and environmental considerations			
PO3	2.30	2.69	Target is attained, students has identify real life problem statements and found its solution through development.
Action: 1. More focus will be given to critical thinking, experiment and solving daily life problem using modern technology tool.			
<b>PO4: Conduct investigations of problems:</b> Design and Conduct experiments as well as to analyze and interpret data to provide valid conclusions			
PO4	1.94	2.66	Target is attained. The student were assigned to do case study of industry scenario and present it during industry visit.
Action: 1. Use of NPTEL as teaching resources has been implemented.			
<b>PO5: Modern tool usage:</b> Use the techniques, skills and modern engineering tools necessary practice			
PO5	2.26	2.67	Target is attained. Use of practical oriented approach for implementation of techniques.
Action 1: More thrust will be given for the use various modern tools like prolog, tensorflow and other star UML, edraw MAX.			
<b>PO6: The engineer and society:</b> Apply the broad education necessary to understand the impact of engineering solutions in a global, economic and societal context			
PO6	2.06	2.61	Target is attained. The main aim of Engineer is to solve society related technical problems through their technical skills.

Action 1: A strong bond will be forged with the society by addressing their needs by taking activities like exhibition, group discussion on societal related Engineering problems and professionalism are organized.			
<b>PO7: Environment and sustainability:</b> Understand the impact of engineering solutions in environmental contexts and demonstrate the need of sustainable development			
PO7	1.93	2.70	Target is attained. Concern of students towards the environmental issues are incredible. Students approach towards the sustainable growth is developed.
Action: 1. The various environmental issues such as global warming, pollution, E-waste will be highlighted by conducting various awareness programs.			
<b>PO8: Ethics:</b> Carry out professional and ethical responsibility.			
PO8	1.75	2.73	Target is attained. The awareness and importance's about ethics and principles of professionalism has been create
Action: 1. The importance of ethical behavior in engineering students, will be emphasized and expert talks on ethics in engineering domain will be organized.			
<b>PO9: Individual and Team work:</b> Function effectively as an individual and as a member or leader in multidisciplinary activities			
PO9	2.07	2.76	Target is attained. It is observed that the students are working as a team while performing mini project, final projects, addressing industrial problems through solution.

Action 1: Soft skills programs and expert lecture will be arranged to highlight its importance and necessity in daily life and also industry in particular.			
<b>PO10: Communication:</b> Communicate effectively with engineering community and society at large			
PO10	2.1	2.76	1. Attained through students get acquainted with professional communication through subjects like business communication, spoken english, C2C activity 2. Skills of documentation, communication, presentation during project and seminar is satisfactory but due to rural background there is scope for improvement.
Action 1: In academic time table separate time slot allotted for soft skill improvement session. Special couch is appointed for the same.			
Action 2: Student participated in various online soft skill development courses offered by various MOOC platforms like NPTEL, Coursera.			
Action 3: Different cultural events, sports, social activities, project competition, industrial visits, Industrial training contributed in students soft skill development			
<b>PO11: Project management and finance:</b> Demonstrate engineering and management principles to carry out projects in multidisciplinary environment, as a member/leader in a team			
PO11	1.95	2.62	Target is attained. The students has adequate knowledge of project management and budget of it
Action: 1 Mini projects from second and third year helps students to cultivate managerial skills and to clarify the fundamental of Engineering with getting ideas to calculate budget for the completion of Projects.			
<b>PO12: Lifelong learning:</b> Recognize the need for and an ability to engage in life-long learning			
PO12	2.03	2.66	Target is attained. The concept of lifelong learning is inculcated amongst the students.
Action: 1. Students will be motivated to participate in co-curricular and extracurricular activities.			
2. Expert lectures of various fields and career development programs will be arranged.			
<b>PSO1</b> Ability to learn latest software technology in the area of computer science & engineering			

PSO1	1.99	2.66	Attained, Emphasis given on domain based learning such as web technology, IOT, artificial intelligence etc through internship ,project and seminars
<p>Action 1: Student are guided and directed to apply knowledge of core computer science subjects and latest technology in their projects.</p> <p>Action 2: Industry/Academic Expert's lecturers from industry are organized for various courses</p> <p>Action 3: Department proved different facilities to encourage bright students which involves advanced courses of NPTEL, Coursera.</p> <p>Action 4: Weak students are supported through various activities like personal counselling, action plan as per there weakness, remedial classes, to solve questions of previous year's papers</p>

**7.2 Academic audit and actions taken thereof during the period of assessment (10)**

Institution efficiently plans and monitors the activities for the effective implementation of the curriculum. Every faculty member gives a choice of the subjects for the new semester as per their expertise. Academic planner and departmental calendar is prepared from the calendar published by the University.

On Moodle course material is prepared by each faculty member and uploaded it before commencement of semester. Moodle consists of eight sub folders as shown below:

**Fig. 7.2a Moodle sub folders**

**I. Academic Audit:**

Academic audit is a one of the best practice to ascertain adequate and operative excellence assurance mechanisms in terms of procedures, their applicability, that ensures quality input and subsequently quality output. The main aim of conducting academic audit is to assess the academic performance of both individual faculty and the whole department. This practice develops accountability of the individual members with regards to their academic performance. By conducting academic audit, the strength and weakness of the department can be assessed. The quantification of the academic performance helps us to compare the academic performance of departments and members of faculty.

**Academic Audit:**

The institute has well defined process of academic audit to evaluate the performance of different departments of the Institute such as; teaching process, laboratory maintenance and various departmental activities. Following are the objectives of academic audit

1. To assess the academic performance of individual faculty in a department.
2. To assess the academic performance of the department as a whole.
3. To identify the strengths and limitations of the department.
4. To make the individual faculty and the department accountable
5. To assure quality working of laboratory.

In the implementation of this process, the Internal Quality Assurance Cell (IQAC) constitutes an Academic Audit Committee (AAC) to audit each department twice in a semester, i.e., one at just before the commencement of semester while the other is just before the end of that semester. The members of AAC are given below:

1. Chairperson of IQAC.
2. Coordinator of IQAC.
3. One Professor/Associate Professor from the respective department.
4. One Professor/Associate Professor from the other department

 Professor,  
 Walchand College of Engineering,  
 Sangli

Respected Sir,

On behalf of management of Samarth Educational Trust Arvind Gavali College of Engineering, Satara, it gives me immense pleasure to invite you as an expert for DBATU Academic Audit of our Institute on 18<sup>th</sup> November 2022, Friday 11:00 am

Samarth Educational Trust has been actively associated with educational activities since its inception in 1988 and is developing fast into a prime educational center in the western region of Maharashtra. It has presently the following constituent institutes under its umbrella:

- Arvind Gavali College of Engineering & Polytechnic (AGCE)
- Sawkar Homeopathic Medical College
- Arvind Gavali College of Pharmacy (B. Pharm)
- Sawkar Pharmacy College (D. Pharm)
- Sawkar Science College

AGCE is one of the most rapidly evolving engineering institute which is affiliated to Dr. Babasaheb Ambedkar Technological University, Lonere. Institute is having lush green, eco-friendly campus conducive to overall development of the students leading to their enhancement in employability. The Institute is offering B.Tech. in Mechanical, Civil, Electronics and Telecommunication, Electrical, Computer Science. Also M.Tech. in Mechanical (Heat Power Engineering). NATIONAL EDUCATION EXCELLENCE AWARDS & CONFERENCE 2021 has presented our college as **MOST PROMISING & TRUSTED ENGINEERING COLLEGE OF THE YEAR 2021 MAHARASHTRA.**

Academic audit helps to assess the academic performance of the Institute and also to get suggestions for overall progress of the Institute.

It is our honor and pleasure to invite you as an expert on 18th November 2022, Friday Kindly grace the occasion with your presence.

Thanking you,

Principal

Dr. Vilas Pharande

- Institute has a Training and Placement cell, responsible for grooming the students to be industry ready and provide opportunities for placement.
- T&P cell organizes various programs for overall personality development of the students. Also Training placement coordinator helps students search Internship opportunities in Software industry.
- Experienced industry professionals in the respective domain of job profiles are invited for guest lectures.
- Through these activities, the students are made aware of the opportunities in various fields along with the required job profile. At the same time, they get a chance to interact with these industry professionals to take advantage of their experience in respective field of expertise.
- Career guidance books such as GRE, GATE, TOEFL are available in the library.
- In addition, with T&P Cell, Institute has initiated Campus To Corporate Activity to help students improve communication skills, interpersonal skills, societal awareness and inculcate ethics.
- Institute has initiated aptitude training sessions in order to train students for placement aptitude tests.
- The aim of entrepreneurship development cell is to improve and generate a culture of innovation amongst the students and budding entrepreneurs and start their own business. Under EDC Institute has organized sessions to motivate and guide students to work on ideas in commercial aspect.

