Observation / Suggestions:

This game helps in building physical fitness, strength, speed and stamina. It also develops qualities such as obedience, discipline, sportsmanship, and loyalty between team members. The game is interesting because the position of the players sitting is dynamic; one will never find the same sequence of players sitting in the same order as when the game starts.

Overall well arrange sport with having number of students participated. Our student co coordinator and staff coordinator handle all responsibilities very nicely

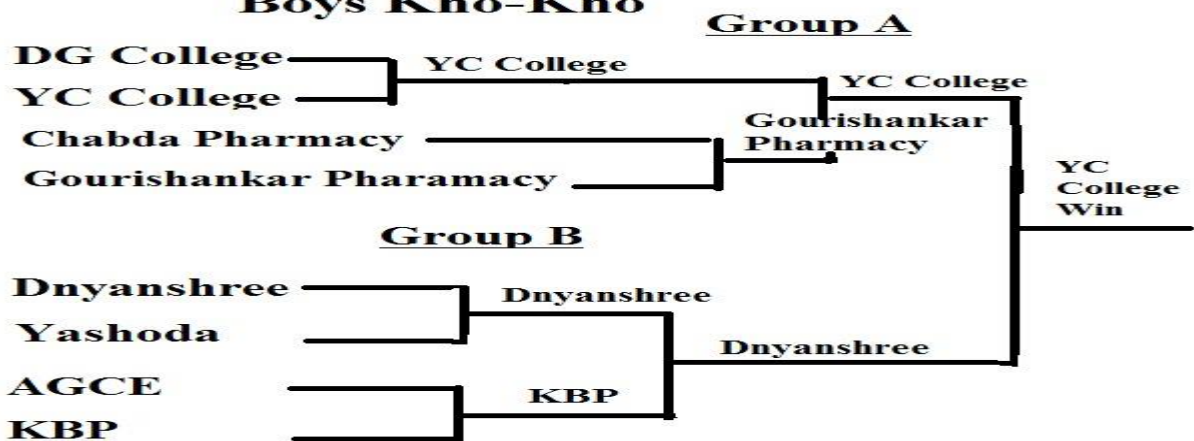

There is less awareness among the girl's students so interest should be increased in girl's students. So very good played by all participants with having lots of Fun.