#### 8.4. Attainment of Course Outcomes of first year courses (10)

8.4.1 Describe the assessment processes used to gather the data upon which the evaluation of Course Outcomes of first year is done (5) Data collection methods:

- Two Internal CA Tests of 10 marks and One MSE of 20 marks are conducted per semester and Question papers are set according to defined course outcomes.
- Final examination of 60 marks is conducted by the University.
- Evaluation of course outcome is based on Internal Tests and university examination with weighted average 40:60.
- Lab assessment is based on practical performance of students and two CA practical exam of 15 marks.

### 8.5.2. Actions taken based on the results of evaluation of relevant POs (5)

#### Academic Year-2022-23

#### POs Attainment Levels and Actions for Improvement- (2022-23)

POs	Target Level	Attainment Level	Observations
PO 1 : Engineering Knowledge			

PO 1	2.00	1.30	Target is not attained ● The students have a limited grasp of the core principles of engineering.
Action: 1. Greater emphasis will be placed on thoroughly comprehending the fundamentals of engineering.			

**PO 2 : Problem Analysis**

PO 2	2.20	1.33	Target is not attained ● The students are experiencing a deficiency in their literature review outcomes and in identifying engineering-related issues.
Action: 1The goal for the upcoming academic year is to exert efforts in order to attain the predefined target 2. There will be an increased emphasis on generating fresh ideas to address these issues.			

**PO 3 : Design/development of Solutions**

PO 3	2.14	1.39	Target is not attained ● In the realm of research and development, the students faced challenges in recognizing issues concerning public health and safety, as well as addressing cultural and societal needs.
Action: 1. The same target will be considered for the next academic year. 2. More focus will be given to practicals, experiments, projects to improve their skills and not merely learning.			

**PO 4 : Conduct Investigations of Complex Problems**

PO 4	2.44	1.29	Target is not attained ● Students are facing challenges when it comes to conducting investigations into complex problems.
Action: 1. The goal for the upcoming academic year is to exert efforts in order to attain the predefined target 2. As teaching and learning is at an advanced level, more emphasis is given on the use of latest technology.			

**PO 5 : Modern Tool Usage**

PO 5	<b>1.44</b>	<b>1.25</b>	Target is not attained <ul style="list-style-type: none"> <li>● There is a need for greater utilization of the National Program of Technical Enhance Learning (NPTEL) as a teaching resource, with a focus on integrating more contemporary tools and technologies</li> </ul>
<p>Action: 1. The objective for the forthcoming academic year is to dedicate efforts toward achieving the predetermined goal.</p> <p>2. More thrust will be given for the use of various modern tools like ICT panels, Moodle, PPTs, FTPs, and Digital Library.</p>			

#### PO 6 : The Engineer and Society

PO 6	<b>1.43</b>	<b>0.94</b>	Target is not attained <ul style="list-style-type: none"> <li>● The students faced challenges in adequately evaluating societal, health, safety, legal, and cultural concerns.</li> </ul>
<p>Action: 1. The aim for the upcoming academic year is to focus efforts on reaching the established goal.</p> <p>2 A strong bond will be forged with society by addressing their needs by conducting activities like exhibitions, and group discussions on societal needs related to engineering and professionalism, will be organised.</p>			

#### PO 7 : Environment and Sustainability

PO 7	<b>2.25</b>	<b>1.30</b>	Target is not attained - The students' concerns regarding environmental issues lack depth, and there is a need for improvement in their approach to sustainable development.
<p>Action: 1. The goal for the upcoming academic year is to commit efforts towards achieving the established objective.</p> <p>2. The various environmental issues such as global warming, pollution, and e-waste will be highlighted by conducting various awareness programmes.</p>			

#### PO 8 : Ethics

PO 8	<b>1.40</b>	<b>1.09</b>	Target is not attained - Students need improvement in their awareness of the importance of ethics and professional principles.
Action: 1. The aim for the upcoming academic year is to devote efforts to accomplish the set objective. 2. The importance of ethical behaviour in engineering students, will be emphasized and expert talks on ethics in engineering domain will be organized.			

**PO 9 : Individual and Team Work**

PO 9	<b>2.29</b>	<b>1.35</b>	Target is not attained - It has been observed that students need to enhance their ability to work both individually and as part of a team when working on projects
Action: 1. The goal for the approaching academic year is to allocate efforts towards achieving the predetermined aim. 2. The students will be motivated to participate in co curricular and extra curricular activities.			

**PO 10 : Communication**

PO 10	<b>2.26</b>	<b>1.42</b>	Target is not attained - It has been noted that students require a stronger focus on improving their proficiency in linguistic, public speaking, communication, and computing skills
Action: 1 We'll aim to achieve the same target in the upcoming academic year 2. Soft skills programmes and expert lecture will be arranged to highlight its importance and necessity in daily life and also the industry in particular.			

**PO 11 : Project Management and Finance**

PO 11	<b>2.00</b>	<b>1.13</b>	Target is not attained - The students' knowledge of project management is inadequate.
Action: 1. The same target will be considered for the next academic year. 2. Mini projects from the first year itself will help the students' to improve their understanding of the topic, cultivating team spirit, problem-solving ability, and managerial skills will be included.			

**PO 12 : Life-long Learning**

PO 12	<b>2.00</b>	<b>1.24</b>	Target is not attained - Greater emphasis will be placed on instilling the concept of lifelong learning among the students.
Action: 1. We will put in efforts to attain the identical target in the forthcoming academic year. 2. The students will be motivated to participate in co-curricular and extracurricular activities. 3. Expert lectures pertaining to various fields and career development programmes will be organized.			

<b>CRITERION 09</b>	<b>STUDENT SUPPORT SYSTEMS</b>	<b>50</b>
-------------------------	--------------------------------	-----------

### **9.1 Mentoring system to help at individual level (05)**

The role of the faculty as a Guardian Faculty mentor is one of nurturing support for a student during the transition period in academic, professional as well as personal augmentation. In all departments of the Institution, mentoring is a continuous process where Guardian faculty mentors serve as a resource who will respond to many questions, that the student might pose; support students in choosing course work that meets their needs and interests; encourage students to actively participate in seminars and laboratory work that are realistic in scope; and counsel the students on any other academic, professional, personal growth, etc., for necessary advice/guidance/help.

#### **Guardian Faculty Mentor:**

- For monitoring the overall development of students and encourage the students to participate in all grooming activities conducted by various cells, one faculty is assigned as Guardian Faculty Mentor to every batch consisting the 15 students.
- The guardian faculty mentor conducts periodical meeting with students in order to evaluate their academic performance and proper orientation towards the program, as well as guide them to rectify any shortcomings and to solve any problems.
- Every GFM is in contact with parents of respective students and communicates them about student performance, attendance and any other issues.
- GFM discuss the various policies conducted by the Institute with students and helps them take maximum benefits from them.
- Students are motivated and guided to participate in co-curricular and extra-curricular activities.

GFM helps students for solving their personal issues such as psychological issues, confidence level, negative emotional management, leadership quality, time management, teamwork etc.

#### **Following issues are discussed with students:**

- i. Attendance
- ii. Personal issues
- iii. Behavior
- iv. Understanding problems

- v. Difficulty in writing/ speaking
- vi. Confidence level
- vii. Hostel/Food issues(Homesickness)
- viii. Girl's/Women's issues
- ix. In case of any other observations, it is noted and discussed.

### **1. Class Advisor:**

A class Advisor is appointed to monitor & coordinate the activities of the respective class. Class Advisor maintains a record of defaulter list, roll call list, etc. and mentors the students related to academic performance, less attendance, etc.

### **2. Academic Guidance:**

- Support to improve performance of students: Based on the previous year's result and Mid Semester Examination performance and overall behavior of students; weak and bright students are identified in each class and appropriate mentoring is done to improve the performance of weak students and motivate bright students.
- Remedial classes are conducted for students who have backlogs. Unit wise discussion is conducted in each remedial session.
- Program coordinator, course coordinators, class Advisors & GFMs continuously communicate with students and motivate them to perform well in academics and enhance their knowledge through various modes like Add on courses, internships, etc.

Parents-Teacher Meeting is held once in semester to brief the progress of their wards to their parents. This process has improved students' academic performance, attendance and participation in co-curricular and extra-curricular activities.

### **3. Professional and Career Guidance:**

- A dedicated **Training & Placement Coordinator (TPC)** is appointed by the institute to coordinate the placement related activities.
- Various career guidance sessions like higher education opportunities in India and abroad, latest trends in industries etc. are conducted throughout the year for students to enhance their vision and broaden their mindset to lead their lives on a successful

career path.

- Apart from higher education opportunities, sessions like aptitude training, group discussion sessions, interview preparations, etc. are regularly conducted by TPCs to improve students' performance in placement activities for various companies.
- On the technical front, several technical training sessions are conducted by course coordinators and industry persons alike for students to keep them updated with latest technical knowledge.
- Students are encouraged to take part in various co-curricular & extra-curricular events to ensure their all-round development by participating and organizing such events at regular intervals.

**Efficacy of Mentoring System:**

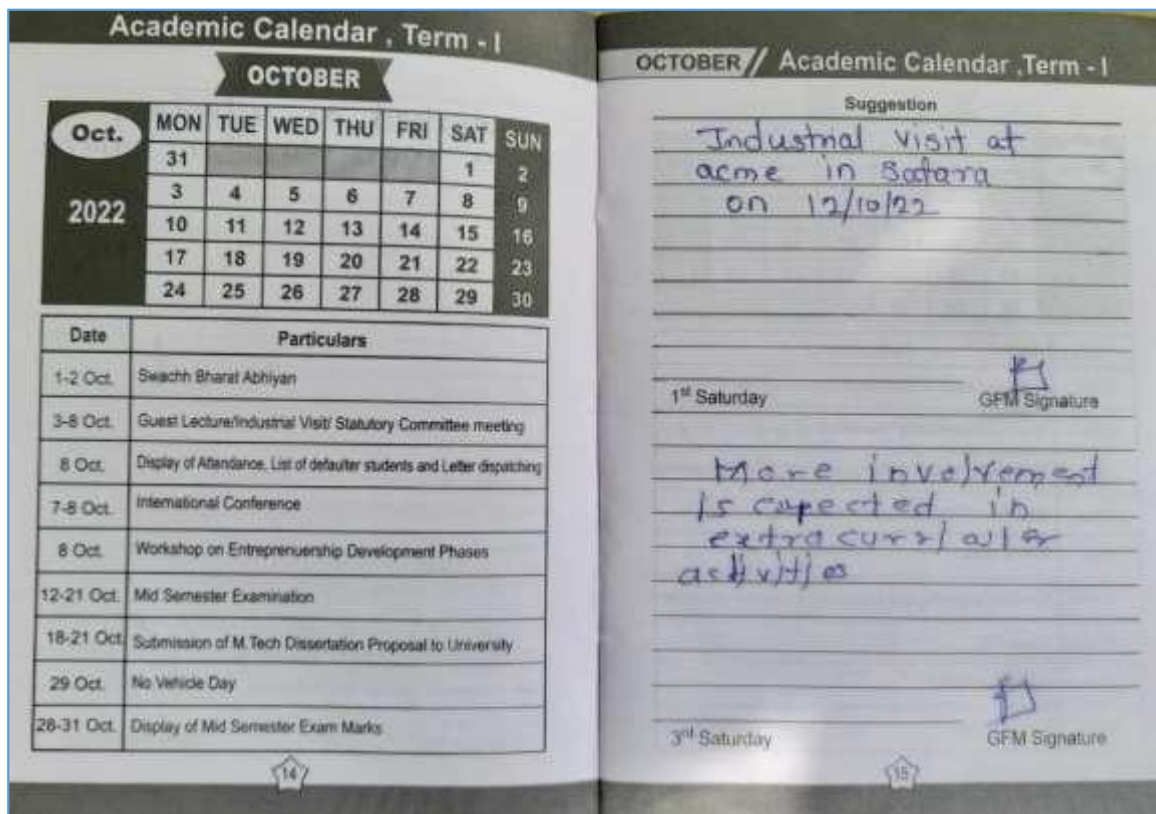

- After mentoring and counseling it was observed that the academic performance of students improved.
- Also some of abilities such as time management, teamwork, goal setting and softskills were improved.
- In some cases, it helped students to overcome insecurities about their abilities as an engineering student and encouraged them to prepare for the next steps in their academic program and career.

## 9.2 Feedback analysis and reward/corrective measures taken, if any(10)

**Feedback collected for all courses: Yes**

The feedback process helps course coordinators understand the lacunas and scope for improvements. Also it appreciates the hard work done by the course coordinators.

**Feedback collection process:**

### 9.2.a : Feedback Collection and analysis Process

The teaching-learning system followed by any educational institution needs continuous refinement. To facilitate this process of continuous refinement, the institution has adopted a feedback system that takes suggestions from students of each program.

This eventually helps to fine-tune the teaching-learning process and the curriculum. The institution follows a well-defined feedback system. It has been identified as one of the important processes in our teaching learning system.

The students those who have attendance more than average are given an opportunity to express their opinion with regards to effectiveness in teaching by a teacher, which are detailed in the feedback format. The feedback from students regarding the quality of teaching is collected twice in a semester, using Google apps. This also helps the teachers in improving their teaching methodology.

Feedback is collected online twice in a semester (either through Moodle / Google Form) from students with above average attendance. This feedback is completely anonymous and students are encouraged to give their honest feedback.

The feedback is collected on five-point scale

Give 3 Observation/Suggestion to improve the overall teaching learning experience of respective teachers

1. We need industrial experts for teaching , more guest lectures , workshops should be arranged for interview training.
2. Communicate with every students.
3. Teaching Learning Process is good.
4. Learning experience are wonderful for all subjects.
5. Increase soft skills program.

### Students Feedback Analysis procedure

The staff appraisal committee members at program level collect the online feedback and prepare the consolidated report. The staff appraisal committee members analyze feedback and discuss it with program coordinator and accordingly corrective and preventive measures are carried out if necessary. This feedback is communicated to the concerned faculty through program coordinator.

### Effectiveness of Feedback System:

- Faculties having poor feedback in mid semester were counseled by program coordinator. During counseling program coordinator gave suggestions for the improvement to the concern faculty.
- It was observed that after counseling, end semester feedback of concern faculty was improved.

### Corrective Measures:

**Table 9.2.a: Year-wise corrective measure data**

Academic Year	Suggestion recognized through Feedback Process	Corrective actions taken
2022-23	Soft skill Training and Technical Training Sessions	Soft skill and Technical training sessions organized for C++, Web Development, Python
2021-22	Students demand for Practical based Learning.	Emphasis is given on Project Based Learning (IOT Projects + Projects involved for Seminar Course)
2020-21	Organize soft skill development program	Separate Slot for Soft skill Session (Campus to Corporate) is allotted in Timetable.
2019-20	Technical Training Program should be organized.	4 Weeks Industry Training Program (Yugam Event) conducted for IOT, AI, Web Designing Domains.
2018-19	More Usage of ICT TOOLS for Teaching Learning Process.	Students are encouraged to attempt Quizzes, MCQ Test on MOODLE.  Facility of Intelligent Interactive Panel is Provided in Classrooms.

The suggestions/complaints/appreciations from the students are shared with the concerned course coordinator through program coordinator. This process is useful to evaluate course coordinator performance.

## 9.2 Feedback on facilities (05)

### Feedback collection procedure

The institute has set the process of facility feedback mechanism to improve the quality and performance. In every semester, feedback is collected from the students on the various facilities provided to them such as library, transport, internet, canteen, sports etc. The feedback from students regarding the facilities is collected in a semester.

#### **9.4 Self-Learning (05)**

##### **Scope for self-learning:**

- Students are encouraged to register for online courses offered by world's leading MOOC Platforms like Coursera, NPTEL, Udemy.
- Exclusive Library Slot is assigned in timetable for self learning.
- Digital Library available at institute level.(DELNET)
- Technical competitions, workshops, seminars, quiz competitions are being conducted where students actively participate.
- Students are also encouraged to register for national level competitions for overall development.

##### **Facilities for self-learning:**

- IIT Remote Center
- Open Source Videos
- Digital Library
- Internet WI-FI
- Virtual Lab
- DELNET Library
- NPTEL Local Chapter
- MOODLE

Students are facilitated with a well-equipped library provided with latest edition of books, e-Books, online and printed journals and modern labs. The college central library is well equipped with technical magazines, journals and NPTEL lecture videos. The Institute facilities use the library resources to enhance the self-learning of students in following ways:

- The Institute library has a collection of reference books, handbooks on different courses.
- Internet and Wi-Fi facility is provided to all students and staff.
- To update themselves with the current news and latest technological developments, students and staff avail the facilities of News papers and magazines in the library.
- Students are provided with the book bank facility for all students.

- Question paper sets of all subjects of previous University examination are available in the central library.
- Old project reports of students are maintained in departmental library which are referred regularly by students of the department.

**Fig. 9.4.a: DELNET Web portal**

**Fig. 9.4.a: Students Participating In Online Certification Courses**

**Effective Utilization:**

- Students used various self-learning tools for their seminars, mini projects and final year projects.
- Every student has login ID and Password for accessing the internet.
- Students have been given access to library through KOHA software. This facilitates ease of access to library.
- Students have attended the Spoken English and Technical Skill Development sessions through IIT Remote Center.
- Students have been guided and encouraged to learn NPTEL courses through NPTEL Local Chapter.
- The college central library has NPTEL videos, educational CDs having lectures of renowned Professors.
- Students are provided DELNET library facility to refer online books, journals.
- Students have individual account on MOODLE and thereby they can attempt quizzes, read study materials uploaded by faculty members.

**9.5 Career Guidance, Training, Placement (10)**

The institution may specify the facility, its management and its effectiveness for career guidance including counseling for higher studies, campus placement support, industry interaction for training/ internship /placement etc.

**Facility:**

- Institute has a Training and Placement cell, responsible for grooming the students to be industry ready and provide opportunities for placement.
- T&P cell organizes various programs for overall personality development of the students.
- Experienced industry professionals in the respective domain of job profiles are invited for guest lectures.
- Through these activities, the students are made aware of the opportunities in various fields along with the required job profile. At the same time, they get a chance to interact with these industry professionals to take advantage of their experience in respective field of expertise.
- Career guidance books such as GRE, GATE are available in the library.

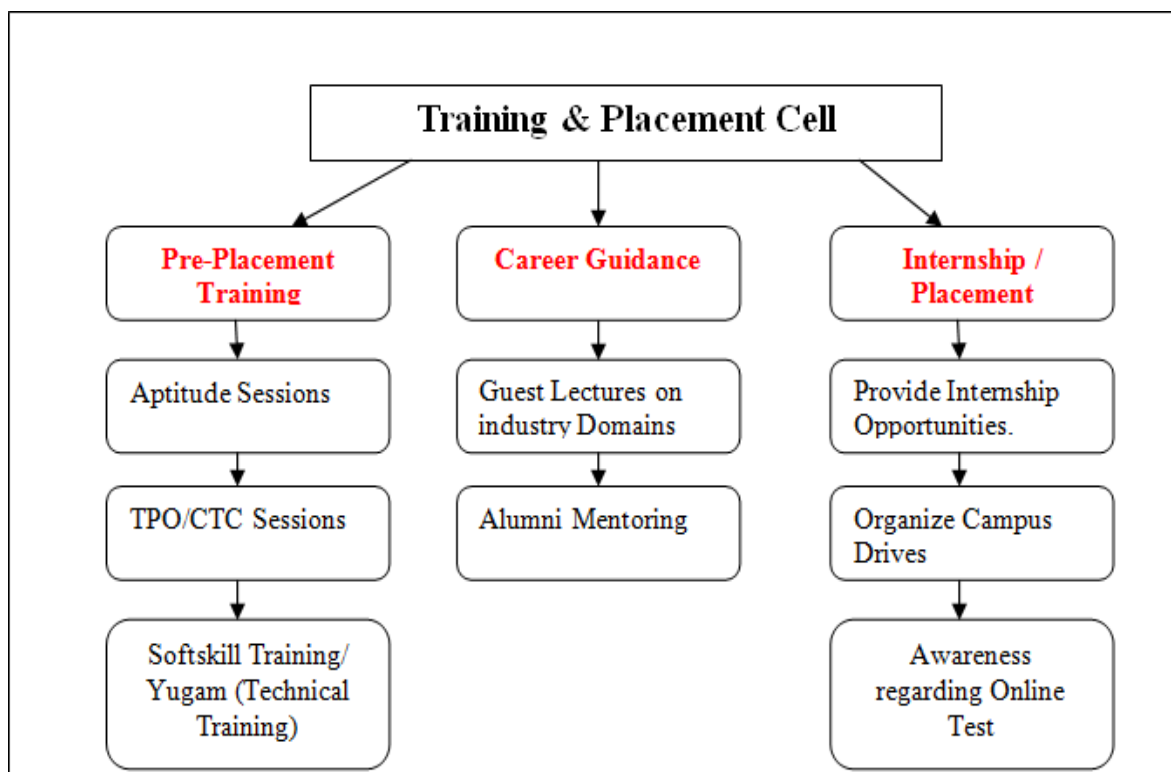

In addition, with T&P Cell, Institute has initiated Campus To Corporate Activity to help students improve communication skills, interpersonal skills, societal awareness and inculcate ethics.

**Facility Management:**

- The students are groomed through lectures on aspects of pre-requisites for facing interviews such as preparing an effective prototype resume and effective measures and presentation skills to face an interview.
- The students are also counseled for taking up higher studies in India as well as abroad.

**Placement Procedure:**

Institute training and placement cell procedure is as follows

**Fig. 9.5.a: Institute training and placement cell procedure**

#### **National Service Scheme(NSS):**

As per the guidelines of DBATU Lonere, the Institute has for meda NSS unit of students and staff. The NSS unit in the college provides a platform for various socially relevant services such as:

- Providing guidance to students studying in the rural areas
- Creating awareness about the natural disasters such as flood, earthquakes in the student community
- Arranging and Participating in Swatchhata Awareness Ralley and Swatchhata Camps in Villages.
- Organizing Camps in Villages for delivering services to society and creating social awareness among students
- Spreading awareness about traffic rules and safety measures among staff members and students
- Having discussions regarding the various challenges faced by the youth.

The NSS wing of the college encourages the students in community development activities which motivate the students for Social Service. The college NSS team regularly visits surrounding areas and villages where people are made aware about various social, moral and ethical issues.

### **Unnat Bharat Abhiyan (Contribution in Rural Development)**

Unnat Bharat Abhiyan (UBA) is a flagship programme of Ministry of Human Resource Development (MHRD), Govt. of India. The Institute is participating in Unnat Bharat Abhiyan and adopted villages for their development in collaboration with district administration. Institute has adopted following villages:

1. Panmalewadi
2. Varye
3. Bhuinj
4. Panchwad
5. Bamnoli
- T. Kudal

### Co-curricular Activities:

Students are motivated to participate in National level Competitions related to Project Presentation, Paper/Poster Presentation, Debate, Idea Presentation. Every year students are encouraged and guided to participate **Smart India Hackathone**, **AVISHKAR**, **DiPEX**. Because of such initiatives a competitive spirit and passion towards innovations are developed among the students.

### Student Chapter Formed: Indian Geotechnical Society:

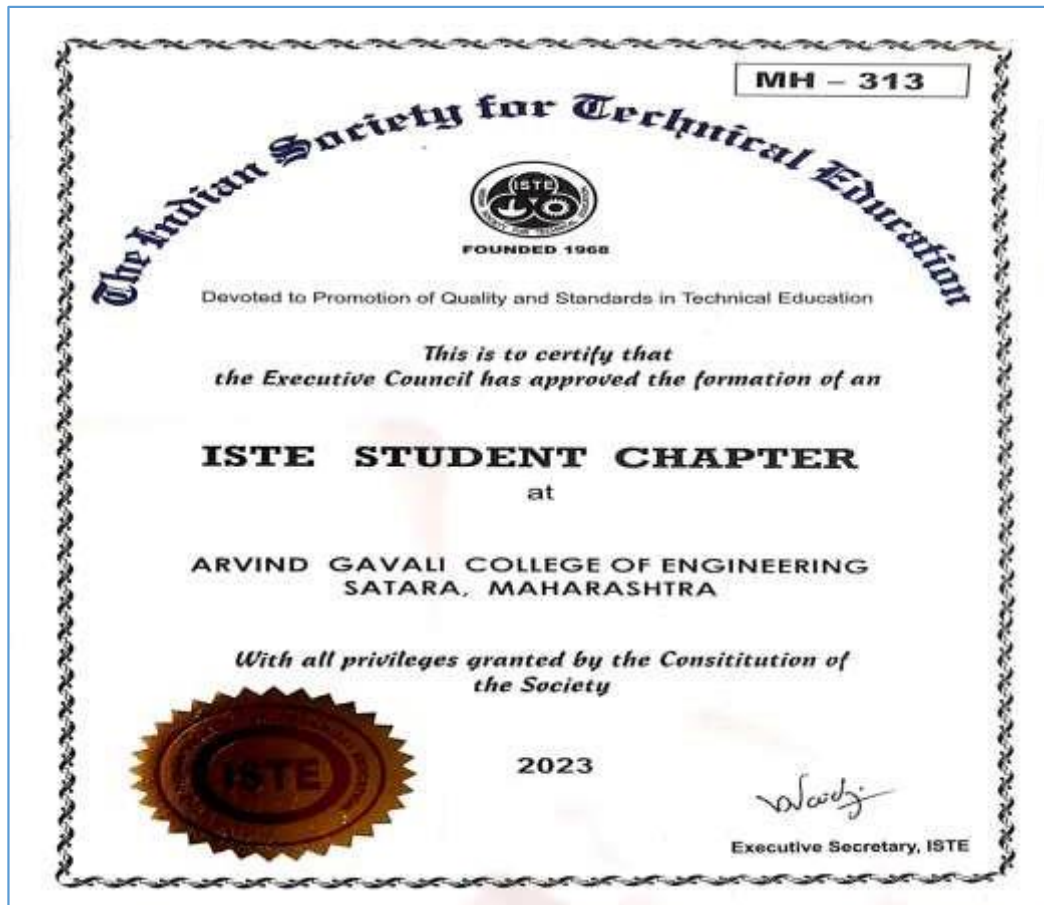

Student Chapter is formed under Indian Geotechnical Society(I.G.S.), Pune by Department of Civil Engineering. Under the chapter, guest/expert Lectures Geotechnical Field, industrial visits, workshops are supposed to be conducted. This chapter helps students to explore different aspects of geotechnical Field. This chapter promotes activities to inculcate passion towards geotechnical field and guides career opportunities in geotechnical field.

### **Institutional Member of Indian Society for Technical Education (ISTE):**

The main goal of this membership is to provide the technical opportunity for students to broaden their knowledge of engineering and to interact with eminent faculties of the organization. An Institutional membership can allow students to cultivate their interest in engineering. It can introduce students to possibility of future study or employment in engineering.

### **9.7.q: ISTE student Chapter Formed**

#### **International Society for Research and Development, London Students chapter**

The kinds of activities a student chapter can undertake are endless, depending on the creativity and interest of each group. But here are a few examples of academic, social, and professional activities that may be of interest to your group. Distinguished Speakers Program/ Lectures, posters, make a Website, Communication Workshop etc.

#### **Manufacturers Association of Satara**

The Institute has opted for MAS Membership in order to bridge the gap between institute and Industry. MAS have been playing a significant role in accelerating the industrial development of Satara region for more than three decades now. The major activity of MAS is arranging seminars & workshops for Students and members. Arrange & facilitate expert consultation to members. Try to promote industry friendly atmosphere in Satara region.

**Photography Club:**

Institute had formed Photography Club to encourage the students to showcase their photography skills and view towards the things around them. The Club is arranging the Photography Competition to promote the skills of students and develop their ability to participate and compete others. The Photography competition was conducted 10<sup>th</sup> September 2019. Students have participated with the photos they have taken and explained their views/opinion on the same.

**Fig. 9.7.r: Prize distribution of Photography & Videography Competition organized by Photography Club**

**IoT Club:**

Institute had formed IoT (Internet of Things Club) to explore the opportunities in the Internet of Things domain. The students from all department can participate in the activities related to Internet of Things. IoT Club had arranged industrial visit to C.O.E., Pune's BHAU Institute. During visit hours students were guided regarding the IoT, A.I., M.L. by Mr. Nikhil Bhaskaran, and Ms. Sejal Gupta. Also IoT club guides and helps students regarding internet of Things projects.

 Robotics Engineering is a field that involves designing, building and operating automated systems that perform specific actions in a way humans.

**Objectives:**  
 The objective of the training is to get the new professional skills through hands on practical on "Kuka Robot", so that students can face the interviews successfully for getting a job in Robotics and Automation sector.

**Duration of Training:**  
 The duration of training will be 90 days (9 Hours every day, from Monday to Saturday between 11:00 AM to 05:00 PM)

**Course Structure:**  
 • PLC Ladder Logic Programming with HMI, Modbus and DTMC bits.  
 • SCADA and HMI System  
 • Robot Application using Microcontroller  
 • Control Panel Designing  
 • Hands on practical on Physical "Kuka Robot"  
 • Assembly of soft Python Language

**Cloud Computing Club:**The major objective of our group is to raise technical awareness of cloud and devops on our campus. We are an interdisciplinary cloud club, so rather than concentrating on just one cloud provider like AWS or GCP, we will cover a wide range of providers including IBM, Alibaba, and many more. Instead of offering more theoretical lectures, we will concentrate on bringing practical events. We make an effort to give our trainees practical, industrial experience.

#### **Competitive Exam Club:**

This club helps students to get all information regarding the competitive examinations such as U.P.S.C., M.P.S.C., RRB, I.B.P.S., M.S.E.B.. Guest lecturers from Experts are conducted to guide the students regarding the preparation and prerequisites of the examinations.

#### **Special Batch:**

This club is formed to encourage the students to prepare and pursue career in Arm Forces (Army, Navy, Air Force). Motivational sessions are conducted to bring patriotism among the students. Students are guided about various exams like Technical Graduate Entry, University Entrance Scheme, Short Service Commission. Students are trained for these examinations under the guidance of Dr. S.P. Lavand (Ex. Navy Officer).

**Fig.9.7.u : Students visited 22MAH BN NCC Camp at Mahagaon, Satara**

#### **Electro Club:**

This club is formed to inculcate passion towards the Automation, Robot Making, PCB Designing among the students. This club arranges the sessions to guide the students to develop skills required for Industrial Automation, Robot making. This club arranges the

training and competitions for providing the platform to showcase their skills and hard work.

### **Foreign Language Club:**

Institute has taken initiative for promoting students to understand the importance of foreign languages and opportunities after learning them. Institute has started the German Language Training program for students. Here students are guided regarding the learning curve of the languages by organizing training sessions, guest lectures.

### **3D Printing Club:**

*The objective of this club is to aware students about 3D printing. This club is taking initiatives to help students understand how the designer's role has evolved over time and how it is likely to change as we move toward mass customization. Activities under 3D Printing club aware students to use the principles of Design and Identify opportunities to apply 3D printing technology for time and cost savings*

**10.1 Organization, Governance and Transparency (40)****10.1.1 State the Vision and Mission of the Institute (05)**

- A. Availability of the Vision & Mission statements of the Institute (02)
- B. Appropriateness/Relevance of the Statements (03)

A. Vision & Mission statements of the Institute

***Vision:***

To be an institute of excellence, developing skilled engineers to serve the industry and society.

***Mission:***

Our Mission is to

- M1: To provide quality education through effective teaching learning process.
- M2: To develop professional skills and promote innovation among students by providing a conducive atmosphere.
- M3: To inculcate ethical values, respect for the environment, and social responsibility.

**B. Appropriateness/Relevance of the Statements (03)*****Vision:***

**To be an institute of excellence, developing skilled engineers to serve the industry and society.**

Through excellence in key terms and strategy, the institute informs development while also articulating its purpose to stakeholders. The aims and objectives are used to measure the institute's success. Excellence in engineering education system towards greater cause of society through the implementation of projects to address societal issues and commitment to readiness of industry-oriented skill to serve in industry as a professional engineer by incorporating expert lecture series through industrial experts and internships in line with National Education Policy 2023.

***Mission:***

**M1: To provide quality education through effective teaching learning process.**

We choose to offer students a top-notch education by embracing ICT technologies and project-based learning. We have been able to develop a variety of learning experiences through industrial expertise, real-world settings, and inquiry-based learning thanks to the use of innovative teaching techniques.

**M2: To develop professional skills & promote innovation among students by providing conducive atmosphere.**

The institute fosters an environment where students can develop their technical and soft skills through project competitions, creative ideas for "AVISHKAR," patent filing, NPTEL registration, expert-led soft skill workshops, execution of training and placement activities, internships, etc.

**M3: To inculcate ethical values, respect for environment and social responsibility.**

The institute has organized a workshop on ethical values to outline ethical workplace principles such as adhering to institute policies and procedures, effective communication, accepting responsibility, professionalism, mutual respect, and trust. The institute has also planned and taken part in environmental and socially conscious events, such as tree planting, cleanliness campaigns, geo-tagging, no car days, distribution of dustbins, mask and tablet donations, vaccination camps, and self-defense workshops.

### **Role and Functions of Governing Body**

Good governance of the technical institution plays an important role in the growth and development of the Institution. Governing body acts professionally and approves the ultimate goal of the Institution. The governing body is unambiguously and collectively responsible for overseeing the institution's activities, determining its future direction and fostering an environment in which the institutional mission is achieved. The body meets twice a year and proceedings of the meetings should be maintained properly. The college is governed by the Governing body, which is constituted as per AICTE and trust norms. A governing body should perform all four types of functions, i.e. managerial, administrative, academic and financial. A governing body should perform the following functions in each category:

#### **A) Managerial:**

- **Provide Vision:** Governing body should initiate the process of crafting the vision statement and preparing vision documents of the institution.
- **Inculcate Values:** Governing body encourages the establishment of a value system to achieve vision, missions, and goals of the Institution.
- **Act as a buffer:** Governing body serves as a bridge and buffer between the institution and stakeholders.
- **Support the head of the Institution:** Governing body should support the head of the Institution to carry out the business of the Institution. There should be a good relationship between the head of the Institution and the governing body.
- **Oversee the functioning of the Institution:** Governing body should monitor and evaluate the Performance of the Institution on a regular basis against set goals.

#### **B) Administrative:**

- **Approval:** Governing body should approve annual reports of the Institute.
- **Approval of Policies:** Governing body should approve a recruitment policy. It should approve and review procedures for the selection, recruitment and transfer of faculty and staff members. It should approve service conditions, emoluments and travelling allowances for teaching and non-teaching staff of the Institute. It should approve the policy of appointing a consultant, visiting faculty, experts and other people based on need.

Evaluate the performance of head of the institution: Select, support and evaluate the performance of head of the Institution. The governing body manages the institution and its performance through the head of the institution. The head of the Institution should possess abilities to manage the institution according to the wish of the governing body.

### C) Academic:

- **Approval:** Governing body should approve the new program of studies leading to a diploma, post-diploma, undergraduate, postgraduate and Ph.D.
- **Utilization of academic resources:** Governing body should ensure full use of the academic potential of the institution in various academic activities.

### D) Financial:

- **Approval:** Governing body should approve the annual budget & expenditure.
- **Audit:** Governing body should appoint a qualified auditor every year to conduct the audit. Consider the issues raised by the auditors for improvement in finance utilization.
- **Financial health:** Governing body should ensure the good financial position of the institution through proper planning and utilization of funds.

## C. College Development Committee of the Institute (formerly known as Local Managing Committee)

### **Role and Functions of College Development Committee**

As per the Maharashtra University Act, separate Local Managing Committee is constituted for the day to day functioning of the college. This committee should meet two times a year and proceedings of the meetings are maintained properly. Members elected or nominated shall have a term of five years. The committee comprises of the Chairman of the management, Secretary of the management, three local members nominated by the management, three teachers elected by the institution, one non-teaching employee and Principal- Member Secretary.

**The frequency of meeting:** Twice in a year

**The duties of the local managing committee are:**

- Prepare the budget and forward it to the governing body.
- Determine the program of instruction and internal evaluation and to discuss the progress of studies in the college.
- Monitor the academic function of the college and extracurricular and co-curricular activities.
- Make recommendations to the management for the improvement of the standard of teaching in the college.
- Formulate proposals of new expenditure not provided for in the college budget if any.

### **Internal Quality Assurance Cell (IQAC)**

To ensure quality in the teaching-learning process and maintain academic up gradation IQAC is formed. IQAC works towards the realization of the goals of quality enhancement and sustenance. The prime task of the IQAC is to develop a system for conscious, consistent and catalytic improvement in the overall performance of institutions.

1. Academic Monitoring

In-line with DBATU academic calendar, Institute prepared its academic calendar and also respective departments prepared its calendar. Based on the Institute's academic calendar, every department carried out their work load distribution based on their domain of expertise and prepared the respective Time table and got it approved from AMC and the Head of Institute. As per the University guidelines lectures and practical were commenced. Internal academic monitoring was carried out and necessary action taken.

Guardian faculty mentoring system is implemented in the Institute wherein 15 to 20 students are assigned to a faculty member who acts as their mentor for the entire program. Mentor

regularly interacts with the students and monitors their academic performance and attendance. Students are counselled by the mentors, class coordinator, faculty and HOD for improving their academic performance and attendance. Mentors and Class Advisors counsel the students regarding their performance and schedule additional lectures/practical. The students are given guidance for academic, career, and also on personal issues. The mentors discuss with each and every student on an individual basis and support them in all the possible ways to improve their academic performance. The mentors always keep a check on the attendance of the student, the marks/grades obtained in the internal and external examinations.

#### 5. Promotional Activity Committee

Parents and students are not aware of the various educational opportunities available in rural areas. We at AGCE, have a well developed mechanism where faculty members make it a point to meet the parents, students and also various schools and colleges to make them aware of the educational facilities we impart and also of the admission process. Due to this, all the people are made aware not only of the presence of our Institute but also of the different career opportunities. As per the DTE process School connect program is conducted by faculty members visiting different schools and students. Faculty members give information about various scholarships, transport facilities and also the accommodation facility made available to the students including girl's hostel.

#### 6. Training and Placement Committee

The Institute Provides Skill Improvement Program for Placements. That gives personal and career counselling to achieve desirable improvement in students. One of the major objectives is to help students to obtain internships and placement in companies across various industrial sectors. The students are encouraged to present technical papers at seminars in other Institutes with a view to improving their research and presentation skills. Faculty members from each department are co-opted as members of the Placement Cell.

#### 8. R & D and IPR

Research and Development cell designs annual research activity plan for all the departments, establish liaison with near and far industries and identify the technological challenges being faced by them. These problems of the industry are taken up as projects for finding solutions through R&D which are assigned to both faculty members and students. To initiate and promote MoUs with Industries for consultancy, collaborative research, sponsored projects, Industry and Institute interactions etc. To motivate students for presenting papers in National and International conferences, Demonstrate projects in various competitions.

#### 14. Extracurricular Activities Committee:

Students have strong representations in all cultural and sports committees. They help in organization and management of different events. Major events include annual Sports Competition and Cultural event. Organize intra-college competitions at the Institute level. Assist and encourage the students to participate actively in organizing and conducting various indoor, outdoor sporting games. Maintain records of the sporting events attended by students held in the Institute. Submit annual report of the sports/ events conducted, budget allocations and expenditure incurred during the year. Encouraging students to participate in the intra or inter-collegiate events. Students are part of organizing committees all the engineering activities at departmental/Institute level. Some of these activities include conferences, coding, project contests, technical events, quiz competitions, student club activities etc.

### 15. Grievances Redressal Committee

A grievance cell is established in this Institute to resolve any types of disputes among the students. Grievance boxes are made available in the Institute. Stakeholders can drop the grievances mentioned on the paper in the box provided. Resolve grievances which develop in Institute premises, maintaining confidentiality, impartiality, transparency. Establish grievance free Institute environment. To resolve the disputes and any other issues arising amongst the students. To create a professional environment for sustainable development. Encourage the students to show responsible approach. To enhance effective communication to state the grievance verbally or through the use of grievance box. Encourage the students to practice courteous communication behaviour which will be useful in their entire life.

### **B. Grievances Redressal Mechanism**

Grievances are taken through following committees. Suggestion boxes are kept for the students

Grievances Redressal Committee

Internal Complaint Committee

Anti-ragging Committee

Grievance Redressal Mechanism: -

The institute has constituted Grievance Redressal cell (GRC), Internal Complaints Committee (ICC) and Antiragging Committee as per the guidelines by the competent authority. Online Grievance Redressal system is purchased and installed.

1.0 Grievance Redressal cell (GRC): - Dr. Thombare Vijay Ramchandra

Grievance Redressal Cell is formed to provide a safe, fair and harmonious learning and work environment, for handling day-to-day grievances related to students, parents and employees. Grievance Redressal Cell facilitates the resolution of grievances in a fair and impartial manner maintaining necessary confidentiality.

Objectives of Grievance Redressal Cell:

- To ensure a fair, impartial and consistent mechanism for Redressal of varied issues faced by the students, parents and employees. To promote cordial Student-Student relationship, Student-teacher relationship, teacher-teacher relationship.
- To develop a responsive and accountable attitude amongst all to maintain a harmonious environment in the college campus. To ensure that grievances are resolved timely with complete confidentiality

#### 10.1.4 Delegation of financial powers

(10)

A. Financial powers delegated to the Principal, Heads of Departments and relevant in-charges (3)

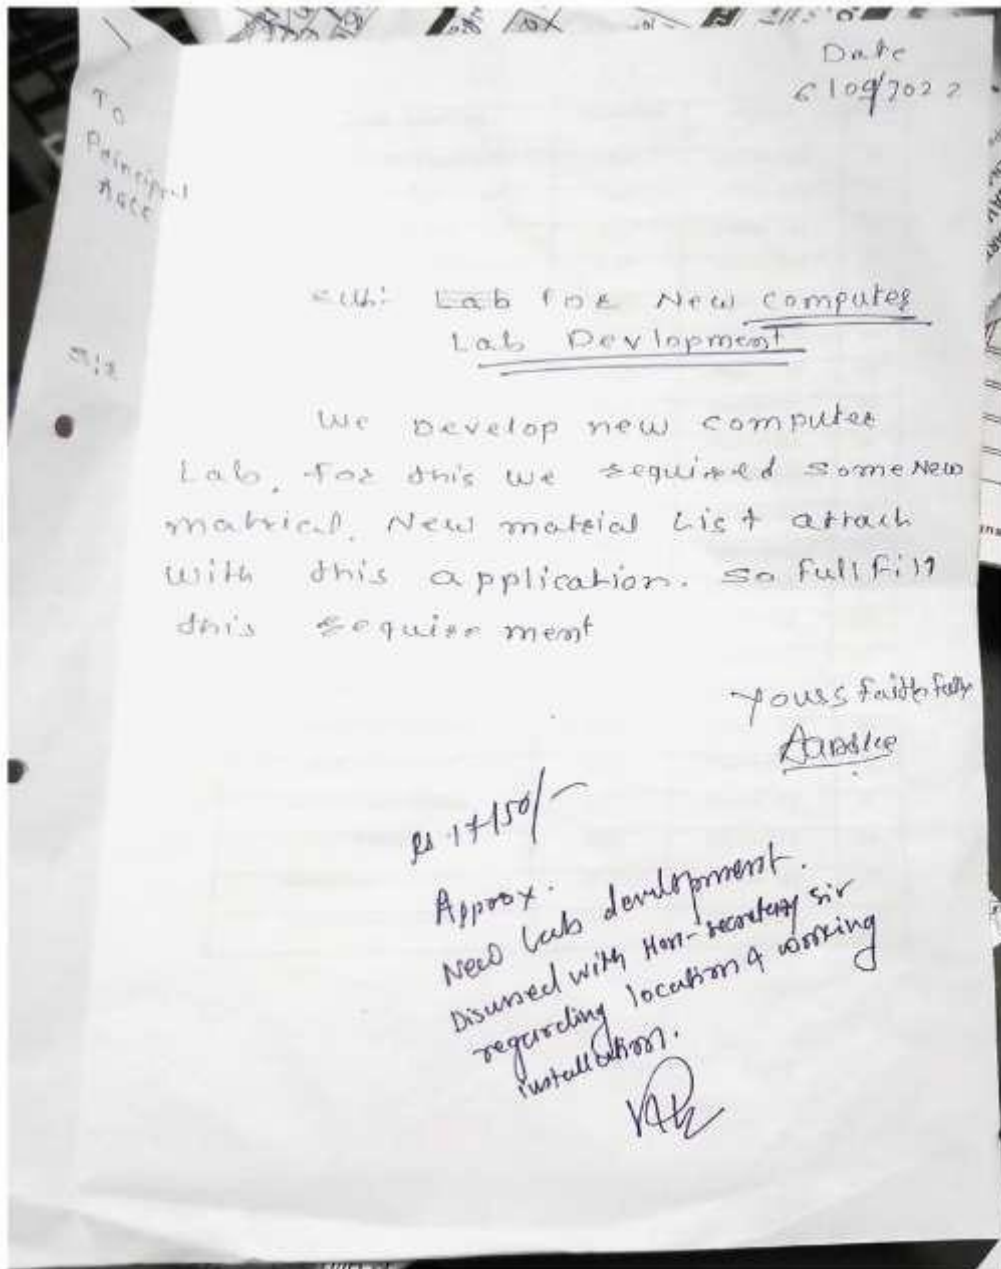

B. Demonstrate the utilization of financial powers for each of the assessment years (7)

In order to discharge the day-to-day functions and activities of the Institute in smooth manner, the financial powers are delegated of the Principal, HODs and Deans by the Management. HODs and Deans also prepare budget of the Department and their relevant functional committees. Total budget of the college is prepared by Administrative Office under guidelines of Principal and Management.

**10.1.5 Transparency and availability of correct/unambiguous information in public domain.**

- a. Information on the policies, rules, process is to be made available on website
- b. Dissemination of the information about students, faculty and staff.

The college maintains transparency in all its operations and working. At the beginning of every academic year, the college brings out a calendar, which contains all the information, required by a student and faculty to carry out his/her studies in the college. Information such as internal marks scored by students, shortage of attendance, if any, availability of scholarships, opportunities for students, etc. are promptly displayed on notice boards. Information about every activity in the college is sent to all staff and students through circulars. The institute has its own website: <https://agce.edu.in/>, which is updated as and when required. The institute and Program-specific information are made available to all stakeholders through the website.

All the required information on policies, rules, and processes are mention in Process Handbook and is made available on the college website for proper dissemination of this information to stakeholders.

**10.2 Budget Allocation, Utilization, and Public Accounting at Institute level (30)**

Institute has a well-defined financial policy which ensures optimal utilization of finances for academic, administrative and research activities. The Institute is being run with self sufficient funds generated from tuition fees and from Samarth Education Trust. In case of activities like expansion and renovation of the building, the management always supports by providing required finance. Financial planning is done efficiently at the beginning of the academic year and the budget is approved by the Governing Body.

Optimum utilization of funds is ensured through: -

Adequate funds are allocated for effective teaching learning practices that include Orientation Programmes, Workshops, Interdisciplinary activities, Training programmes, Refresher Courses that ensures quality education.

Budget is utilized to meet day to day operational and administrative expenses and maintenance of fixed assets. Enhancement of library facilities needs to augment learning practices and accordingly requisite funds are utilized every year.

Adequate funds are utilized for development and maintenance of infrastructure of the Institute.

Partial funds are allocated for social service activities as part of social responsibilities through NSS and NCC. Institute provides financial assistance for mini projects.

**10.2.1 Adequacy of budget allocation****(10)**

During the assessment years, the institute allocated an adequate budget. Budget requirements under 'recurring' and 'non-recurring' heads are collected from all the departments and sanctions before the commencement of the financial year. Allocations are made as per the availability of funds. Spending is monitored by the accounts section. The institution carefully monitors the expenses so that the necessities are met without affecting the smooth working of the institution. The management has been very efficient in doing this over the past several years.

**Adequacy of budget allocation:**

## 10.2.1 Adequate budget allocation for institute

<b>Sr. No</b>	<b>Assessment Year</b>	<b>Allocated Budget</b>	<b>Adequate/ Non-Adequate</b>
1	2022-23	11,06,21,000	Adequate
2	2021-22	9,11,49,500	Adequate
3	2020-21	9,60,20,000	Adequate
4	2019-20	9,56,92,000	Adequate
5	2018-19	10,34,74,520	Adequate

**10.2.2 Utilization of allocated Funds****(15)**

Utilization of allocated Funds:

The Principal of the College allocates funds. Department Heads / Section-In charge is informed to utilize the extent of funds allocated against their proposed budget. Major works like construction, up-gradation of existing infrastructure, procurement and maintenance of common utilities, housekeeping, procurement of furniture, etc. are controlled directly by the Principal. Actions for procurement of lab equipment, up-gradation of existing lab facilities, purchase of consumables, etc. are initiated from the respective departments and the funds are released on a case by case basis from the accounts office of the college on approval by the Principal. During the last three years, the budget was utilized to meet expenses such as staff salary, infrastructure development, purchase of equipment, expenses towards consumables and contingencies, travel, etc.

Recurring and non-recurring expenditure is made in the following manner.-

- The requirement of purchase initiated by functional heads.
- It is further verified by the principal.
- On the basis of priority requirement quotations invited from a reputed supplier.
- Comparative statements are prepared and presented before the purchase committee.
- By considering the urgency of requirement and amount involved negotiations are called either before  
management or principal.
- After negotiations purchase is initiated by placing a purchase order or work order.
- When equipment or product is received the same is verified for quality and fulfilment of the requirement. Also if training or testing is required then the same is done by the respective functional head.
- On receipt of a satisfactory remark from the respective department, it is recorded in the inward register at the central store. The same is given to the respective department.

- After that bill along with material inward note is submitted to the account section for the payment purpose.
- Account section does the scrutiny of the document and on receiving the sanction of principal or management actual payment is made.

**Table 10.2.2 Utilization of allocated Funds of Institute**

<b>Sr. No</b>	<b>Assessment Year</b>	<b>Allocated Budget</b>	<b>Utilized Budget</b>	<b>Utilized Percentage</b>
1	2022-23	11,06,21,000.00	9,11,80,725.65	82.43
2	2021-22	9,11,49,500.00	8,31,08,233.00	91.18
3	2020-21	9,60,20,000.00	7,27,82,718.00	75.80
4	2019-20	9,56,92,000.00	7,47,23,655.43	78.09
5	2018-19	10,34,74,520.00	7,23,22,429.17	69.89

Note: Difference in allocated and utilised budget is more, since the institute prepares budget by considering bank loan instalment (Principle+ interest).But, in profit & loss statement only interest amount is reflected.

**10.2.3 Availability of the audited statements on the institute's website (05)**

**10.3.1 Adequacy of budget allocation****(10)**

During the assessment years, the institute allocated an adequate budget. Budget requirements under 'recurring' and 'non-recurring' heads are collected from all the departments and sanctions before the commencement of the financial year. Allocations are made as per the availability of funds. Spending is monitored by the accounts section. The institution carefully monitors the expenses so that the necessities are met without affecting the smooth working of the institution. The management has been very efficient in doing this over the past several years.

### 10.3.2 Utilization of Allocated Funds

Utilization of allocated Funds:

The Principal of the College allocates funds. Department Heads / Section-In charge is informed to utilize the extent of funds allocated against their proposed budget. Major works like construction, up-gradation of existing infrastructure, procurement and maintenance of common utilities, housekeeping, procurement of furniture, etc. are controlled directly by the Principal. Actions for procurement of lab equipment, up-gradation of existing lab facilities, purchase of consumables, etc. are initiated from the respective departments and the funds are released on a case by case basis from the accounts office of the college on approval by the Principal. During the last three years, the budget was utilized to meet expenses such as staff salary, infrastructure development, purchase of equipment, expenses towards consumables and contingencies, travel, etc.

Recurring and non-recurring expenditure is made in the following manner.-

- The requirement of purchase initiated by functional heads.
- It is further verified by the principal.
- On the basis of priority requirement quotations invited from a reputed supplier.
- Comparative statements are prepared and presented before the purchase committee.
- By considering the urgency of requirement and amount involved negotiations are called either before management or principal.
- After negotiations purchase is initiated by placing a purchase order or work order.
- When equipment or product is received the same is verified for quality and fulfilment of the requirement. Also if training or testing is required then the same is done by the respective functional head.
- On receipt of a satisfactory remark from the respective department, it is recorded in the inward register at the central store. The same is given to the respective department.

- After that bill along with material inward note is submitted to the account section for the payment purpose.

Account section does the scrutiny of the document and on receiving the sanction of principal or management actual payment is made.

### C. Support to students for self- learning activities:

AGCE library helps its students in self-learning activities in following way:

1. By providing facilities likes computers, internet and e-resources. The library has separate section where 20 computers with high speed internet are available to provide e-resources facilities to the student & faculty members. Users may access, read or download the e-resources e.g. e-books, e-journals, e-magazine, e-newspaper etc.
2. In addition to this, users may watch NPTEL video lectures of their interest here, which have been prepared by eminent professors of IITs & IISc. MIT library.
3. The SWAYAM PRABHA is a group of 32 DTH channels devoted to telecasting of high quality educational programmes on 24X7 basis using the GSAT 15 satellite. Every day, there are new content for at least (4) hours which would be repeated 5 more times in a day, allowing the students to choose the time of their convenience. The channels are uplinked from BISAG, Gandhinagar. The contents are provided by NPTEL, IITs, UGC, CEC, IGNOU, NCERT and NIOS.
4. One more important thing here is OPAC (Online Public Access Catalogue). It allows to the users to know about the library holding their account such as dues on his/her account, due date for returning material etc. The users may also access institutional repository. In this centre where they can found project report, old question papers, institute magazines/ journals, syllabus, and many more institute publications.

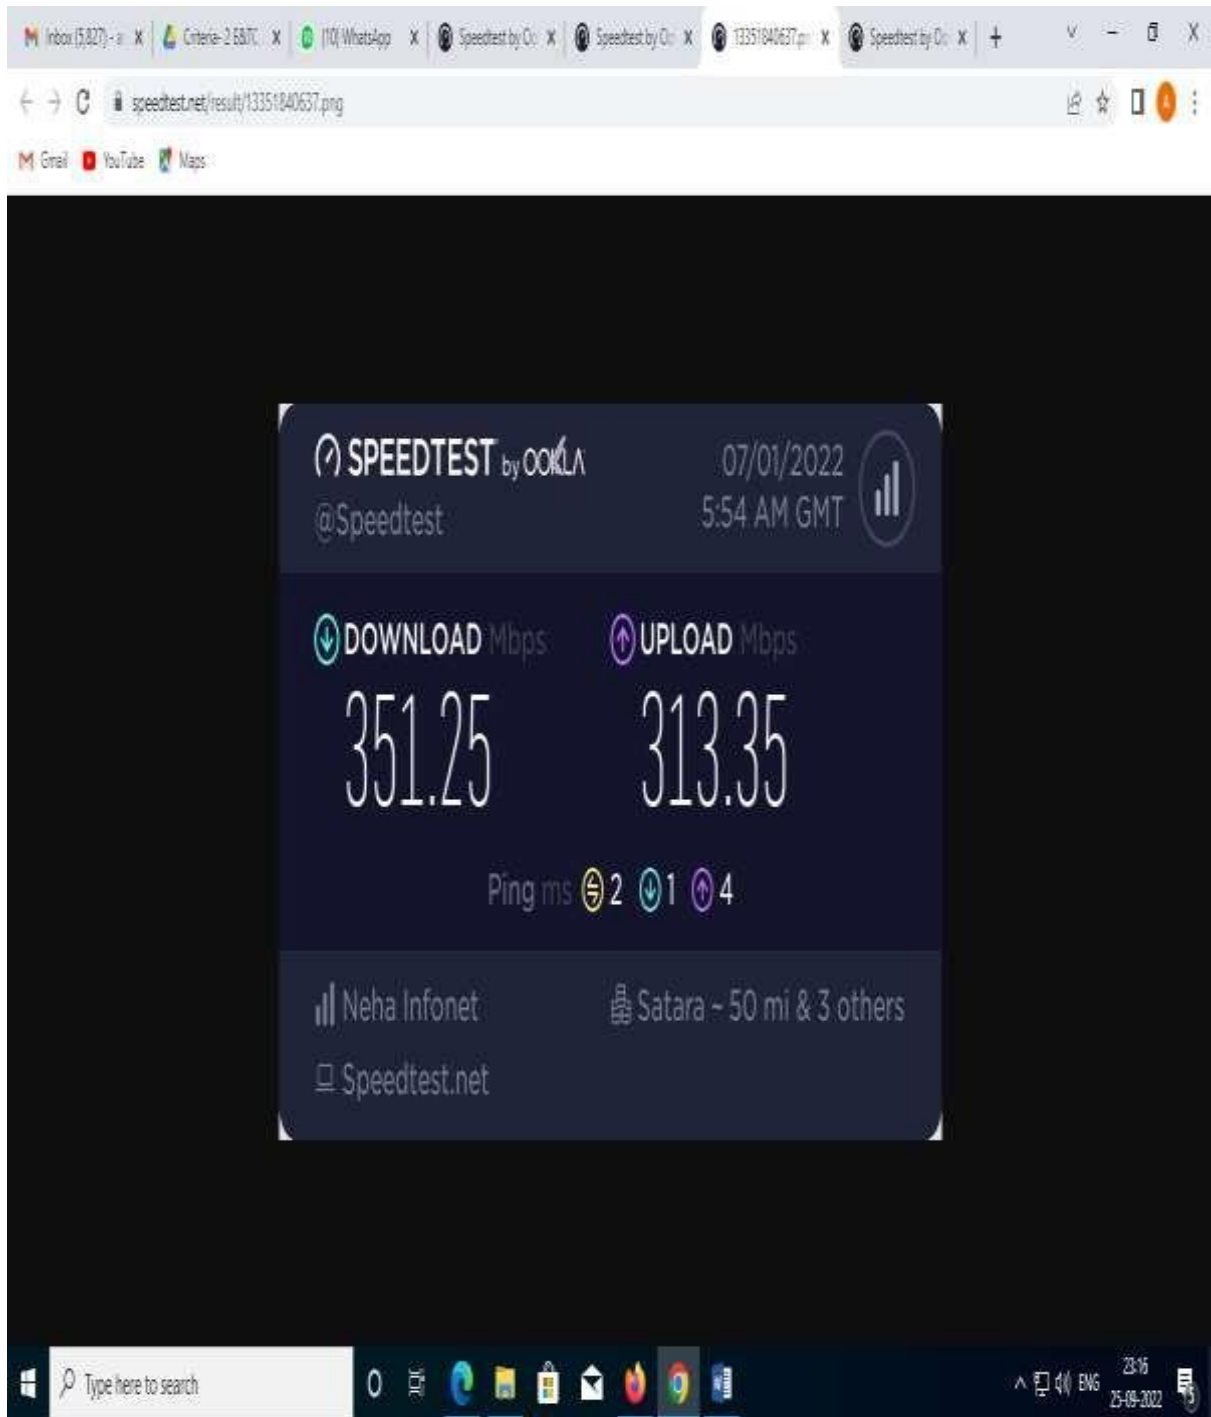

In addition to above, users can access the NDL (National Digital Library of India), which is very useful for students, faculty members and researchers. Here, they can search e-books, article, audio lecture video lecture, question paper and many more materials.
